

Section I – Summary of Principal Results

7. Provisions of the System, as summarized in Schedule E, were taken into account in the current valuation. As in the previous valuation, the phase out of the KEHP dependent subsidies offered to retirees has been reflected.
8. The funded ratio shown in the Summary of Principal Results is the ratio of actuarial value of assets to the actuarial accrued liability. The funded status would be different based on the market value of assets. The funded ratio is an indication of progress in funding the promised benefits. Since the ratio is less than 100%, there is a need for additional contributions toward the payment of the unfunded actuarial accrued liability. In addition, this funded ratio does not have any relationship to measuring the sufficiency if the plan had to settle its liabilities.

Section II – Membership Data

1. Data regarding the membership of the Retiree Medical and Life Insurance Plans for use as a basis of the valuation were furnished by the System's office. The following tables summarize the membership of the System as of June 30, 2022, upon which the valuation was based. Detailed tabulations of the data are given in Schedule F.

ACTIVE MEMBERS AS OF JUNE 30, 2022

Group	Number*	Annual Salaries (\$1,000's)
University Full Time hired before 7/1/2008	1,434	\$ 101,598
University Full Time hired on/after 7/1/2008 and before 1/1/2022	1,493	85,937
University Full Time hired on/after 1/1/2022	54	777
Non-University Full Time hired before 7/1/2008	29,322	2,120,507
Non-University Full Time hired on/after 7/1/2008 and before 1/1/2022	30,726	1,633,131
Non-University Full Time hired on/after 1/1/2022	436	6,044
Non-University Part Time hired before 7/1/2008	1,036	10,164
Non-University Part Time hired on/after 7/1/2008 and before 1/1/2022	8,741	71,779
Non-University Part Time hired on/after 1/1/2022	1,543	3,572
Total	74,785	\$ 4,033,509

*The active member counts above reflect the initial active membership. Approximately 4,358 of these active members were ultimately valued in their retired status.

2. The following tables show the number of retired members and their beneficiaries receiving health care as of the valuation date as well as average ages.

RETIREES RECEIVING HEALTH BENEFITS AS OF JUNE 30, 2022

	Non-Medicare	Medicare	Total
Number	9,076	32,101	41,177
Average Age	59.58	75.12	71.69

SPOUSES RECEIVING HEALTH BENEFITS AS OF JUNE 30, 2022

	Non-Medicare	Medicare	Total
Number	1,459	5,202	6,661
Average Age	60.03	74.89	71.63

Section II – Membership Data

3. The Retiree Medical Plan valuation includes 7,665 deferred vested members eligible for health care at age 60, and the Life Insurance Plan valuation includes 10,573 deferred vested members eligible for retiree life insurance at age 60. There were initially 10,690 deferred vested members eligible for retiree life insurance at age 60. However, approximately 117 of these were also listed as retirees and were valued in their retired status versus deferred vested status.

Section III – Assets

1. As of June 30, 2022, the market value of the health trust assets held by the Retiree Medical Plan amounted to \$2,269,175,689 and the market value of the life trust assets held by the Life Insurance Plan amounted to \$88,380,503. The market investment return for the plan year was (9.70)% for the health trust and (14.96)% for the life trust.
2. The five-year market related value of the health trust assets used for valuation purposes as of June 30, 2022 was \$2,401,147,269 and the five-year market related value of the life trust assets used for valuation purposes as of June 30, 2022 was \$96,925,895. Schedule B shows the development of the actuarial value of assets as of June 30, 2022.
3. Schedule C shows the receipts and disbursements for the year preceding the valuation date and a reconciliation of the asset balances for the health trust and the life trust.

Section IV – Comments on Valuation

1. Schedule A of this report outlines the results of the actuarial valuation. The valuation was prepared in accordance with the actuarial assumptions and the actuarial cost method, which are described in Schedule D.
2. The valuation shows the Retiree Medical Plan has an actuarial accrued liability of \$1,936,621,223 for benefits expected to be paid on account of the present active membership, based on service to the valuation date. The liability on account of deferred vested members amounts to \$75,001,519. The liability on account of benefits payable to retirees and covered spouses amounts to \$1,757,089,871. The total actuarial accrued liability of the Retiree Medical Plan amounts to \$3,768,712,613. Against these liabilities, the Retiree Medical Plan has present assets for valuation purposes of \$2,401,147,269. When this amount is deducted from the actuarial accrued liability of \$3,768,712,613, there remains \$1,367,565,344 as the unfunded actuarial accrued liability for the Retiree Medical Plan.
3. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The normal contribution for the Retiree Medical Plan is determined to be \$80,558,140, or 2.00% of payroll.
4. The valuation shows that the Life Insurance Plan has an actuarial accrued liability of \$16,416,757 for benefits expected to be paid on account of the present active membership, based on service to the valuation date. The liability on account of deferred vested members amounts to \$4,326,079. The liability on account of benefits payable to retirees amounts to \$98,453,841. The total actuarial accrued liability of the Life Insurance Plan amounts to \$119,196,677. This amount includes liability for death in active service. The liability for death in active service could be segregated from the OPEB liability and assets could be split for active and post-employment purposes. As this could be administratively burdensome and, as death in active service liabilities can be considered de minimis, we will consider the entire liability an OPEB liability under GASB 74 and 75. Against these liabilities, the Life Insurance Plan has present assets for valuation purposes of \$96,925,895. When this amount is deducted from the actuarial accrued liability of \$119,196,677, there remains \$22,270,782 as the unfunded actuarial accrued liability for the life insurance plan.

Section IV – Comments on Valuation

5. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The normal contribution for the life insurance plan is determined to be \$965,924, or 0.03% of payroll.

Section V – Derivation of Experience Gains and Losses

Actual experience will never (except by coincidence) coincide exactly with assumed experience. It is assumed that gains and losses will be in balance over a period of years, but sizable year-to-year fluctuations are common. Detail on the derivation of the experience gain (loss) for the year ended June 30, 2022 is shown below (\$1,000's).

Experience (Gain)/Loss* of the:		Health Insurance Trust	Life Insurance Trust
(1)	UAAL as of 6/30/2021	\$ 1,384,029	\$ 21,173
(2)	Normal cost from last valuation	72,690	880
(3)	Expected employer contributions	175,804	2,726
(4)	Interest accrual: [(1) + (2)] x .071 - (3) x (.071)/2 for Health [(1) + (2)] x .071 - (3) x (.071)/2 for Life	<u>97,186</u>	<u>1,469</u>
(5)	Expected UAAL before changes: (1) + (2) - (3) + (4)	\$ 1,378,101	\$ 20,796
(6)	Change due to updated health care trend rates	181,271	0
(7)	Change due to claims experience	<u>(57,424)</u>	<u>0</u>
(8)	Expected UAAL after changes: (5) + (6) + (7)	\$ 1,501,948	\$ 20,796
(9)	Actual UAAL as of 6/30/2022	<u>1,367,566</u>	<u>22,271</u>
(10)	Total (gain)/loss: (9) - (8)	(134,382)	1,475
	(a) Contribution and investment (gain)/loss	<u>(110,303)</u>	<u>1,762</u>
	(b) Experience (gain)/loss (10) - (10a)	(24,079)	(287)
(11)	Accrued liabilities as of 6/30/2021	\$ 3,456,677	\$ 116,656
(12)	Experience (gain)/loss as percent of actuarial accrued liabilities at start of year (10b) / (11)	(0.70%)	(0.25%)

* Rows labeled as a change, rather than a gain/(loss), are expressed as negative if the UAAL is decreased and positive if the UAAL is increased.

Section VI – Contributions Payable Under the Plans

- Sections 161.420 and 161.550 of the Kentucky Revised Statutes provide the amounts employers and the State are required to contribute to the Health Insurance Trust. These contribution amounts vary by date of membership and employee type.

Employer Percentage of Payroll Contribution Made to Health Insurance Trust								
University Employees			School District Employees (Non-Federal) *			Other Employees		
Hired before 7/1/08	Hired on/after 7/1/08 and before 1/1/22	Hired on/after 1/1/22	Hired before 7/1/08	Hired on/after 7/1/08 and before 1/1/22	Hired on/after 1/1/22	Hired before 7/1/08	Hired on/after 7/1/08 and before 1/1/22	Hired on/after 1/1/22
2.775	2.775	2.000	3.000	3.000	3.000	3.750	3.750	3.750

* In addition to the amounts contributed by School Districts on behalf of Non-Federal employees, the State contributes 0.75%.

- For the fiscal year ending June 30, 2022, member contributions will be 2.775% for University employees and 3.750% for all other members. Based upon the amortization of the unfunded actuarial accrued liability over an 18-year period as a level percentage of payroll, the valuation indicates employer and State contributions of 1.845% of payroll for University employees and 0.870% of payroll for all other members.
- The State is scheduled to contribute 0.08% of salary to the Life Insurance Trust for the fiscal year ending June 30, 2024. We recommend maintain this rate for the fiscal year ending June 30, 2025 to support sufficiently the benefits of the Life Insurance Plan.

Section VI – Contributions Payable Under the Plans

REQUIRED CONTRIBUTION RATES

Health Insurance Trust									
For Fiscal Year Ending June 30, 2023									
Normal	2.00 %

Member	2.775 %	2.775 %	2.775 %	3.750 %	3.750 %	3.750 %	3.750 %	3.750 %	3.750 %
Employer	2.775	2.775	2.000	3.000	3.000	3.000	3.750	3.750	3.750
State*	1.570	1.570	1.570	2.320	2.320	2.320	1.570	1.570	1.570
Statutorily Required Prefunding**	(2.500)	(2.500)	(1.725)	(4.450)	(4.450)	(4.450)	(4.450)	(4.450)	(4.450)
Total	4.620 %	4.620 %	4.620 %	4.620 %	4.620 %	4.620 %	4.620 %	4.620 %	4.620 %

Life Insurance Trust	
Normal	0.03 %
Accrued Liability	<u>0.05</u>
Total	0.08 %
Member	0.00 %
State	<u>0.08</u>
Total	0.08 %

* This represents funding by the State to pay the cost of health insurance for retirees who are not eligible for Medicare and who retire on or after July 1, 2010, less the amounts that are otherwise required to be paid by the retirees under KTRS 161.675. See KRS 161.550(2). Includes the State contribution of 0.75% on behalf of Non-Federal School District employees.

** This represents funding by active members, local school districts, universities, and other employers toward the unfunded liability of the health trust. See KRS 161.540(1)(c)(3) & 161.550(5).

Section VI – Contributions Payable Under the Plans

4. The valuation indicates that a total normal contribution of 2.00% of payroll is required to meet the cost of benefits currently accruing under the Retiree Medical Plan and 0.03% of payroll is required to meet the cost of benefits currently accruing under the Life Insurance Plan. The difference between the total contribution and the normal contribution remains to be applied toward the liquidation of the unfunded actuarial accrued liability. This accrued liability payment is 2.62% of payroll for the Retiree Medical Plan and 0.05% of payroll for the Life Insurance Plan.
5. The unfunded actuarial accrued liability amounts to \$1,367,565,344 for the Retiree Medical Plan and \$22,270,782 for the Life Insurance Plan as of the valuation date. An accrued liability contribution rate of 2.62% of payroll for the Retiree Medical Plan and 0.05% of payroll for the Life Insurance Plan is sufficient to amortize the unfunded actuarial accrued liabilities over an 18-year period for the Retiree Medical Plan and a 22-year period for the Life Insurance Plan, based on the assumption that the payroll will increase by 2.75% annually.

Section VII – Comments on Level of Funding

1. Beneficiary contributions and the System's monthly contribution for retirees who opt into the Retiree Medical Plan is based upon date of hire, date of attaining age 65, years of service at retirement, plan election, Medicare eligibility, and tobacco use. Beneficiary contributions for dependents are targeted to be 100% of the cost of expected claims and/or insured premiums for spouses age 65 and older. Historically, this target has been achieved. 100% of the full cost for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the State on a current disbursement basis. Current employer and State contributions have been determined to be sufficient to fund the cost of the benefits to be provided. Benefits for university, school district (non-Federal), and other members are identical, although active employee contributions collected from university, school district (non-Federal), and other members differ. A listing of active member Retiree Medical Plan contributions by fiscal year, date of membership, and employer type is provided in Schedule E.
2. This valuation provides the contributions required to fund sufficiently the Retiree Medical Plan and to ensure the future solvency of the Health Insurance Trust. For all membership, a combined member contribution together with employer and State contributions totaling 4.62% of payroll is required to meet the cost of benefits currently accruing and provide for the amortization of the unfunded actuarial accrued liability over a period of 18 years.

Section VIII – Accounting Information

1. The information required under Governmental Accounting Standards Board (GASB) Statements No. 74 and 75 will be issued in separate reports. The following information is provided for informational purposes only.

NUMBER OF ACTIVE AND RETIRED MEMBERS IN RETIREE MEDICAL PLAN AS OF JUNE 30, 2022	
GROUP	NUMBER*
Retirees currently receiving health benefits	41,177
Spouses of retirees currently receiving health benefits	6,661
Terminated employees entitled to benefits but not yet receiving benefits	7,665
Active plan members	<u>70,427</u>
Total	125,930

NUMBER OF ACTIVE AND RETIRED MEMBERS IN LIFE INSURANCE PLAN AS OF JUNE 30, 2022	
GROUP	NUMBER*
Retirees	52,213
Terminated employees	10,573
Active plan members	<u>70,427</u>
Total	133,213

**There were initially 74,785 active members and 10,690 deferred vested members. However, 4,358 active members and 117 deferred vested members were also listed as a retiree and were ultimately valued in their retired status. There were initially 53,761 retired or disabled members in the Life Trust. However, 1,548 were listed multiple times, reflecting different pension benefits earned under multiple roles as an employee.*

Investment Rate of Return on Market Value	(14.96%)	28.17%

Schedule D – Statement of Actuarial Assumptions and Methods

The rates of retirement, disability, mortality, termination, salary increases, and rates of future benefit participation used in the valuation were selected based on the actuarial experience study prepared as of June 30, 2020, submitted to, and adopted by the Board on September 20, 2021. The health care cost trend rates and expected plan costs were determined by the actuary based on recent experience.

VALUATION DATE: June 30, 2022

DISCOUNT RATE: 7.10% per annum, compounded annually for the Health Insurance Trust
7.10% per annum, compounded annually for the Life Insurance Trust

HEALTH CARE COST TREND RATES: Following is a chart detailing health care trend assumptions.

Fiscal Year Ended	Medicare Part B	Medical
2023	1.55%	6.75%
2024	6.23	6.50
2025	7.11	6.25
2026	7.88	6.00
2027	6.82	5.75
2028	6.01	5.50
2029	5.65	5.25
2030	5.74	5.00
2031	5.58	4.75
2032	4.87	4.50
2033	4.62	4.50
2034 and beyond	4.50	4.50

AGE RELATED MORBIDITY: For retirees ages 65 and older, per capita health care costs are adjusted to reflect expected health care cost changes related to age. The increase to the net incurred health care claims is assumed to be:

Participant Age	Annual Increase
65 – 69	3.0%
70 – 74	2.5
75 – 79	2.0
80 – 84	1.0
85 - 89	0.5
90 and over	0.0

Schedule D – Statement of Actuarial Assumptions and Methods

For the retiree health care liabilities of those under age 65, the current premium charged by the Kentucky Employees' Health Plan (KEHP) is used as the base cost and is projected forward using the health care trend assumption. No implicit rate subsidy is calculated or recognized, as the implicit rate subsidy is deemed the responsibility of the KEHP. Under Actuarial Standard of Practice No. 6 (ASOP No. 6), aging subsidies (or implicit rate subsidies) should be recognized, as the differences in health care utilization and cost due to age have been demonstrated and well quantified.

The impact of aging on a valuation's results can be as significant as the use of mortality, trend, and discounting. It has been the long-standing position that the responsibility for compliance with GASB Statement No. 43, when it relates to KEHP implicit subsidies, rests with KEHP, not the System, as the System has no operational authority over KEHP. As such, KEHP implicit subsidies are excluded from the OPEB valuation process of the Retiree Medical Plan. As GASB 74 and 75 prohibit such a deviation from ASOP No. 6, additional consideration to the current treatment of KEHP implicit rate subsidies may be needed in the future. Valuing the KEHP implicit subsidies will increase the actuarial accrued liability for GASB 74 and 75 purposes.

RETIREE MEDICAL PLAN COSTS: Assumed per capita health care costs were based on past experience and trended based on the assumptions. Following are charts detailing retiree per capita assumptions. These amounts include medical, drug, and administrative costs and represent the amount that the System pays as the full contribution amount. An additional \$8.00 per month is paid to the Department of Employee Insurance (DEI) and is not included in the under age 65 costs listed below. For retirees ages 65 and older, the average costs shown are normalized to age 65 and then age adjusted in calculating liabilities.

Monthly Under Age 65 KEHP Full Costs as of January 1, 2023			
Tier Elected	LivingWell CDHP	LivingWell PPO	LivingWell Basic CDHP
Single	\$813.02	\$833.64	\$783.92
Parent Plus	\$1,117.34	\$1,177.30	\$1,078.16
Couple	\$1,608.24	\$1,792.42	\$1,650.78
Family	\$1,794.34	\$1,988.62	\$1,837.42
Family C-R	\$936.90	\$998.02	\$919.72

RETIREE MEDICAL PLAN CONTRIBUTION: The portion of the medical plan premiums paid by participants is composed of a Plan Option Cost, a Time-Specific Adjustment Cost and a Shared Responsibility Cost. Retirees under the age of 65 who do not complete their LivingWell Promise will be charged an additional \$40 per month above the Plan Option Cost detailed below. An additional contribution is required to be paid by retirees under the age of 65 who use tobacco (\$40 for Single or Family Cross-Reference, and \$80 for Parent Plus, Couple or Family).

Monthly Under Age 65 KEHP Plan Option Costs as of January 1, 2023			
Tier Elected	LivingWell CDHP	LivingWell PPO	LivingWell Basic CDHP
Single	\$53.46	\$89.14	\$28.34
Parent Plus	\$137.06	\$254.10	\$67.52
Couple	\$339.34	\$571.76	\$281.42
Family	\$398.92	\$716.64	\$337.68
Family C-R*	\$86.90	\$170.48	\$31.50
Spouse – Single	\$821.02	\$841.64	\$791.92
Spouse – Parent Plus	\$1,126.34	\$1,185.30	\$1,086.16

*Per employee/retiree

Schedule D – Statement of Actuarial Assumptions and Methods

TIME-SPECIFIC ADJUSTMENT PLUS SHARED RESPONSIBILITY COST: The chart below and on the page following are the Time-Specific Adjustment costs paid by Retirees in addition to the Plan Option Costs shown prior.

Abbreviations for Time-Specific Adjustment Charts:

	27 or More	164.90	415.98	774.70	905.08	293.56

CURRENT RETIREE MEDICAL PLAN PARTICIPATION: Actual census data and current plan elections (including waivers) provided by the System were used for those retirees currently participating in the Retiree Medical Plan. Current participants are assumed to maintain their current Retiree Medical Plan coverage until they are no longer eligible.

ANTICIPATED RETIREE MEDICAL PLAN PARTICIPATION: The assumed annual rates of health care plan participation for future retirees are as follows:

Years of Service	Member Participation		
	Entered System Before 7/1/2002	Entered System After 6/30/2002 and Before 7/1/2008	Entered System After 6/30/2008
5-9.99	20%	20%	Not Eligible
10-14.99	40	20	Not Eligible
15-19.99	70	40	40%
20-24.99	90	50	50
25-25.99	90	80	80
26-26.99	90	85	85
27 or more	90	90	90

Schedule D – Statement of Actuarial Assumptions and Methods

ANTICIPATED RETIREE MEDICAL PLAN ELECTIONS: The assumed rates of plan election for future retirees participating in the KEHP plans are provided in the following table. As the assumed plan election rates are estimates and actual results may be materially different, this assumption will need to be revised as experience evolves.

LivingWell CDHP	LivingWell PPO	LivingWell Basic CDHP
56%	41%	3%

SPOUSE COVERAGE IN RETIREE MEDICAL PLAN: Actual census data and current plan elections were used for MEHP and KEHP covered spouses (including beneficiaries) of current retirees. For spouses of future retirees, 30% of future male retirees are assumed to cover their spouse and 25% of future female retirees are assumed to cover their spouse. Male retirees are assumed to be three years older than their spouse and female retirees are assumed to be one year younger than their spouse.

DISABLED DEPENDENT CHILDREN IN RETIREE MEDICAL PLAN: The liability associated with disabled dependent children was determined to be de minimis and was therefore excluded from this valuation.

WITHDRAWAL ASSUMPTION: Future vested members who terminate employment prior to retirement are assumed to elect to withdraw their contributions based upon their age and service at termination of employment as follows:

Rates of Withdrawal Upon Termination of Employment			
Age at Termination of Employment	Years of Service		
	5 - 9	10 - 14	15+
Under Age 55	20%	15%	10%
Ages 55+	10%	10%	10%

All vested members who terminate employment prior to retirement are assumed to elect to withdraw their contributions prior to receiving a pension benefit based upon their service as follows:

Rates of Withdrawal Prior to Receiving a Pension Benefit			
Years of Service			
5 - 9	10 - 14	15 - 26	27+
25%	15%	10%	25%

All vested members who terminate employment prior to retirement and who are assumed to elect to receive a pension benefit are assumed to begin receiving their benefit at age 60.

Schedule D – Statement of Actuarial Assumptions and Methods

SALARY INCREASES: Representative values of the assumed annual rates of future salary increases are as follows and include wage inflation at 2.75% per annum:

Service	Annual Rate
1	7.50%
2	5.50%
3	5.00%
4	5.00%
5	5.00%
6	4.75%
7	4.50%
8	4.25%
9	4.00%
10	4.00%
11	4.00%
12	3.75%
13	3.50%
14	3.50%
15	3.25%
16	3.25%
>=17	3.00%

PAYROLL GROWTH: 2.75% per annum, compounded annually.

PRICE INFLATION: 2.50% per annum, compounded annually.

AFFORDABLE CARE ACT (ACA): The impact of the Affordable Care Act (ACA) was addressed in this valuation. Review of the information currently available did not identify any specific provisions of the ACA that are anticipated to significantly impact results other than plan design features and fees currently mandated by the ACA and incorporated in the plan designs, which are included in the current baseline claims costs. Continued monitoring of the ACA's impact on the Plan's liability will be required.

COVID-19: The impact of the COVID-19 pandemic was considered in this valuation; however, no changes other than healthcare trend adjustments were incorporated at this time due to the level of uncertainty regarding the impact on both plan costs and contribution levels going forward. Given the uncertainty regarding COVID-19 (e.g., the impact of routine care being deferred, direct COVID-19 treatment and prevention costs, changes in contribution and budget projections), continued monitoring of the impact on the Plan's liability will be required.

ASSET VALUATION METHOD: Five-year market related actuarial value, as developed in Schedule B. The actuarial value of assets recognizes a portion of the difference between the market value of assets and the expected actuarial value of assets, based on the ultimate assumed valuation rate of return. The amount recognized each year is 20% of the difference between market value and expected actuarial value. The ultimate assumed valuation rate of return is assumed to be 7.10% for the Health Insurance Trust and 7.10% for the Life Insurance Trust.

Schedule D – Statement of Actuarial Assumptions and Methods

ACTUARIAL COST METHOD: The valuation is prepared on the projected benefit basis, under which the present value, at the interest rate assumed to be earned in the future, of each active member's expected benefit at retirement or death is determined, based on his/her age, service, and gender. The calculations take into account the probability of a member's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his/her terminating with a service, disability or survivor's benefit. The present value of the expected benefits payable on account of the active members is added to the present value of the expected future payments to retired members and beneficiaries and deferred vested members to obtain the present value of all expected benefits payable from the System on account of the present group of members and beneficiaries.

The employer contributions required to support the benefits of the System are determined following a level funding approach, and consist of a normal contribution and an accrued liability contribution.

The normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contribution which, if applied to the compensation of the average new member during the entire period of his/her anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on his/her behalf.

The unfunded actuarial accrued liability is determined by subtracting the present value of prospective employer normal contributions and member contributions, together with the current actuarial value of assets held, from the present value of expected benefits to be paid from the System.

Schedule D – Statement of Actuarial Assumptions and Methods

SEPARATIONS FROM SERVICE: Representative values of the assumed annual rates of death, disability, and withdrawal, are as follows:

Age	Annual Rates for Males				
	Death*	Disability	Withdrawal		
			Years of Service		
			0 – 4	5 – 9	10+
20	0.031%	0.01%	20.00%		
25	0.020	0.01	11.00	3.25%	
30	0.032	0.01	10.00	3.60	2.80%
35	0.042	0.02	11.00	3.60	1.55

Schedule D – Statement of Actuarial Assumptions and Methods

DEATHS AFTER RETIREMENT:

Mortality Assumption: All mortality rates use Pub-2010 benefit-weighted tables.

Mortality Projection: All mortality rates are projected from 2010 using generational improvement with Scale MP-2020 adjusted to 75% of the standard rates.

Service Retirements: Mortality rates are based on the Teachers Mortality Table for Retirees. Rates for male members are set forward 2 years and multiplied by 102%. Rates for female members are set forward 2 years and multiplied by 98%.

Survivors of Deceased Members: Mortality rates are based on the Teachers Mortality Table for Contingent Survivors. Rates for male members are set forward 2 years and multiplied by 101%.

Disabled Members at Retirement: Mortality rates are based on the Teachers Mortality Table for Disabled Retirees. Rates for male members are set forward 1 year and multiplied by 96%. Rates for female members are set back 2 years and multiplied by 94%.

Representative values of the assumed annual rates of death after service retirement, disability retirement, and survivors of deceased members are shown below:

Age	Annual Rate of Death After*					
	Service Retirement		Disability Retirement		Survivors of Deceased Members	
	Male	Female	Male	Female	Male	Female

Schedule E – Summary of Main Plan Provisions

AS INTERPRETED FOR VALUATION PURPOSES

ELIGIBILITY FOR ACCESS TO RETIREE MEDICAL PLAN COVERAGE:

Service Retirement:

Members Before 7/1/2008	Completion of 27 years of service, or Attainment of age 55 and 5 years of service
Members on and after 7/1/2008 And Before 1/1/2022	Completion of 27 years of service, or Attainment of age 55 and 10 years of service, or Attainment of age 60 and 5 years of service
Members on and after 1/1/2022	Attainment of age 57 and 10 years of service, or Attainment of age 65 and 5 years of service

For employees hired prior to July 1, 2008, Retiree Medical Plan coverage eligibility is attained when an employee retires, as described above. All other employees must be eligible to retire and additionally have completed a minimum of 15 years of service to be eligible for Retiree Medical Plan coverage.

Disability Retirement: Disabled employees hired prior to July 1, 2008 with at least 5 years of service, who are totally and permanently incapable of being employed as a teacher, are eligible for Retiree Medical Plan coverage upon approval for TRS disability retirement benefits. Disabled employees hired after July 1, 2008 must have 15 years of service to be eligible for Retiree Medical Plan coverage upon approval for TRS disability retirement benefits.

Members and dependents under age 65 and eligible for Medicare due to a disability after January 1, 2013 are only eligible to enroll in the MEHP. Under age 65 members who retired prior to January 1, 2013, are grandfathered from this requirement and allowed a choice of KEHP or MEHP coverage. Actual census data and current plan elections were used for current disabled retirees. All future disabled members under the age of 65 with Medicare are placed on the MEHP and not the KEHP. This has been consistently applied since 2013.

Survivors: Spouses of employees who die in service while eligible to retire, as well as survivors of service and disabled retirees, are eligible for Retiree Medical Plan coverage if elected within 30 days of the employee's/retiree's death with no future remarriage. Otherwise, survivor is not eligible for Retiree Medical Plan coverage.

Spousal Shared Risk Waiver for MEHP: Beginning in 2013, eligible spouses who waive the MEHP coverage will no longer have the opportunity to enroll during any annual MEHP open enrollment, so most spousal waivers on the MEHP are now permanent waivers unless a TRS specific qualifying event is met. This does not apply to the KEHP. This MEHP eligibility rule became necessary to mitigate spousal adverse selection with zero premium Medicare Advantage plans on the individual and open market.

Termination: For employees hired prior to July 1, 2008 and who terminated with at least 5 years of service, Retiree Medical Plan coverage is assumed to begin at age 60. For employees hired on or after July 1, 2008 and who terminated with at least 15 years of service, Retiree Medical Plan coverage is assumed to begin at age 60.

Reemployed Retirees: Effective January 1, 2019 and because of the Affordable Care Act (ACA) and Medicare secondary payer (MSP) federal rules, if a TRS retiree returns to work and is offered the same health insurance coverage as any full time employee (whether the KEHP, MEHP, or another plan), then the member must waive coverage through TRS. For valuation purposes, active employees identified as currently receiving retiree health care through the System are valued as retirees. Retirees making active contributions into a second account do not qualify for insurance on that second account.

Schedule E – Summary of Main Plan Provisions

COVERED MEMBER RETIREE MEDICAL PLAN CONTRIBUTIONS:

Under Age 65 Retiree Shared Responsibility Contribution: Effective July 1, 2010, retirees under the age of 65 began a three-year phase-in of the Shared Responsibility Contribution. This contribution reduces the applicable amount of the full contribution provided by the System to retirees, by adjusting the Shared Responsibility Contribution amount by 100% less the appropriate percentage from the Retiree Percentage Contribution table below. Effective July 1, 2012, the full Shared Responsibility Contribution equals the Standard Medicare Part B premium paid by retirees ages 65 and older.

Monthly Under Age 65 Shared Responsibility Contribution Timeline			
Effective Date	Medicare Part B Monthly Cost	Formula	Shared Responsibility Contribution
July 1, 2010	\$110.50	$(1/3 \times \$110.50)$	\$ 37.00
January 1, 2011	115.40	$(1/3 \times 115.40)$	39.00
July 1, 2011	115.40	$(2/3 \times 115.40)$	77.00
January 1, 2012	99.90	$(2/3 \times 99.90)$	66.00
July 1, 2012	99.90	99.90	99.90
January 1, 2013	104.90	104.90	104.90
January 1, 2014	104.90	104.90	104.90
January 1, 2015	104.90	104.90	104.90
January 1, 2016	121.80	121.80	121.80
January 1, 2017	134.00	134.00	134.00
January 1, 2018	134.00	134.00	134.00
January 1, 2019	135.50	135.50	135.50
January 1, 2020	144.60	144.60	144.60
January 1, 2021	148.50	148.50	148.50
January 1, 2022	170.10	170.10	170.10
January 1, 2023	164.90	164.90	164.90

Retiree Years of Service Percentage Contribution: Retirees contribute the following percentages based on years of service at retirement, which are then applied to the Retiree Contribution Rate Basis:

Retiree Percentage Contribution*				
Year of Service	Entered System Before 7/1/2002		Entered System After 6/30/2002 and Before 7/1/2008	Entered System After 6/30/2008
	Age 65 or Older and Covered Before 1/1/2005	Age 65 After or Covered After 12/31/2004		
5 – 9.99	30%	75%	90%	Not Eligible
10 – 14.99	20	50	75	Not Eligible
15 – 19.99	10	25	55	55%
20 – 24.99	0	0	35	35
25 – 25.99	0	0	10	10
26 – 26.99	0	0	5	5
27 or more	0	0	0	0

*0% for disabled retirees that retired prior to 1/1/2002

Schedule E – Summary of Main Plan Provisions

COVERED MEMBER RETIREE MEDICAL PLAN CONTRIBUTIONS (CONTINUED):

For 2023, the TRS Board of Trustees approved a single contribution amount of up to \$759.56. TRS will contribute this amount towards insurance costs, less the Shared Responsibility cost of \$164.90. Under-65 retirees who are not Medicare eligible and continue on the Kentucky Employees' Health Plan (KEHP) are responsible for the remaining costs left from the total premium costs. The total premium costs are shown below.

Monthly Full Costs Effective January 1, 2023				
Tier Elected	Under Age 65 (KEHP)*			Ages 65 and Older (MEHP)
	LivingWell CDHP	LivingWell PPO	LivingWell Basic CDHP	
Single	\$813.02	\$833.64	\$783.92	\$217.00
Parent Plus	1,117.34	1,177.30	1,078.16	n/a
Couple	1,608.24	1,792.42	1,650.78	n/a
Family	1,794.34	1,988.62	1,837.42	n/a
Family C-R	936.90	998.02	919.72	n/a

* Does not include the additional contribution required to be paid by retirees under the age of 65 who use tobacco (\$40 for Single or Family Cross-Reference, and \$80 for Parent Plus, Couple or Family). Also, this does not include the additional contribution required to be paid by retirees under the age of 65 who do not complete their LivingWell Promise, which is an additional \$40 per month for all levels of coverage—single, parent +, couple, and family. Approximately 1,500 retirees across all four KEHP plans did not complete their LivingWell Promise for 2019. The additional contribution for these retirees will begin in 2020. For valuation purposes, it is conservatively assumed that, over time, 100% of KEHP retirees will complete their LivingWell Promise. This assumption will be monitored in future experience studies.

Spouse Contributions: 100% of the full cost for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the State. Neither the State nor TRS will pay any subsidy for family style coverage.

Survivors: Spouses of employees who die in service while eligible to retire, as well as survivors of service and disabled retirees, are eligible for Retiree Medical Plan coverage if elected within 30 days of the employee's/retiree's death with no future remarriage. Otherwise, survivor is not eligible for Retiree Medical Plan coverage.

Spousal Shared Risk Waiver for MEHP: Beginning in 2013, eligible spouses who waive the MEHP coverage, will no longer have the opportunity to enroll during any annual MEHP open enrollment so most spousal waivers on the MEHP are now permanent waivers unless a TRS specific qualifying event is met. This does not apply to the KEHP. This MEHP eligibility rule became necessary to mitigate spousal adverse selection with zero premium Medicare Advantage plans on the individual and open market.

Monthly Surviving Spouse Contribution Effective January 1, 2023				
Tier Elected by Surviving Spouse	Under Age 65 (KEHP)			Ages 65 and Older (MEHP)
	LivingWell CDHP	LivingWell PPO	LivingWell Basic CDHP	
Single	\$821.02	\$841.64	\$791.92	\$217.00
Parent Plus	1,125.34	1,185.30	1,086.16	n/a

Schedule E – Summary of Main Plan Provisions

SYSTEM RETIREE MEDICAL PLAN CONTRIBUTIONS: The System Contribution Rate Basis is determined annually by the System, and the full cost is projected based on historical claims data. For retirees, the following percentages are based on years of service at retirement and are then applied to the System Contribution Rate Basis:

Percentage of System Contribution Rate Provided to Retirees*				
Year of Service	Entered System Before 7/1/2002		Entered System After 6/30/2002 and Before 7/1/2008	Entered System After 6/30/2008
	Age 65 or Older and Covered Before 1/1/2005	Age 65 After or Covered After 12/31/2004		
5 – 9.99	70%	25%	10%	Not Eligible
10 – 14.99	80	50	25	Not Eligible
15 – 19.99	90	75	45	45%
20 – 24.99	100	100	65	65
25 – 25.99	100	100	90	90
26 – 26.99	100	100	95	95
27 or more	100	100	100	100

*100% for disabled retirees that retired prior to 1/1/2002

ACTIVE MEMBER RETIREE MEDICAL PLAN CONTRIBUTIONS: Actively employed members make payroll contributions to the Health Insurance Trust based upon the following schedule:

Active Member Percentage of Payroll Contribution Made to Health Insurance Trust								
University Employees			School District Employees (Non-Federal)			Other Employees		
Hired before 7/1/08	Hired on/after 7/1/08 and before 1/1/22	Hired on/after 1/1/22	Hired before 7/1/08	Hired on/after 7/1/08 and before 1/1/22	Hired on/after 1/1/22	Hired before 7/1/08	Hired on/after 7/1/08 and before 1/1/22	Hired on/after 1/1/22
2.775	2.775	2.775	3.750	3.750	3.750	3.750	3.750	3.750

Schedule E – Summary of Main Plan Provisions

LIFE INSURANCE PLAN BENEFITS:

(1) Effective July 1, 2000, the Teachers' Retirement System shall:

- (a) Provide a life insurance benefit in a minimum amount of five thousand dollars (\$5,000) for its members who are retired for service or disability if hired prior to January 1, 2022. Provide a life insurance benefit in a minimum amount of ten thousand dollars (\$10,000) for its members who are retired for service or disability if hired on or after January 1, 2022. This life insurance benefit shall be payable upon the death of a member retired for service or disability to the member's estate or to a party designated by the member on a form prescribed by the retirement system; and
- (b) Provide a life insurance benefit in a minimum amount of two thousand dollars (\$2,000) for its active contributing members if hired prior to January 1, 2022. Provide a life insurance benefit in a minimum amount of five thousand dollars (\$5,000) for its active contributing members if hired on or after January 1, 2022. This life insurance benefit shall be payable upon the death of an active contributing member to the member's estate or to a party designated by the member on a form prescribed by the retirement system.

Note: Members employed on a substitute or part-time basis and working at least 69% of a full contract year in a single fiscal year will be eligible for a life insurance benefit for the balance of the fiscal year or the immediately succeeding fiscal year under certain conditions. For non-vested members employed on a substitute or part-time basis, the life insurance benefit is provided if death occurs as the result of a physical injury on the job. For vested members employed on a substitute or part-time basis, death does not have to be the result of a physical injury on the job for life insurance benefits to be provided.

*Reflects members, spouses, and beneficiaries participating in a health care plan.

**Includes spouses, beneficiaries, and surviving spouses.

**TABLE 6
SCHEDULE OF RETIRANTS, BENEFICIARIES AND SURVIVORS ADDED TO AND REMOVED FROM ROLLS***

Life Insurance Trust								
Fiscal Year Ending June 30	Number Added to Rolls	Life Insurance Benefit (\$1,000's)	Number Removed from Rolls	Life Insurance Benefit (\$1,000's)	Number on Rolls at the End of the Year	Life Insurance Benefit (\$1,000's)	Increase in Life Insurance Benefit	Average Life Insurance Benefit
2014	1,964	9,820	954	4,770	44,855	224,275	2.30 %	5,000
2015	2,270	11,350	1,641	8,205	45,484	227,420	1.40	5,000
2016	2,394	11,970	807	4,035	47,071	235,355	3.49	5,000
2017	2,175	10,875	1,021	5,105	48,225	241,125	2.45	5,000
2018	2,605	13,025	1,408	7,040	49,422	247,110	2.48	5,000
2019	2,226	11,130	210	1,050	51,438	257,190	4.08	5,000
2020	2,003	10,015	1,179	5,895	52,262	261,310	1.60	5,000
2021	1,886	9,430	2,417	12,085	51,731	258,655	(1.02)	5,000
2022	2,213	11,065	1,731	8,655	52,213	261,065	0.93	5,000

*The life insurance benefit is payable upon the death of only members retired for service or disability. Numbers do not include life insurance benefits payable upon the death of an active contributing member. There were initially 53,761 retired or disabled members. However, 1,548 were listed multiple times, reflecting different pension benefits earned under multiple roles as an employee. Beginning with the June 30, 2021 valuation date, the counts in the exhibit above reflect all adjustments, which resulted in a larger number removed from rolls. Prior to June 30, 2021, the exhibit reflected the initial member counts.

Schedule G – Health Insurance Trust Sensitivity Analysis

The June 30, 2022 valuation results of the Health Insurance Trust (health trust) are projections based on the actuarial assumptions. Actual experience will differ from these assumptions, either increasing or decreasing cost. The charts on the following pages provide a simple analysis on how the costs are sensitive to changes to the assumed discount rate, the assumed inflation rate, the assumed rate of payroll growth, and the assumed rates of health care inflation (trend). The charts show the actuarial accrued liability, the unfunded liability, the funded ratio, and the employer contribution rate under the following scenarios:

- The discount rate assumption sensitivity analysis shows the valuation results with the baseline discount rate assumption, 7.10%, together with a decrease in the discount rate to 6.10% and an increase in the discount rate to 8.10%. Under this scenario, the underlying inflation rate assumption is held constant at 2.50% and the payroll growth assumption is held constant at 2.75%.
- The inflation assumption sensitivity analysis shows the valuation results with the baseline underlying inflation rate assumption, 2.50%, together with decreases in the inflation rate to 2.25% and 2.00%. Under this scenario, the decrease in the underlying inflation rate assumption leads to corresponding decreases in the discount rate, the payroll growth assumption, the assumed rates of salary increase for active members, and the ultimate health care trend.
- The wage inflation assumption sensitivity analysis shows the valuation results with the baseline underlying payroll growth assumption, 2.75%, together with decreases in the wage inflation assumption to 1.25% and 0.00%. Under this scenario, all other assumptions, including the individual member salary scale, are held constant so that the only impact is in the amortization of the unfunded liability, leading to higher employer contribution rates.
- The health care inflation (trend) assumption sensitivity analysis shows the valuation results with the baseline trend assumption along with a 1.00% increase in all assumed trend rates and a 1.00% decrease in all assumed trend rates.

Schedule H – Life Insurance Trust Sensitivity Analysis

The June 30, 2022 valuation results of the Life Insurance Trust (life trust) are projections based on the actuarial assumptions. Actual experience will differ from these assumptions, either increasing or decreasing cost. The charts on the following pages provide a simple analysis on how the costs are sensitive to changes to the assumed discount rate, the assumed inflation rate, and the assumed rate of payroll growth. The charts show the actuarial accrued liability, the unfunded liability, the funded ratio and the employer contribution rate under the following scenarios. Please note that we maintain a minimum total employer contribution rate of 0.08% for all scenarios except the 1% increase in the discount rate scenario:

- The discount rate assumption sensitivity analysis shows the valuation results with the baseline discount rate assumption 7.10%, together with a decrease in the discount rate to 6.10% and an increase in the discount rate to 8.10%. Under this scenario, the underlying inflation rate assumption is held constant at 2.50% and the payroll growth assumption is held constant at 2.75%.
- The inflation assumption sensitivity analysis shows the valuation results with the baseline underlying inflation rate assumption, 2.50%, together with decreases in the inflation rate to 2.25% and 2.00%. Under this scenario, the decrease in the underlying inflation rate assumption leads to corresponding decreases in the discount rate, the payroll growth assumption, and the assumed rates of salary increase for active members.
- The wage inflation assumption sensitivity analysis shows the valuation results with the baseline underlying wage inflation assumption, 2.75%, together with decreases in the wage inflation assumption to 1.25% and 0.00%. Under this scenario, all other assumptions, including the individual member salary scale, are held constant so that the only impact is in the amortization of the unfunded liability, leading to higher employer contribution rates.

Schedule I – Health Insurance Trust 30-Year Baseline Projection

The results of actuarial valuations are a “snapshot” of the financial position on the valuation date, based on the assumed number of active employees and current beneficiaries. Projections simulate future actuarial valuation results over a forecast period (thirty years in this case) by “creating” future new hires and performing valuations using the projected membership. The following items are assumed for the projected results provided on the following page.

- Active Employee Growth Rate: 0.00%
- Valuation Discount Rate: 7.10%
- Investment Rate of Return: 7.10% each year
- Actuarial Value of Assets: 5-year smoothing, No Corridor
- Amortization Method: Level Percent of Payroll, Closed
- Amortization Period: 18-year period as of Valuation Date
- Future Contributions: Based on the contribution rates defined in statute

All other demographic and economic changes are assumed to occur in accordance with the actuarial assumptions used for the actuarial valuation.

Schedule I – Health Insurance Trust 30-Year Baseline Projection

Projections assume all actuarial assumptions are met and do not include any adjustment for adverse experience due to COVID-19 (either impacting claims or demographics), changes in the ACA, larger than expected increases to Medicare Advantage premiums, or lower than expected investment return or payroll growth.

Schedule J – Life Insurance Trust 30-Year Baseline Projection

The results of actuarial valuations are a “snapshot” of the financial position on the valuation date, based on the assumed number of active employees and current beneficiaries. Projections simulate future actuarial valuation results over a forecast period (thirty years in this case) by “creating” future new hires and performing valuations using the projected membership. The following items are assumed for the projected results provided on the following page.

- Active Employee Growth Rate: 0.00%
- Valuation Discount Rate: 7.10%
- Investment Rate of Return: 7.10% each year
- Actuarial Value of Assets: 5-year smoothing, No Corridor
- Amortization Method: Level Percent of Payroll, Closed
- Amortization Period: 22-year period as of Valuation Date
- Future Contributions: Based on Expected Actuarially Determined Contributions (not less than 0.08%)

All other demographic and economic changes are assumed to occur in accordance with the actuarial assumptions used for the actuarial valuation

Schedule J – Life Insurance Trust 30-Year Baseline Projection

(Dollar amounts in \$1,000s)

Valuation Year	Contribution Fiscal Year	Non-University Payroll (1)	University Payroll (2)	Total Payroll (3)	Unfunded Accrued Liability (4)	Funding Ratio (5)	Actuarially Determined Contribution in Dollars (6)
2022	2025	\$3,845,198	\$188,311	\$4,033,509	\$22,271	81.3%	\$3,345
