# Introductory Section

# Letter of Transmittal

December 16, 2024

Dear Trustees and Members:

It is my pleasure to submit the 84th Annual Comprehensive Financial Report (ACFR) of the Teachers' Retirement System of the State of Kentucky (TRS), a component unit of the Commonwealth of Kentucky, for the fiscal years ended June 30, 2024, and 2023.

The accompanying reports from the independent auditor and the consulting actuary substantiate the financial integrity and the actuarial soundness of TRS.

Allow me to begin this transmittal letter with my thanks for the support of our elected officials for continuing to fully fund the retirement system for Kentucky's teachers. With their help, we are in the seventh consecutive year of full pension funding for TRS of the actuarially determined employer contribution (ADEC). The importance of the consistent full funding of the retirement plan for Kentucky's teachers cannot be overstated. The funded ratios of the two major funds, as determined by the independent actuary, both improved in the year concluded June 30, 2024. The Retirement Annuity Trust funded ratio was 59.1% compared to 58.6% a year earlier and was the sixth gain in the last eight years. The Health Insurance Trust reached 80.4% from 71.3% a year before, continuing the gains seen since the 2010 Shared Responsibility law (2010 RS HB 540). The Health Insurance Trust has gained every year since the 2010 Shared Responsibility law (2010 RS HB 540) with the exception of one year when an experience study was implemented. Both funds, in the opinion of the actuary, continue to be on track for full funding within the amortization period for each.

As of June 30, 2024, TRS's total funds were, according to the independent auditor, \$29.53 billion, a \$2.45 billion improvement from a year ago.

TRS produced this annual report, which is required by state law and contains the system's annual audit and actuarial valuations, that provides the information necessary for anyone to better understand TRS, which is the largest financial institution in the state. This report contains numerous examples of how retirement security for Kentucky teachers is being provided at a low cost and with a great economic benefit for those educators and the state's businesses. Many of the retirement dollars are spent in Kentucky across all 120 counties by the 87% of retirees who live here and receive 90% of the annuity benefits paid by TRS. TRS paid \$2.62 billion in total benefits (retirement, health insurance, etc.) during the fiscal year.

This report conforms with the principles of governmental accounting and generally accepted accounting principles. Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with TRS management. To the best of management's knowledge and belief, the enclosed data is accurate in all material aspects and reported in a manner designed to present fairly the financial position and results of operations of TRS for the years ended June 30, 2024, and 2023. Discussion and analysis of net assets and related additions and deductions are presented in Management's Discussion and Analysis in the report's Financial Section.

Management is responsible for maintaining a system of internal controls to establish reasonable assurance that assets are safeguarded, transactions are executed accurately, and financial statements are presented fairly. Limits are inherent in all internal control systems based on the recognition that the costs of such systems should be related to the benefits to be derived. Management believes TRS's controls provide the appropriate balance. The internal controls system includes policies, procedures and an internal audit department reporting to the Board of Trustees.

#### **Profile of TRS**

TRS began operations on July 1, 1940, as a cost-sharing, multiple-employer defined benefit plan. The primary purpose of the plan is to provide retirement benefits, including an annuity and retiree health insurance coverage, for education professionals working for local school districts and other public educational agencies in the state.

TRS closed the 2024 fiscal year with 76,014 active members and 60,358 retirees. From the \$2.62 billion paid in total benefits, the average annuity is \$41,384 and, for most TRS retirees, replaces Social Security. TRS usually provides a higher benefit with a comparable normal cost to the federal program. TRS is an independent agency and instrumentality of the commonwealth. The 11-member Board of Trustees is committed to managing retirement system funds in a prudent, professional manner. In this vein, the actions of the board in recent years have resulted in a reduction of more than \$8 billion in liabilities for the state through decisions related to investing and the implementation of the Shared Responsibility solution that prefunded retiree health care.

An annual operating budget is prepared for the administration of the retirement system and approved by the board. Budget requests also are submitted to the General Assembly for adoption. The agency's administrative expenses, which are among the lowest of U.S. public pension plans, are paid from TRS's investment earnings.

The plan is described in the Notes to Financial Statements in the Financial Section of this report. Also, the Summary of Main System Provisions as Interpreted for Valuation Purposes in the Actuarial Section is useful in understanding benefit and contribution provisions.

Professional consultants are appointed by the board to perform essential services for TRS's effective and efficient operation. Reports from the board's independent auditor and independent actuary are enclosed in this ACFR. TRS's consultants are listed in the Additional Supporting Schedules of the Financial Section and in the Investment Section's Professional Service Providers table and Health Insurance Trust Professional Service Providers table.

#### **Major Initiatives**

TRS is efficient, effective and always working to improve the retirement security of Kentucky's teachers. The highest levels of professionalism, integrity, performance and teamwork are required at all levels. The latest affirmation of this, elaborated upon later in this letter, came with the clean independent annual audit that resulted in no findings.

During the year, TRS continued several major initiatives concerning funding, investments, benefit administration and cost containment.

#### Personalized Medicine

Possibly the initiative that continues best to fit all the previously mentioned goals is TRS's leading-edge personalized medicine program that uses a DNA test to improve the wellness of retirees. The program begun in 2017 now has more than 12,700 enrollees, most of whom are in the Medicare Eligible Health Plan (MEHP). This pharmacogenomics program focuses on making sure that a retiree's medications are safe and will be beneficial from the beginning, avoiding traditional medicine's costly and sometimes harmful trial-and-error process without the benefit of the DNA information. This has resulted in reductions in medical spending and hospitalizations for those involved. Vital to the project is the link between retirees and doctors provided by the pharmacists of the Know Your Rx Coalition (KYRx), which works with the scientific partner in the program, Coriell Life Sciences. The coalition, a purchasing collaborative founded with TRS, reduces costs for members like TRS while providing personal service to customers. Initial Personalized Medicine results have shown widespread acceptance by prescribing physicians, reductions in medical spending for those involved and reductions in hospitalization and outpatient visits. This program has been expanded to include testing for a specific gene that recently was discovered can help detect a rare, but potentially severe, reaction to some cancer medications.

#### Retiree Health Care

Kentucky continues to be a national leader in prefunding retiree health care benefits as a result of the Shared Responsibility solution enacted in 2010 through the collective efforts of the board, the education community and elected officials. The plan immediately eliminated \$3.1 billion in actuarial liability from the retired teacher health care plan. Combined with other cost control measures, more than \$5 billion in actuarial accrued liability has been eliminated from the Health Insurance Trust. In more than a decade, the health insurance fund has achieved an 80.4% funded ratio compared to pay-as-you-go status before the law. This remarkable improvement confirms that the health insurance fund is well positioned if all statutory contributions are received and other assumptions are realized. Shared Responsibility's success for the retirement security of current and future retired teachers is a national model. It should be noted that the funded level also has benefited from prescription medication rebates and subsidies that were not anticipated at the outset of Shared Responsibility. If these rebates and subsidies that are in addition to Shared Responsibility contributions are lost, the full funding of the trust – currently projected to be in about four years - could be pushed beyond 2050, according to the actuary.

Beyond Shared Responsibility, the board regularly reviews the health care plan to contain costs and maintain a meaningful benefit for retired teachers. The 2007 move to Medicare Advantage continues to be stable and financially feasible for TRS's retirees and the medical plan.

Cost-saving initiatives have included moving the TRSsponsored Medicare Part D Employer Group Waiver drug plan from fully insured to a self-funded plan to achieve the greatest federal subsidies. Additionally, as referenced previously, TRS is part of KYRx, which it joined in 2012. Through the coalition, TRS saves money leveraging greater prescription purchasing power, obtaining deeper drug discounts and increasing the rate at which prescriptions

## **INTRODUCTORY SECTION**

were filled with generic drugs to 90% for the fiscal year compared to 73% in 2012. Additionally, coalition pharmacists work with retired teachers and their physicians to maximize prescription dollars for the retiree and TRS, including supporting the personalized medicine program.

These successful efforts, including cost containment measures by staff, allow affordable retiree health care to continue being provided to retirees with premiums at the same levels they were at 20 years ago.

#### Investing

With a 12.27% year-over-year investment return, the longterm track record for the TRS investment program remains strong, outperforms average plans and provides income that aids progress toward full funding.

From 2008 to June 2024, TRS investment returns resulted in net assets of \$26.1 billion, compared to the average plan's \$20 billion. This outperformance has generated \$6.1 billion to the benefit of Kentucky's teachers and all taxpayers.

For the most recent year, as mentioned, the retirement annuity gained 12.27% while the health trust gained 12.73%, both gross of fees.

As of June 30, 2024, TRS achieved top decile performance for the year and decade and near-top decile for the five-year period (as ranked by Aon covering public plans with assets over \$1 billion). The 10-year return was 7.94% for the annuity trust, while the Health Insurance Trust saw a 7.45% gain for the same timeframe.

This performance — overseen by the board and its Investment Committee and managed by the TRS investment team, all working on teachers' behalf — is important because investment income provides about two thirds of annuity payments made by TRS. Also as noted earlier, these TRS annuities bolster Kentucky's economy as retirees cover the expenses of daily life in the state's cities and towns. The consistent contributions from members and employers are the cornerstone of these investments that provide the benefits upon which retired teachers rely.

This report's Investment Section includes asset allocations, target ranges, market environment discussion and historical performance schedules.

According to KRS 161.430, the board is responsible for investing TRS's assets. The board delegates investment authority to the Investment Committee. The committee works closely with experienced investment managers and TRS's professional staff in evaluating and selecting investment allocations. The board's investment objectives ensure funds are invested solely in the interest of TRS's members and that investment income is used exclusively to provide benefits to the members and their beneficiaries with reasonable expenses in administering the plan and its trust funds. The investment program also provides a reasonable rate of return with a major emphasis being placed on the protection of the invested assets.

TRS regularly obtains independent reviews and always seeks to improve its investment program and continue the tradition of adhering to best governance practices that lead to reasonable investment returns.

A multiyear program of diversifying the portfolio continued in line with TRS's focus on investment fundamentals, including controls on risk and costs. These efforts are a continuation of a disciplined investment process and longterm focus on retirement security. This focus has generated exceptionally stable returns through TRS's history, and management has every confidence this will continue. TRS's investment program continues to be recognized as a leader in the public pension community for governance structure, trustee education and cost effectiveness.

The year ended June 30, 2024, was characterized by strong equity markets in the final three quarters. Declining long-term interest rates and tightening credit spreads drove U.S. stocks to records as the year closed. Consumers saw stabilizing inflation end the fiscal year at 3% while the economy created over 210,000 jobs per month. The lower interest rates helped push domestic equity up 24.6% and non-domestic up 12.2%, despite uncertainty from conflicts in Ukraine and the Middle East and the U.S. presidential election.

With the understanding that a one-year period is not determinative for a long-term investor like TRS, the performance for longer periods continues TRS's historical record of top-tier performance. Moreover, during the last 30 years, TRS retirement annuity investment returns of 8.1% have bettered the 7.1% assumed rate of return. Net returns, as well, exceeded assumed rates for the annuity and health insurance trusts over the standard measuring periods of one, five and 10 years for both trusts and 20 years for the retirement trust. This record validates policy changes by the board and implemented by the Investment Committee over the last several years. TRS's commitment to best practices, stringent risk controls and emphasis on fundamentals in investing helps ensure long-term retirement security for Kentucky's teachers.

TRS's investment portfolio experienced an increase in fair value during the fiscal year to \$29.03 billion from \$26.44 billion a year ago. The increase was the result of market

conditions and employer and employee contributions of \$1.95 billion that added to the portfolio.

The gross investment gain for all funds was \$3.29 billion. The net appreciation in fair value of investments was \$2.68 billion compared to \$2.1 billion the prior year.

#### Legislation

During the 2024 regular session, TRS monitored legislation that directly and indirectly impacted TRS, including Senate Bill 188 exempting the TRS Medicare Eligible Health Plan from restrictions that could have increased the cost of the prescription benefit for retirees.

The Executive Branch Budget (2024 RS House Bill 6), which is for the 2024-26 biennium, provides TRS full retirement annuity funding. This consists of about \$1.88 billion in total for the biennium, including the full \$1.75 billion requested in additional funding to address the unfunded retirement annuity liability. The budget represents the seventh and eighth years of full funding for the retirement annuity, with two years of nearly full funding immediately preceding the current streak. This era of additional required funding being provided reversed a roughly decade-long period where the funding was not provided.

Separately, House Bill 1 appropriated \$40 million from the budget reserve trust fund to be applied to the unfunded actuarially accrued liability of the annuity trust.

#### Benefits Administration

Benefits for retirees are determined by the member's date of entry in TRS. For convenience, TRS uses four designations for these account types. TRS 1 consists of members who entered before July 1, 2002. TRS 2 consists of members who entered on or between July 1, 2002, and June 30, 2008. TRS 3 consists of members who entered on or between July 1, 2008, and Dec. 31, 2021. TRS 4 consists of members who began on or after Jan. 1, 2022. The designations are used throughout this report.

The year included the ongoing administration of the TRS 4 hybrid retirement plan. The plan is designed for the board to use risk controls to address any unfunded liability that could develop, limiting the state's responsibility to the payment of fixed statutory contributions.

#### Internal and External Reviews and Recognition

Independent outside reviews of the retirement system by auditors, the Public Pension Coordinating Council and the Government Finance Officers Association provide the board and TRS staff with important feedback.

TRS responds to legislative and executive inquiries and mandates throughout the year. In connection with pension legislation, TRS received — and responded to — numerous requests from legislators, the executive branch, constituent groups and others to provide accurate information about TRS. Many of these involved presentations to the Public Pension Oversight Board (PPOB) and General Assembly committees. Subjects included quarterly investment-return and cash-flow updates; sensitivity analyses, the use of sick leave in retirement, the biennial budget request; and annual valuations from the actuary.

The independent review of TRS by the Office of the Auditor for Public Accounts resulted in a clean audit that had no findings. The auditor issued an unqualified opinion on TRS's financial statements for the fiscal years ended June 30, 2024, and 2023.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded TRS the Certificate of Achievement for Excellence in Financial Reporting for its ACFR for the year ended June 30, 2023. The certificate is a prestigious award recognizing conformance with the highest standards for preparation of state and local government financial reports.

To be awarded a one-year Certificate of Achievement, a government unit must publish an easily readable and efficiently organized annual comprehensive financial report, whose contents conform to program standards. Such ACFRs must satisfy both generally accepted accounting principles and applicable legal requirements.

TRS has received the certificate for 36 consecutive years (fiscal 1988-2023). TRS believes the current report, which is being submitted to GFOA, continues to conform to the Certificate of Achievement program requirements.

The Public Pension Coordinating Council (PPCC) recognized TRS with the Public Pension Standards Award for Funding and Administration for 2024. The award is based on compliance with principles judged to underlie exemplary retirement system achievements in the areas of benefits, actuarial valuation, financial reporting, investments, funding and disclosure. Those principles are acknowledged widely to be marks of excellence in the public pension industry.

The PPCC is a coalition of three national associations that represent public retirement systems and administrators. Combined, these associations serve retirement systems that provide pension coverage for most of the nation's 18 million employees of state and local government. The associations that form the PPCC are the National Association of State Retirement Administrators, the National Council on Teacher Retirement and the National Conference on Public Employee Retirement Systems.

# **INTRODUCTORY SECTION**

#### Information Technology

Pathway — TRS's information technology system that allows members secure online access to account information anytime from anywhere — continued to be successful as TRS maintained and refined the system throughout the year. This included continued use of multifactor authentication.

#### Communications and Outreach

TRS strives to treat every member fairly, with respect and dignity, and to foster a personal affinity for this system that is theirs. This is a culture that underpins communications and outreach efforts and has been in place for many years. In the fiscal year, TRS continued to reach members in a variety of methods as staff members, including me, delivered communications to members, retirees, the education community, political leaders and the public regarding the value of TRS.

On social media, TRS continued using Facebook and Twitter accounts to communicate information about the system on a timelier basis. Since its beginning, the Facebook account has 5,323 followers and posts that often reach more than 1,000 users — led this past year by more than 6,000 users who saw a post about full funding in the current biennial budget. Facebook posts during the fiscal year were viewed more than 50,000 times. Posts on X (formerly Twitter) were viewed more than 10,200 times.

TRS Kentucky YouTube traffic for videos, on a variety of member benefits and retiree insurance issues, reached more than 6,200 views, with more than a third of those being for a how-to explanation about enrolling in the Medicare-eligible health plan along.

Also, TRS continued seminar offerings for members. Member services webinars hosted hundreds of members in live broadcasts and views of recordings. This is in addition to speaking to hundreds interested in TRS at meetings of constituency groups.

Use of mass email continued to communicate about a host of operations. More than 285,000 emails were delivered representing a rate of 92% and with 48.4% opened. Of the 285,000, only 115 resulted in someone unsubscribing and only 15 were marked spam.

Finally, the 16 TRS counselors met with members in response to 7,468 meeting requests, and 29,606 retirement estimates were provided, including 19,774 created by counselors.

#### General Administration

TRS continued for the sixth year the option of electronic voting in trustee elections using Pathway. This has been the most significant change in the method of voting since the

first election in 1939. Ballots cast electronically were the second highest ever at 1,655 compared to 1,759 the year before, 1,601 the fourth year, 1,411 the third year, 1,113 the second year and 308 the first year.

Also, TRS continued voting through Pathway in December for the Member Nominating Committee that met early this year for the trustee election.

#### **Funding Progress**

#### Retirement Annuity Trust

Teachers saw the continued benefits of increased funding by the state. The current fiscal year marks the beginning of the fourth biennium of full funding for the annuity trust, following nearly full funding in the 2016-2018 biennium. These marked the first full funding in a decade.

Financial and actuarial reports show, thanks to funding and investment returns, that the fiduciary net position of all TRS funds has improved \$10.81 billion from a decade ago.

Based on board recommendations, the General Assembly establishes, by statute, the contribution levels that are to be made by members and employers to fund TRS's liabilities. Each year, an independent actuary performs a valuation to determine whether the current levels of contribution will be sufficient to cover the cost of benefits earned by members.

From fiscal 2009 through fiscal 2018, the state had not paid the full actuarially determined contributions necessary to prefund benefits. Over that time, because of not making the additional appropriation, the actuary determined the state's additionally required contributions have grown to \$1.08 billion (fiscal 2027).

The board always has acted as required by law and recommended employer contributions payable by the state to ensure the state meets its contractual obligations to members. Again, management is appreciative, and teachers can be as well, of the full funding provided in the 2018-2020 budget; in the fiscal 2021 and 2022 budgets; in the 2022-2024 budget; and the 2024-26 budget. The valuation for the Retirement Annuity Trust for the period ending June 30, 2024, reflects TRS's actuarial asset value of \$25.73 billion and actuarial liabilities of \$43.55 billion. The funded ratio of actuarial assets to liabilities is now 59.1% compared to 58.6% a year earlier. The actuary, in the 30-year projections, anticipates incremental changes over the next several years before larger gains are projected.

The actuary reports: "If contributions by the employer to the system in subsequent fiscal years are less than those required, the assets are expected to become insufficient to pay promised benefits. However, assuming that contributions to the system are made by the employer and state from year to year in the future at rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the assets to provide the benefits called for under the system may be safely anticipated."

Annual required employer contributions for the retirement plan are shown in the Schedule of Employer Contributions in the Required Supplemental Information of this report's Financial Section. Based on the 2024 valuation, the actuary recommends a cumulative increase in employer contributions of 25.54% of pay for fiscal 2027 as detailed in the contribution rates tables in the Summary of Principal Results in this report's Actuarial Section.

#### Health Insurance Trust

The Shared Responsibility solution for funding retiree health care, which went into effect on July 1, 2010, provides a method of prefunding retiree health care over the next 20 years. In only 14 years, the Health Insurance Trust has reached 80.4% funding compared to pay-as-you-go status before the law took effect. The results confirm that the Health Insurance Trust is on schedule to be funded fully and that the 2010 solution is working when all parties contribute as the law requires. The Shared Responsibility solution for funding retiree health care will help ensure the retirement security of the state's teachers. An actuarial valuation of the Health Insurance Trust for the year ended June 30, 2024, indicated that the trust has an unfunded liability of \$789.6 million. Annual required employer contributions for the Health Insurance Trust are provided in the Schedule of Employer Contributions in the Required Supplemental Information of the Financial Section.

The actuary opines "if the contributions to the Health Insurance Trust continue at the current statutorily required levels, the funded ratio of the retiree medical plan will continue to increase, and the ability of the health trust to fund the benefits called for under the retiree medical plan will improve."

The 2024-2026 budget included full funding as set forth in statute for the retiree Health Insurance Trust. With a oneyear exception in 2022, retiree health insurance has received all required appropriations since Shared Responsibility was implemented in 2010.

Also, the board pursues cost containment at both the state and national levels to the benefit of teachers and taxpayers. As referenced previously, should the trust's revenues lose prescription medication rebates and subsidies that were not anticipated at the outset of Shared Responsibility, the full funding of the trust could be pushed beyond 2050, according to the actuary.

#### **National Involvement**

#### NCTR Executive Committee

I am past-president of the National Council on Teacher Retirement (NCTR). NCTR is a national, nonprofit organization with a mission to promote effective governance and benefits administration in state and local public pension systems in order that adequate and secure retirement benefits are provided to educators and other plan participants. NCTR membership includes 63 state, territorial, local and university pension systems with combined assets in excess of \$2 trillion, serving more than 19 million active and retired teachers, non-teaching personnel and other public employees.

#### Public Sector HealthCare Roundtable

Additionally, I serve on the board of directors and as president of the Public Sector HealthCare Roundtable. The roundtable is a national coalition of public sector health care purchasers that was formed to ensure that the interests of the public sector are represented properly during the formulation, debate and implementation of federal health care policies. Membership is open to any statewide, regional or local governmental unit that provides health care coverage for public employees and retirees.

#### Acknowledgments

This report reflects the combined efforts of the TRS staff, under the leadership of the board. The report is intended to provide complete and reliable information that serves as a basis for making management decisions and for determining compliance with legal provisions. It also is used to determine responsible stewardship of the assets contributed by TRS members and their employers.

This report is at <u>https://trs.ky.gov/financial-reports-</u> <u>information/#ACFR</u> and is available to system employers. The cooperation of these employers continues to contribute significantly to TRS's success and forms the vital link between TRS and its active members.

TRS management and staff are committed to the continued operation of an actuarially sound and efficient system. Again, thanks to you, as trustees and members, and elected officials for supporting the full funding that ensures teachers' retirement security. Everyone's support is essential to this commitment, and we look forward to continuing that work.

Respectfully submitted,

Duxt Hart -

National Association of State Retirement Administrators (NASRA) National Conference on Public Employee Retirement Systems (NCPERS) National Council on Teacher Retirement (NCTR)

alan Helinkle

Alan H. Winkle Program Administrator

The Public Pension Coordinating Council awarded a Public Pension Standards Award for Funding and Administration to the Teachers' Retirement System of the State of Kentucky for 2024 for implementing and maintaining high professional standards in administering the affairs of TRS. The award is based on compliance with principles judged to underlie exemplary retirement system achievements in the areas of benefits, actuarial valuation, financial reporting, investments, funding and disclosure. Those principles are acknowledged widely to be marks of excellence for retirement systems. It represents the highest standards of excellence in the public pension industry. Financial Section

## ALLISON BALL AUDITOR OF PUBLIC ACCOUNTS

Independent Auditor's Report

To the Board of Trustees Teachers' Retirement System of the State of Kentucky Frankfort, Kentucky

#### Report on the Audit of the Financial Statements

#### Opinion

We have audited the accompanying financial statements of Teachers' Retirement System of the State of Kentucky (TRS), a component unit of the Commonwealth of Kentucky, as of and for the year ended June 30, 2024, and the related notes to the financial statements, which collectively comprise TRS's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the fiduciary net position of TRS as of June 30, 2024, and the changes in its fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Basis for Opinion**

18

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of TRS and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Emphasis-of-Matter (Reporting Entity)

As discussed in Note 1, the financial statements present only TRS, and are not intended to present fairly the financial position of the Commonwealth of Kentucky, or the results of its operations and cash flows of its proprietary fund types in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

```

Board of Trustees Teachers' Retirement System of the State of Kentucky Page 2

#### Responsibilities of Management for the Financial Statements

TRS's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about TRS's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- · exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, and design and perform audit procedures responsive to those risks. Such procedures
  include examining, on a test basis, evidence regarding the amounts and disclosures in the financial
  statements.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of TRS's internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant
  accounting estimates made by management, as well as evaluate the overall presentation of the
  financial statements.
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about TRS's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Board of Trustees Teachers' Retirement System of the State of Kentucky Page 3

#### **Other Matter – Comparative Financial Statements**

The financial statements of TRS for the year ended June 30, 2023, were audited by another auditor, who expressed an unmodified opinion on those statements on November 15, 2023. In our opinion, the comparative financial statements presented herein as of and for the year ended June 30, 2023 are consistent, in all material respects, with the audited financial statements from which is has been derived.

#### **Required Supplementary Information**

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis (pages 22 through 25), Schedule of Changes in Net Pension Liability - Retirement Annuity Trust (and related notes) (pages 75 through 78), Schedule of Changes in the Net OPEB Liability - Health Insurance Trust (and related notes) (pages 79 through 83), and Schedule of Changes in the Net OPEB Liability - Life Insurance Trust (and related notes) (pages 84 through 87) be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise TRS's basic financial statements. The fiscal year (FY) 2024 additional supporting schedules (pages 87 through 89) are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Schedule of Administrative Expenses, Schedule of Professional Services and Contracts, and Schedule of Contracted Investment Management Expenses are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Administrative Expenses, Schedule of Professional Services and Contracts, and Schedule of Contracted Investment Management Expenses are fairly stated, in all material respects, in relation to the basic financial statements as a whole. The FY 2023 information on the additional supporting schedules (pages 87 through 89) was subjected to the auditing procedures applied in the FY 2023 audit of the basic financial statements by other auditors, whose report on such information stated that it was fairly stated in all material respects in relation to the FY 2023 basic financial statements as a whole.

Board of Trustees Teachers' Retirement System of the State of Kentucky Page 4

#### **Other Matters**

#### Other Information

Management is responsible for the other information included in the annual comprehensive financial report (ACFR). The other information comprises introductory, investment, actuarial and statistical sections but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 15, 2024, on our consideration of TRS's internal control over financial reporting and on our test of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the TRS's internal control over financial reporting and compliance.

Respectfully Submitted. Shuma & Crouse

Shawnna Crouse, CPA Assistant Auditor of Public Accounts Frankfort, KY

November 15, 2024

## **Teachers' Retirement System of the State of Kentucky Management's Discussion and Analysis**

This discussion and analysis of the financial performance of Teachers' Retirement System of the State of Kentucky (TRS or system) provides an overview of the Retirement Annuity Trust, the Health Insurance Trust and the Life Insurance Trust for the years ended June 30, 2024, and 2023. It should be read in conjunction with the respective financial statements, which begin on page 26. TRS is the fiduciary of funds held in trust for its members.

#### **Using This Financial Report**

Because of the long-term nature of the retirement annuity, health insurance and life insurance trusts, financial statements alone do not provide the complete scope of TRS. The notes, required supplemental information, supporting schedules and other sections of this annual comprehensive financial report (ACFR) relating to investments, actuarial valuations and statistical measures complete that scope.

Information about the activities of the retirement annuity, health insurance and life insurance trusts and the 403(b) Tax-Sheltered Trust as a whole is provided in the Statement of Fiduciary Net Position and Statement of Changes in Fiduciary Net Position (on pages 26-29). The Notes to the Financial Statements are an essential part of the basic financial statements. They provide important background and detailed information about TRS, the plan and the basic financial statements themselves.

The Required Supplementary Information includes historical trend information about the funded status of the retirement annuity, health insurance and life insurance trusts presented as required by accounting standards. The Schedules of Employer Contributions present historical trend information about the required contributions of employers and the contributions made by employers in relation to the requirement. These schedules provide information that contributes to understanding the changes over time in the funded status of the plans. Separate reports prepared by the actuary using a board-adopted funding policy provide a long-term, ongoing plan perspective and the progress made in accumulating sufficient assets to pay benefits and insurance premiums when due.

#### **Teachers' Retirement System as a Whole**

In the year ended June 30, 2024, the system's combined fiduciary net position increased by \$2.45 billion — from \$27.08 billion in 2023 to \$29.53 billion in 2024. In 2022, the combined net position totaled \$25.26 billion. The following summaries focus on the fiduciary net position and changes in fiduciary net position of TRS's retirement annuity, health insurance and life insurance trusts.

\* Trust Totals excludes Other Funds, which consists of the 403(b) Tax-Sheltered Trust, the Supplemental Benefit Fund and the Losey Scholarship Fund. Other Funds had a combined fiduciary net position of \$1.4 million for 2024, \$1.3 million for 2023 and \$1.1 million for 2022.

\*\* Amounts above may not agree to the financial statements due to rounding.

The fiduciary net position of the Retirement Annuity Trust increased by 7.7% (\$26.11 billion compared to \$24.24 billion in 2023). The fiduciary net position in 2022 was \$22.9 billion. Net investment income was about \$2.81 billion in 2024 versus \$2.27 billion in 2023. This compares to a negative \$2.73 billion in 2022.

The fiduciary net position of the Health Insurance Trust increased to \$3.32 billion, with gains of 20.9% each of the last two years primarily due to investment income and contributions being more than the amount of insurance benefits. The 2022 fiduciary net position was \$2.27 billion.

The Summary of Changes in Fiduciary Net Position is presented below followed by discussion of the activities within the different trusts.

#### **Summary of Changes in Fiduciary Net Position**

#### **Retirement Annuity Trust Activities**

Retirement contributions are calculated by applying a percentage factor to salary with member and employer contributions withheld from each pay check. Members also may pay contributions to repurchase previously refunded service credit or to purchase various types of elective service credit.

In 2024, employer contributions totaled \$1.18 billion, a net increase of \$34.1 million from the prior fiscal year mainly due to increases in the amount required by the actuary for the unfunded liability and contributions for higher teacher salaries. The decrease from 2022 to 2023 resulted primarily from the state's additional employer contributions in 2022 of \$479 million to pay off previously awarded benefits.

The Retirement Annuity Trust experienced net investment income of \$2.81 billion in 2024 after net investment income of \$2.27 billion for 2023. For 2022, net investment income was a negative \$2.73 billion.

Deductions increased \$82 million in 2024 and \$88.1 million in 2023, which can be attributed to increases in the number of benefit recipients. Members and beneficiaries on the retiree payroll as of June 30, 2024, increased year over year each of the last two years, with a gain of about 800 over the prior year and 1,121 two years ago.

#### Other Postemployment Benefit (OPEB) Activities

During 2024, the Health Insurance Trust member contributions increased \$6.1 million from 2023, which followed a \$3.5 million increase from 2022. This represented a continuing increase in member's salaries paid by the local school district employers. Also, during 2024, employer contributions increased \$15.5 million from 2023 as the state made its contribution of the health insurance premiums for members who retired after July 1, 2010, who participate in the Kentucky Employees' Health Plan (KEHP).

In 2024, the Health Insurance Trust experienced net investment income of \$340.3 million compared to the previous year increase of \$243.1 million net investment income. For 2022, net investment income was a negative \$219.5 million.

The Life Insurance Trust experienced net investment income of \$10.3 million in 2024, compared to net investment income of \$8.7 million in 2023 and a negative \$15.7 million in 2022. Life insurance benefits paid for 2024, 2023 and 2022 were \$6.2 million, \$6.3 million and \$6.2 million respectively.

#### Funding

24

For the 2022-2024 biennium, the state budgeted \$1.28 billion of additional employer contributions for the unfunded liability of the Retirement Annuity Trust. The plan fiduciary net position as a percentage of total pension liability measured in accordance with Governmental Accounting Standards Board (GASB) Statement No. 67 was 60.4% as of June 30, 2024, compared to 2023's 57.7%. The separately issued actuary's valuation shows progress of the trust's funded status over the amortization period set by the board funding policy. The additional funding provided in the budget resulted in the actuarially determined employer contribution (ADEC) being made for 2024 and 2023. Assuming that contributions to the retirement trust are made by the state from year to year in the future as recommended by the actuary, TRS should have sufficient assets to provide all benefits due as defined by law to members.

The funding of the health insurance and life insurance trusts is presented in Notes 8 and 9 of these financial statements and the Required Supplementary Information in accordance with GASB Statement No. 74. Current obligations are being met by current funding and the Shared Responsibility solution enacted in 2010 continues to prefund retiree health benefits. The Schedule of Employer Contributions presented in the Required Supplementary Information provides the required contributions for the health and life insurance trusts.

#### **Historical Trends**

Accounting standards require that the Statement of Fiduciary Net Position presents assets at fair value; include only benefits and refunds due to plan members and beneficiaries. The standards also require presenting accrued investment and administrative expenses as of the reporting date. Detailed information regarding the funded status — including the key actuarial assumptions, target allocations and the sensitivity of the discount rate — can be found for the Retirement Annuity Trust in Note 4 of the financial statements, in Note 8 for the Health Insurance Trust and in Note 9 for the Life Insurance Trust. The schedules of employer contributions are provided in the Required Supplementary Information.

TRS's independent consulting actuaries are members of the American Academy of Actuaries and experienced in performing valuations for public retirement systems. As mandated by state law, the valuations of the retirement annuity and health insurance trusts are prepared in accordance with principles of practice prescribed by the Actuarial Standards Board consistent with accepted actuarial procedures. Actuarial assumptions used in the valuations are internally consistent and reasonable based on the actual experience of the trusts. An actuarial audit was completed in 2015, which confirmed the accuracy of actuarial procedures and the reasonableness of assumptions. A five-year experience study was completed in 2021, which also confirmed the reasonableness of assumptions.

This financial report is designed to provide citizens, participating employers, plan members and other users with an overview of TRS's fiscal practices. Direct questions or requests for additional information to TRS Chief Financial Officer Mark Whelan.

## Notes to Financial Statements

## Note 1 Description of Retirement Annuity Trust

#### **Reporting Entity**

The Teachers' Retirement System of the State of Kentucky (TRS, or system) was created by the 1938 General Assembly, began operations July 1, 1940, and is governed by Kentucky Revised Statutes (KRS) chapter 161 sections 220 through 990. TRS is a blended component unit of the Commonwealth of Kentucky (commonwealth or state) and, therefore, is included in the commonwealth's financial statements. TRS is a cost-sharing multiple-employer defined benefit plan with a special funding situation established to provide retirement, health and life insurance benefits for specified employees of local school districts and other public educational agencies in the commonwealth.

KRS 161.250 provides that the general administration and management of TRS, and the responsibility for its proper operation, is vested in a board of trustees. The Board of Trustees consists of the chief state school officer, the state treasurer, two trustees appointed by the governor and seven elected trustees. Four of the elected trustees are active teachers, two are not members of the teaching profession, and one is an annuitant of the system.

#### Participants

As of June 30, 2024, a total of 202 employers participated in the plan. Employers are comprised of local school districts, Department of Education agencies, universities, the Kentucky Community and Technical College System and other educational organizations. The state under the Governmental Accounting Standards Board (GASB) Statement Nos. 67 and 74 is recognized as a non-employer contributing entity providing the employer matching contributions for members employed by the local school districts and regional educational cooperatives.

According to KRS 161.220, any regular or special teacher, or professional occupying a position requiring certification or graduation from a four-year college or university is eligible to participate in the system. The following table illustrates the classifications of members.

|   | 2024    | 2023    |
|---|---------|---------|
| Active contributing members:                            |         |         |
| Vested  | 49,652  | 49,569  |
| Non-vested  | 26,362  | 26,075  |
| Inactive members, vested                                | 11,957  | 11,331  |
| Retirees and beneficiaries currently receiving benefits | 60,358  | 59,559  |
| Total members, retirees and beneficiaries               | 148,329 | 146,534 |

Because benefits are determined by a member's entry date, throughout this report, each grouping is referred to by a different name.

- TRS 1 is members who entered before July 1, 2002.
- TRS 2 is members who entered on or between July 1, 2002, and June 30, 2008.
- TRS 3 is members who entered on or between July 1, 2008, and Dec. 31, 2021.
- TRS 4 is members who entered on or after Jan. 1, 2022.

#### **Benefit Provisions**

For Members Before July 1, 2008 (TRS 1 and TRS 2): Members become vested when they complete five years of credited service. To qualify for monthly retirement benefits, payable for life, members must either:

1. Attain age 55 and complete five years of Kentucky service, or

2. Complete 27 years of Kentucky service.

Non-university members receive monthly payments equal to 2% (service prior to July 1, 1983) and 2.5% (service after July 1, 1983) of their final average salaries for each year of credited service. Non-university members who became members on or after July 1, 2002, will receive monthly benefits equal to 2% of their final average salary for each year of service if, upon retirement, their total service is less than 10 years. New members after July 1, 2002, who retire with 10 or more years of total service will receive monthly benefits equal to 2.5% of their final average salary for each year of service, including the first 10 years. In addition, non-university members who retire July 1, 2004, and later with more than 30 years of service will have a multiplier for all years over 30 of 3%.

University employees receive monthly benefits equal to 2% of their final average salary for each year of credited service.

The final average salary is the member's five highest annual salaries except members at least age 55 with 27 or more years of service may use their three highest annual salaries. For all members, the annual allowance is reduced by 5% per year from the earlier of age 60 or the date the member would have completed 27 years of service. The minimum annual service allowance for all members is \$440 multiplied by credited service.

For Members On or After July 1, 2008, and Before Jan. 1, 2022 (TRS 3): Members become vested when they complete five years of credited service. To qualify for monthly retirement benefits, payable for life, members must either:

- 1. Attain age 60 and complete five years of Kentucky service, or
- 2. Complete 27 years of Kentucky service, or
- 3. Attain age 55 and complete 10 years of Kentucky service.

The annual retirement allowance for non-university members is equal to: (a) 1.7% of final average salary for each year of credited service if their service is 10 years or less; (b) 2% of final average salary for each year of credited service if their service is greater than 10 years but no more than 20 years; (c) 2.3% of final average salary for each year of credited service if their service is greater than 20 years but no more than 26 years; (d) 2.5% of final average salary for each year of credited service if their service is greater than 26 years but no more than 30 years; (e) 3% of final average salary for years of credited service greater than 30 years.

The annual retirement allowance for university members is equal to: (a) 1.5% of final average salary for each year of credited service if their service is 10 years or less; (b) 1.7% of final average salary for each year of credited service if their service is greater than 10 years but no more than 20 years; (c) 1.85% of final average salary for each year of credited service if their service is greater than 20 years but less than 27 years; (d) 2% of final average salary for each year of credited service if their service is greater than or equal to 27 years.

The final average salary is the member's five highest annual salaries except members at least age 55 with 27 or more years of service may use their three highest annual salaries. For all members, the annual allowance is reduced by 6% per year from the earlier of age 60 or the date the member would have completed 27 years of service.

For Members On or After Jan. 1, 2022 (TRS 4): To qualify for monthly retirement benefits, payable for life, members must either:

- 1. Attain age 57 and complete 10 years of Kentucky service, or
- 2. Attain age 65 and complete five years of Kentucky service.

#### Foundational Benefit

34

The annual foundational benefit for members is equal to service times a multiplier times final average salary. The final average salary is the member's five highest annual salaries. The annual foundational benefit is reduced by 6% per year from the earlier of age 60 or the date the member would have completed 30 years of service.

|             | Years of Service |          |          |            |  |  |  |  |
|-------------|------------------|----------|----------|------------|--|--|--|--|
| Age         | 5-9.99           | 10-19.99 | 20-29.99 | 30 or more |  |  |  |  |
| 57-60       |                  | 1.70%    | 1.95%    | 2.20%      |  |  |  |  |
| 61          |                  | 1.74%    | 1.99%    | 2.24%      |  |  |  |  |
| 62          |                  | 1.78%    | 2.03%    | 2.28%      |  |  |  |  |
| 63          |                  | 1.82%    | 2.07%    | 2.32%      |  |  |  |  |
| 64          |                  | 1.86%    | 2.11%    | 2.36%      |  |  |  |  |
| 65 and over | 1.90%            | 1.90%    | 2.15%    | 2.40%      |  |  |  |  |
|             |                  |          |          |            |  |  |  |  |

The multiplier for non-university members is shown in the following table:

The multiplier for university members is shown in the following table:

|             |        | Years of |          |            |
|-------------|--------|----------|----------|------------|
| Age         | 5-9.99 | 10-19.99 | 20-29.99 | 30 or more |
| 57-60       |        | 0.70%    | 0.95%    | 1.20%      |
| 61          |        | 0.74%    | 0.99%    | 1.24%      |
| 62          |        | 0.78%    | 1.03%    | 1.28%      |
| 63          |        | 0.82%    | 1.07%    | 1.32%      |
| 64          |        | 0.86%    | 1.11%    | 1.36%      |
| 65 and over | 0.90%  | 0.90%    | 1.15%    | 1.40%      |

#### Supplemental Benefit

The annual supplemental benefit is equal to the account balance that includes member and employer contributions and interest credited annually on June 30. Options include annuitizing the balance or receiving the balance or a portion thereof as a lump sum either at the time of retirement or at a later date.

#### **Other Benefits**

TRS provides postemployment health insurance benefits to retirees as fully described in Note 8. For members who began participating prior to Jan. 1, 2022, TRS also provides disability benefits for vested members at the rate of 60% of the final average salary. TRS 4 members will receive a disability benefit to be determined by the board through administrative regulation.

A life insurance benefit payable upon the death of a member, also described in Note 9, is \$2,000 for active contributing members and \$5,000 for retired or disabled members for members who began participating before Jan. 1, 2022. For TRS 4 members, the life insurance benefit payable upon the death of a member is \$5,000 for active contributing members and \$10,000 for retired or disabled members.

Cost of living increases as provided by law are 1.5% annually. Additional ad hoc increases and any other benefit amendments are provided if authorized by the General Assembly.

#### Note 2 Summary of Significant Accounting Policies

#### **Basis of Accounting**

The financial statements are prepared on the accrual basis of accounting. Member contributions and employer matching contributions are recognized in the fiscal year due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

#### Cash

TRS has seven cash accounts. At June 30, 2024, the retirement annuity cash account totaled \$187.8 million, the control cash account totaled \$71.7 million and the capital project cash account totaled \$274,003 for a total of \$260 million as carrying value of cash in the retirement trust. The health insurance's Internal Revenue Code sec. 115 (IRC 115) trust cash account totaled \$154.1

## **FINANCIAL SECTION**

million, the health insurance 401(h) cash account totaled \$5 million for a total of \$159.2 million as carrying value of cash in the Health Insurance Trust. The Life Insurance Trust cash account totaled \$484,343. The Supplemental Benefit Fund cash account contained \$161,309. The Voluntary Contribution 403(b) cash account totaled \$29,197. Therefore, the carrying value of cash was \$419.6 million, and the bank balance was \$451.2 million. The variance is primarily due to outstanding checks and items not processed by the bank as of June 30, 2024.

At June 30, 2023, the retirement annuity cash account totaled \$173.4 million, the control cash account totaled \$82.4 million and the capital project cash account totaled \$274,003 for a total of \$256 million as carrying value of cash in the retirement trust. The health insurance's IRC 115 trust cash account totaled \$292.4 million, the health insurance 401(h) cash account totaled \$8.1 million for a total of \$300.5 million as carrying value of cash in the Health Insurance Trust. The Life Insurance Trust cash account totaled \$490,418. The Supplemental Benefit Fund cash account contained \$200,875. Therefore, the carrying value of cash was \$557.2 million, and the bank balance was \$579.2 million. The variance is primarily due to outstanding checks and items not processed by the bank as of June 30, 2023.

#### **Capital Assets**

Property and equipment are carried at cost, less accumulated depreciation. Buildings, improvements to land and equipment are capitalized when the acquisition is \$5,000 or greater. Intangible capital assets are capitalized when the cost is \$100,000 or more, except software, which has a threshold of \$500,000. Expenditures for maintenance and repairs are charged to operations as incurred. Depreciation is calculated using the straight-line method, with estimated lives ranging from five to 40 years in the following major classes: office furniture and equipment, five years; other equipment, five years; computer software, 10 years; and TRS office buildings, 40 years. Pathway replaced TRS's legacy computer system and is TRS's primary business information technology system. Pathway was capitalized and is being amortized or depreciated over 10 years.

#### Investments

Plan investments are reported at fair value. Fair value is the amount that a plan can reasonably expect to receive for an investment in a current sale between a willing buyer and a willing seller. Short-term securities are carried at cost, which approximates fair value. Fixed income and common and preferred stocks are generally valued based on published market prices and quotations from national security exchanges and securities pricing services. Real estate is primarily valued based on appraisals performed by independent appraisers. Other investments, such as private equity, timberland, real estate funds and other additional categories, are valued using the most recent general partner statement at net asset value. Examples of other additional categories are opportunistic credit, high yield bonds and direct lending.

Purchase and sales of debt securities, equity securities and short-term investments are recorded on the trade date. Real estate equity transactions are recorded on the settlement date. Upon sale of investments, the difference between sales proceeds and cost is reflected in the statement of changes in fiduciary net position. Investment expenses consist of investment manager and consultant fees along with fees for custodial services.

#### **Compensated Absences**

Expenses for accumulated vacation days and compensatory time earned by TRS's employees are recorded when earned. Upon termination or retirement, employees of TRS are paid for accumulated vacation time limited to 60 days and accumulated compensatory time limited to 240 hours. As of June 30, 2024 and 2023, accrued compensated absences were included in accrued expenses and other liabilities on the statements of fiduciary net position amounting to \$2.5 million and \$2.2 million, respectively.

#### **Risk Management**

Destruction of assets, theft, employee injuries and court challenges to administrative policy are among the various risks to which TRS is exposed. In order to cover such risks, TRS carries appropriate insurance policies, such as fire and tornado, employee bonds, fiduciary liability, worker's compensation and equipment insurance.

#### **Other Receivables**

In the Retirement Annuity Trust, other receivables consist primarily of installment contract receivables. TRS allows qualified purchases of service credit to be made by installment payments that are not to exceed a five-year period. Revenue is recognized in the initial year of the installment agreement. The June 30, 2024, other receivables in the retirement trust were \$26,965 and \$40,625 in 2023.

In the Health Insurance Trust, other receivables consist primarily of Medicare subsidies and formulary rebates accrued, but not received. The June 30, 2024, other receivables in the health trust were \$50 million and \$47 million in 2023.

# **Accrued Expenses and Other Payables**

TRS's accrued expenses and other payables consist primarily of administrative expenses incurred but not paid at year end and also from the state paying estimated retirement and health insurance contributions from the enacted budget that were in excess of actual contributions required.

#### **Use of Estimates**

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates. The most significant estimates impacting the financial statements relate to the actuarial assumptions.

# Income Taxes

The Retirement Annuity Trust is organized as a tax-exempt retirement plan under the Internal Revenue Code. The 403(b) Tax-Sheltered Trust no longer accepts contributions and will be fully terminated when all lifetime annuities have expired. TRS's management believes that it has operated the plans within the constraints imposed by federal tax law.

# Note 3 Contributions and Funds of the Plan

#### Contributions

Contribution rates are established by Kentucky Revised Statutes. For members who began participating before Jan. 1, 2022, nonuniversity members are required to contribute 12.855% of their salaries to the system; university members are required to contribute 10.4% of their salaries. KRS 161.565 allows each university to reduce the contribution of its members by 2.215%; therefore, university members contribute 8.185% of their salary to TRS. For members employed by local school districts, the state (as a non-employer contributing entity) contributes 13.105% of salary for those who joined before July 1, 2008, and 14.105% for those who joined on or after July 1, 2008, and before Jan. 1, 2022. Other participating employers are required to contribute the percentage contributed by members plus an additional 3.25% of members' gross salaries.

For TRS 4 members, non-university members contribute 14.75% and university members contribute 9.775% of their salaries to the system. Employers of non-university members, including the state (as a non-employer contributing entity), contribute 10.75% of salary. University employers contribute 9.775% of member's salary to the system.

The member and employer contributions consist of retirement annuity contributions and OPEB contributions to the health insurance and life insurance trusts. The member postemployment health insurance contribution is 3.75% of salary. The employer postemployment health insurance contribution is 0.75% of member salaries. Also, employers (other than the state) contribute 3% of members' salaries and the state contributes the net cost of health insurance premiums for new retirees after June 30, 2010, in the non-Medicare eligible group. If a member leaves covered employment before accumulating five years of credited service, accumulated member contributions to the retirement trust are refunded with interest upon the member's request.

#### Funds of the Plan

**Teacher Savings Fund:** KRS 161.420(2) establishes the Teacher Savings Fund consisting of contributions paid by university and non-university members. The fund also includes interest authorized by the Board of Trustees from the Guarantee Fund (described below). The accumulated contributions of members that are returned upon withdrawal or paid to the estate or designated beneficiary in the event of death are paid from this fund. Upon retirement, the member's contributions and the matching state contributions are transferred from this fund to the Allowance Reserve Fund, the fund (also described below) from which retirement benefits are paid.

**State Accumulation Fund:** KRS 161.420(3) establishes the State Accumulation Fund, which receives state appropriations to the system. The state matches an amount equal to members' contributions. State appropriations during the year are based on estimates of members' salaries. At year-end when actual salaries are known, the required state matching also is realized by producing either a receivable from or a payable to the state.

**Allowance Reserve Fund:** KRS 161.420(4) establishes the Allowance Reserve Fund, which is the source for retirement, disability and survivor benefits paid to TRS members. These benefits are paid from the retired members' contributions until they are exhausted, at which time state matching contributions are used to pay the benefits. After an individual member's contributions and the state matching contributions have been exhausted, retirement benefits are paid from monies transferred from the Guarantee Fund (described below).

**Guarantee Fund:** KRS 161.420(6) establishes the Guarantee Fund to collect income from investments, state matching contributions of members withdrawn from the system, and state matching contributions for cost-of-living adjustments (COLAs). In addition, it receives money for which disposition is not otherwise provided. This fund provides interest to the other funds, benefits in excess of both members' and state matching contributions, monies for administrative expenses of TRS and deficiencies not covered by the other funds.

**Expense Fund:** KRS 161.420(1) establishes the Expense Fund for administrative expenses. Investment income transferred to this fund from the Guarantee Fund is used to pay the administrative expenses of TRS. Administrative expenses are allocated among the funds based on benefits paid.

# Note 4 Net Pension Liability of Employers

The net pension liability (i.e., the system's liability determined in accordance with GASB Statement No. 67 less the fiduciary net position) as of June 30, 2024 and 2023 follows.

# Schedule of Net Pension Liability of Employers

(Dollars in thousands)

| Fiscal Year<br>Ending<br>June 30 | Total<br>Pension<br>Liability<br>A | l  | Plan<br>Fiduciary<br>Net Position<br>B | Employers<br>Net Pension<br>Liability<br>(A-B) | Plan Fiduciary<br>Net Position as<br>a % of Total<br>Pension<br>Liability<br>(B/A) | Covered<br>Payroll<br>C | Net<br>Pension<br>Liability as a %<br>of<br>Covered Payroll<br>[(A-B)/C] |
|----------------------------------|------------------------------------|----|--|--|--|-------------------------|--|
| 2024                             | \$<br>43,251,404                   | \$ | 26,108,136                             | \$<br>17,143,268                               | 60.4   | \$<br>4,140,446         | 414.0  |
| 2023                             | 42,029,935                         |    | 24,244,554                             | 17,785,381                                     | 57.7   | 3,977,280               | 447.2  |

# **Summary of Actuarial Assumptions**

A summary of the actuarial assumptions as of the latest actuarial valuation follows.

| Valuation date                  | June 30, 2023  |
|---------------------------------|--|
| Actuarial cost method           | Entry age  |
| Investment rate of return       | 7.1%, net of pension plan investment expense, including inflation. |
| Projected salary increases      | 3 - 7.5%, including inflation                                      |
| Inflation rate                  | 2.5%   |
| Post-Retirement adjustment      | 1.5%   |
| Municipal bond index rate       | 3.94%  |
| Single equivalent interest rate | 7.1%   |

Mortality rates were based on the Pub2010 (Teachers Benefit-Weighted) Mortality Table projected generationally with MP-2020 with various set-forwards, set-backs and adjustments for each of the groups; service retirees, contingent annuitants, disabled retirees and active members. The actuarial assumptions used were based on the results of an actuarial experience study for the 5-year period ending June 30, 2020, adopted by the board on Sept. 20, 2021. The Municipal Bond Index Rate used for this purpose is the June average of the Bond Buyer General Obligation 20-year Municipal Bond Index.

#### **Target Allocations**

The long-term expected rate of return on pension plan investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

A summary of the target allocation and best estimates of arithmetic real rates of return for each major asset class, as provided by TRS's investment consultant, follows.

| Asset Class                    | Target<br>Allocation<br>Percentage | Long-Term<br>Expected Real Rate<br>Percentage<br>of Return |
|--------------------------------|------------------------------------|--|
| Large cap U.S. equity          | 35.4                               | 5.0  |
| Small cap U.S. equity          | 2.6                                | 5.5  |
| Developed international equity | 15.7                               | 5.5  |
| Emerging markets equity        | 5.3                                | 6.1  |
| Fixed income                   | 15.0                               | 1.9  |
| High yield bonds               | 2.0                                | 3.8  |
| Other additional categories    | 8.0                                | 3.6  |
| Real estate                    | 7.0                                | 3.2  |
| Private equity                 | 7.0                                | 8.0  |
| Cash                           | 2.0                                | 1.6  |
| Total                          | 100.0                              | _  |

#### **Discount Rate**

For 2024 and 2023, the discount rate used to measure the total pension liability was 7.1%. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made in full at the current contribution rates and the employer contributions will be made at actuarially determined contribution (ADC) rates for all future fiscal years. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The following table presents TRS's net pension liability for 2024. TRS's 2024 net pension liability is calculated using the discount rate of 7.1%, as well as what the system's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.1%) or 1 percentage point higher (8.1%) than the current rate.

| 2024                     |    |                          |    |                               |    |                          |  |  |  |
|--------------------------|----|--------------------------|----|-------------------------------|----|--------------------------|--|--|--|
| (In thousands)           |    | 1%<br>Decrease<br>(6.1%) |    | Current<br>Discount<br>(7.1%) |    | 1%<br>Increase<br>(8.1%) |  |  |  |
| Net pension<br>liability | \$ | 22,338,043               | \$ | 17,143,268                    | \$ | 12,815,031               |  |  |  |

The following table presents TRS's net pension liability for 2023. TRS's 2023 net pension liability is calculated using the discount rate of 7.1%, as well as what the system's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.1%) or 1 percentage point higher (8.1%) than the current rate.

| 2023                     |    |                          |    |                               |    |                          |  |  |
|--------------------------|----|--------------------------|----|-------------------------------|----|--------------------------|--|--|
| (In thousands)           |    | 1%<br>Decrease<br>(6.1%) |    | Current<br>Discount<br>(7.1%) |    | 1%<br>Increase<br>(8.1%) |  |  |
| Net pension<br>liability | \$ | 22,852,220               | \$ | 17,785,381                    | \$ | 13,563,822               |  |  |

June 30, 2023, is the actuarial valuation date upon which the total pension liability (TPL) is based for 2024. An expected TPL is determined as of June 30, 2024, using standard roll forward techniques. The roll-forward calculation adds the annual normal cost (also called the service cost), subtracts the actual benefit payments and refunds for the plan year and then applies the expected investment rate of return for the year. In addition, the expected TPL as of June 30, 2024, has been determined based on the TPL roll-forward from June 30, 2023. The difference between the two roll-forward amounts as of June 30, 2024, is the experience gain or loss for the year. These procedures are shown in the following table.

# **TPL Roll Forward 2024**

(Dollars in thousands)

|   |    | Expected (1)  | Actual (2) |  |
|---|----|---------------|------------|--|
| (a) Interest Rate   |    | 7.1%          | 7.1%       |  |
| (b) TPL as of June 30, 2023   | \$ | 42,029,935 \$ | 42,179,888 |  |
| (c) Entry Age Normal Cost for the Year July 1, 2023 - June 30, 2024                             |    | 665,383       | 665,383    |  |
| (d) Actual Benefit Payments (including<br>refunds)<br>For the year July 1, 2023 - June 30, 2024 |    | 2,499,893     | 2,499,893  |  |
| (e) TPL as of June 30, 2024<br>[(b) $x (1 + (a))$ ] + (c) - [(d) $x (1 + (0.5 x (a)))$ ]        |    | 43,090,804    | 43,251,404 |  |
| (f) Experience (Gain)/Loss = (e2) - (e1)  |    |               | 160,600    |  |

June 30, 2022, is the actuarial valuation date upon which the TPL is based for 2023. An expected TPL is determined as of June 30, 2023, using standard roll-forward techniques for the actual TPL both before and after the assumption changes due to the experience study and the reduction in the assumed investment rate of return. The difference between these two amounts is shown as a change in assumptions. The roll-forward calculation adds the annual normal cost (also called the service cost), subtracts the actual benefit payments and refunds for the plan year and then applies the expected investment rate of return for the year. The expected TPL as of June 30, 2022, has been determined based on the TPL roll-forward from June 30, 2021. The difference between the two roll-forward amounts as of June 30, 2023, is the experience gain or loss. The procedures are shown in the following table.

# **TPL Roll Forward 2023**

(Dollars in thousands)

|  | 1  | Expected (1)  | Actual (2) |
|--|----|---------------|------------|
| (a) Interest Rate  |    | 7.10%         | 7.10%      |
| (b) TPL as of June 30, 2022  | \$ | 40,598,288 \$ | 40,970,441 |
| (c) Entry Age Normal Cost for the Year July 1, 2022 - June 30, 2023                          |    | 654,676       | 654,676    |
| (d) Actual Benefit Payments (including refunds)<br>For the year July 1, 2022 - June 30, 2023 |    | 2,418,236     | 2,418,236  |
| (e) TPL as of June 30, 2023<br>[(b) x (1 + (a))] + (c) - [(d) x (1 + (0.5 x (a)))]           |    | 41,631,359    | 42,029,935 |
| (f) Experience (Gain)/Loss = (e2) - (e1)   |    |               | 398,576    |

# Note 5 Deposits With Financial Institutions and Investments (Including Repurchase Agreements)

#### Legal Provisions for Investments

The following disclosures are meant to help the users of the financial statements for the Teachers' Retirement System of the State of Kentucky (TRS or system) assess the risks TRS takes in investing member funds. The Board of Trustees and the Investment Committee are guided by asset allocation parameters that the board approves through its powers as defined in KRS 161.430.

TRS administers a Retirement Annuity Trust, Health Insurance Trust and Life Insurance Trust in accordance with state and federal law. TRS provides benefits for service and disability retirements; death and survivors; retiree health insurance; and life insurance for Kentucky public education employees and their beneficiaries.

The asset allocation parameters for the retirement annuity and life insurance trusts are set forth in 102 Kentucky Administrative Regulations (KAR) 1:175, sections 2 and 3 as follows:

- There shall be no limit on the amount of investments owned if the investments are guaranteed by the U.S. government.
- Not more than 35% of the assets at fair value shall be invested in corporate debt obligations.
- Not more than 10% of the assets at fair value shall be invested in foreign debt.
- Not more than 65% of the assets at fair value shall be invested in common stocks or preferred stocks.
- Not more than 25% of the assets at fair value shall be invested in a stock portfolio designed to replicate a general stock index.
- Not more than 30% of the assets at fair value shall be invested in the stocks of companies domiciled outside of the United States; any amounts so invested shall be included in the 65% limitation for total stocks.
- Not more than 10% of the assets at fair value shall be invested in real estate. This would include real estate equity, real estate lease agreements and shares in real estate investment trusts.
- Not more than 10% of the assets at fair value shall be invested in alternative investments. This category may include private equity, venture capital, timberland and infrastructure investments.

• Not more than 15% of the assets at fair value shall be invested in any additional category or categories of investments. The board shall approve by resolution such additional category or categories of investments.

The asset allocation parameters for the Health Insurance Trust fund are set forth in 102 KAR 1:178, section 2 as follows:

- In order to preserve the assets and produce the required rate of return while minimizing risk, assets shall be prudently diversified among various classes of investments.
- In determining asset allocation policy, the investment committee and the board shall be mindful of the trust's liquidity and its capability of meeting both short and long-term obligations.

# **Cash and Cash Equivalents**

For cash deposits and cash equivalents, custodial credit risk is the risk that, in the event of a bank failure, TRS's deposits may not be returned to the system. TRS's total cash balance held at J.P. Morgan Chase bank on June 30, 2024, was \$451.2 million. TRS's total cash balance held at J.P. Morgan Chase on June 30, 2023, was \$579.2 million.

Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are:

- a. uncollateralized,
- b. collateralized with securities held by the pledging financial institution or
- c. collateralized with securities held by the pledging financial institution's trust department or agent but not in the depositor-government's name.

As of June 30, 2024, TRS's cash balance of \$451.2 million was not exposed to custodial credit risk because this amount was collateralized fully with a letter of credit in the amount of \$837 million.

As of June 30, 2023, TRS's cash balance of \$579.2 million was not exposed to custodial credit risk because this amount was collateralized fully with a letter of credit in the amount of \$896 million.

# Investments

All of TRS's assets are invested in short-term and long-term debt (bonds and mortgages) securities, equity (stock) securities, real estate, alternative investments and additional categories as permitted by regulation. These assets are reported at fair value.

Investments are governed by the board's policies. The board and the Investment Committee execute their fiduciary responsibilities in accordance with the prudent person rule, as identified in KRS 161.430 (2)(b). The prudent person rule establishes a standard for all fiduciaries to act as a prudent person would be expected to act, with the "care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with these matters would use in the conduct of an enterprise of a like character and with like aims."

The following tables represent the fair value of TRS's investments for June 30, 2024, and 2023.

# **Custodial Credit Risk**

Custodial credit risk for an investment is the risk that, in the event of the failure of a counterparty, TRS will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the system and are held by either:

- a. the counterparty or
- b. the counterparty's trust department or agent, but not in the system's name.

The cash reserve of TRS is maintained primarily in high quality short-term investments through the Dreyfus Institutional Cash Advantage Fund. This fund invests in a diversified portfolio of high quality, short-term debt securities, and the fund is rated AAA by S&P, Moody's and Fitch. The fund's portfolio is structured within the confines of Rule 2a-7 under the Investment Company Act of 1940. Permissible investments within this fund include commercial paper; U.S. Treasury and agency obligations; certificates of deposit; bankers' acceptances; repurchase agreements; and time deposits.

Whenever repurchase agreements are ordered by TRS under the terms of master repurchase agreements with various brokers, the terms are dictated by TRS. The repurchase agreements and their supporting collateral are held by the custodial agent's correspondent bank in an account identified by the custodian's name and TRS's nominee name. This account is unique to TRS. The master repurchase agreements require that the supporting collateral have a fair value of at least 102% of the value of the repurchase agreements.

As of June 30, 2024, cash collateral reinvestment securities acquired through securities lending for the Retirement Annuity Trust by TRS's custodian amounted to \$1.14 billion in relation to the \$1.11 billion securities lent consistent with the lending agreement

with the custodian. Cash collateral reinvestment securities lending for the Life Insurance Trust by TRS's custodian amounted to \$5.6 million in relation to the \$5.5 million securities lent consistent with the lending agreement with the custodian. The custodian also is the lending agent and counterparty.

# **Interest Rate Risk**

**46** 

Interest rate risk on investments is the possibility that changes in interest rates will reduce the fair value of TRS's investments. In general, the longer the period until an investment matures, the greater the risk of a negative impact on fair value resulting from changes in interest rates.

As of June 30, 2024, and 2023, the Retirement Annuity Trust, Health Insurance Trust and Life Insurance Trust had the following investment fair value and weighted average maturities.

| Retirement Annuity Trust              |                 |                          |                                |                 |                          |                                |  |  |  |

# Life Insurance Trust

In addition to the above securities, TRS held short-term cash investments in the Dreyfus Institutional Cash Advantage Fund, at the Bank of New York Mellon (BNYM), with a total fair value of \$768.5 million and a weighted average maturity of 44 days. Average maturity is used as a measure of a security's exposure to interest rate risk due to fluctuations in market interest rates. Mortgage-backed securities and collateralized mortgage obligations typically are amortizing investments with an average life and interest rate risk significantly less than suggested by the legal maturity. Mortgage-backed securities, which generally are prepayable, and other callable bonds are subject to adverse changes in average life in response to market interest rate changes. The schedule above reflects only the legal maturity of all such bonds.

Interest rate risk is the risk that changes in interest rates will affect adversely the fair value of an investment. This risk is managed by using the effective duration or option adjusted methodology to quantify the risk of interest rate changes. This methodology takes into account options on bonds and scales the risk of price changes on bonds depending upon the degree of changes in rates and the slope of the yield curve. The control of interest rate risk is not set forth in a particular policy; however, the system manages interest rate risk in practice by establishing appropriate benchmarks for its various portfolios.

Mortgage-backed securities are securities representing pass-through interests in the cash flows from pools of mortgage loans on single-family or multi-family residential properties. All of the mortgage-backed securities owned by TRS were securitized and are guaranteed by Fannie Mae, Freddie Mac or Government National Mortgage Association (GNMA). The average life of a mortgage-backed security depends upon the level of prepayments experienced in the underlying pool of loans. Market interest rates are a primary determinant of prepayment levels. Lower-than-anticipated market rates generally lead to higher-thananticipated prepayments and a shorter average life; higher-than-anticipated market rates generally lead to lower-than-anticipated prepayments and a longer average life. The Retirement Annuity Trust held \$240.1 million in mortgage-backed securities as of June 30, 2024, compared to \$113.4 million as of June 30, 2023. The Health Insurance Trust held \$3 million in mortgage-backed securities as of June 30, 2024, compared to \$3.1 million as of June 30, 2023. The Life Insurance Trust held \$182,162 in mortgagebacked securities as of June 30, 2024, compared to \$199,079 as of June 30, 2023.

Collateralized mortgage obligations are bonds that are collateralized by whole loan mortgages, mortgage pass-through securities or stripped mortgage-backed securities. Income is derived from payments and prepayments of principal and interest generated from collateral mortgages. Cash flows are distributed to different investment classes in accordance with collateralized mortgage obligations' established payment order. The Retirement Annuity Trust held \$81.2 million in collateralized mortgage obligations as of June 30, 2024, compared to \$21.5 million as of June 30, 2023. The Health Insurance Trust held \$1,777,731 in collateralized mortgage obligations as of June 30, 2024, compared to \$824,263 as of June 30, 2023.

Asset-backed securities are bonds or notes backed by loan paper or accounts receivables originated by banks, credit card companies or other credit providers and are considered to be moderately sensitive to changes in interest rates. The originator of the loan or accounts receivable paper sells it to a specially created trust, which repackages it as securities. Asset-backed securities have been structured as pass-throughs and as structures with multiple bond classes. The Retirement Annuity Trust held \$52.9 million in asset-backed securities as of June 30, 2024, compared to \$28.9 million as of June 30, 2023. The Health Insurance Trust held \$522,328 in asset-backed securities as of June 30, 2024, compared to \$0 as of June 30, 2023.

Commercial mortgage-backed securities represent interests in the cash flows from pools of mortgage loans on commercial properties. The interests in a securitized pool of loans are divided generally into various tranches based upon planned payment order and level of seniority. TRS's commercial mortgage-backed securities consist of highly rated, relatively senior tranches. The average maturity of TRS's commercial mortgage-backed securities in the schedule above reflects the legal maturity of these holdings. Most of the tranches held are earlier in the planned payment order than the legal maturity suggests. The Retirement

Annuity Trust held \$25.4 million in commercial mortgage-backed securities investments as of June 30, 2024, compared to \$26.6 million as of June 30, 2023.

# **Credit Risk**

Credit risk is the risk that an issuer or counterparty to an investment will not fulfill its obligations. The following schedules list TRS's fixed income investment fair value (net of cash equivalents) according to credit ratings as of June 30, 2024, and 2023.

# 2024 Life Insurance Trust

Total fair value of the Retirement Annuity Trust's fixed income portfolio was \$4.55 billion on June 30, 2024. The Health Insurance Trust's fixed income portfolio was valued at \$562.7 million on June 30, 2024. Total fair value of the Life Insurance Trust's fixed income portfolio was \$16.8 million on June 30, 2024. Standard & Poor's (S&P) rating system is used in the above charts. For securities where an S&P rating is not provided, another nationally recognized system is used and translated to the S&P rating system.

In addition to the above categories, the Retirement Annuity Trust held \$573 million in short-term investments through the Dreyfus Institutional Cash Advantage Fund. The Health Insurance Trust held \$190.5 million in the Dreyfus Institutional Cash Advantage Fund. The Life Insurance Trust held \$4.9 million in the Dreyfus Institutional Cash Advantage Fund. The credit risk associated with this fund is minimal as the securities held are required to maintain the highest possible short-term credit ratings by Moody's and S&P. In addition, investments in U.S. government and agency securities also are highly rated securities since they are backed by the U.S. government. Notation is made that the ratings of securities are subject to change.

The Retirement Annuity Trust's policy on credit rating is set forth in 102 KAR 1:175.

# **Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. Losses from credit risk are heightened if a significant portion of resources are invested with a single issuer. In compliance with 102 KAR 1:175, the Retirement Annuity Trust has not invested more than 5% of assets at fair value in any single issuer.

# **Foreign Currency Risk**

Foreign currency risk is the risk that changes in exchange rates will affect adversely the fair value of an investment or a deposit. TRS holdings do not include foreign currency. The foreign currency tables shown are a comparative measure of the value of TRS's foreign investments, like stocks, expressed in U.S. dollars using the conversion rate for that currency on the day the fiscal year ended. As of June 30, 2024, TRS's exposure to foreign currency risk consisted of \$5.51 billion in the Retirement Annuity Trust, \$778.2 million in the Health Insurance Trust and \$21.1 million in the Life Insurance Trust.

The majority of foreign investments are held in commingled funds managed by UBS Global Asset Management, Baillie Gifford, Baring Asset Management and BlackRock. In addition to the commingled funds investing in foreign securities, the Retirement Annuity Trust held \$1.12 billion associated with foreign interests in American depository receipt investments. These American depository receipts are securities that are issued by a U.S. bank in place of the foreign stock shares held in trust by that bank, thereby facilitating the trading of foreign shares in U.S. markets. The cross-listed equity, in the amount of \$450.4 million, represent securities domiciled in foreign countries, but are listed and traded on U.S. exchanges. Other foreign securities and investments consist of debt securities and alternative investment opportunities.

The Retirement Annuity Trust's policy regarding foreign equity is that not more than 30% of the assets at fair value shall be invested in the stocks of companies domiciled outside of the United States. Any amounts so invested shall be included in the 65% limitation for total stocks under 102 KAR 1:175 Section 2(e).

The following tables represent in U.S. dollars the fair value of investments that are subject to foreign currency risk as a result of cash contributions to each portfolio manager as of June 30, 2024, and 2023.

TRS's investments subject to foreign currencies and categorized in the preceding tables are illustrated further in the following tables by each country and its currency. As previously stated, TRS holdings do not include foreign currency. The amounts shown are the fair value in U.S. dollars of TRS's foreign investments. These foreign investments are made with U.S. dollars in the custody of American financial institutions. Foreign holdings not readily identifiable to a specific country are listed in the various category, which includes investment receivables, payables and new issues.

# Fair Value Measurement

A retiree pension defined benefit plan holds significant amounts of investments that are measured at fair value on a recurring basis. TRS categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles (GAAP) in the United States of America. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and is not necessarily indicative of risk.

Level 1 inputs are quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability. Level 2 inputs may include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets of liabilities in non-active markets; and inputs other than quoted prices that are observable for the assets or liabilities, either directly or indirectly. Level 3 inputs are unobservable inputs for an asset or liability such as property appraisals, third-party valuations and public market comparables of similar assets where applicable. Investments measured at fair value using the net asset value (NAV) per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy. The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

# **Schedules of Fair Value**

54

These category descriptions that immediately follow refer to the investments shown in the fair value level hierarchy schedules shown after these descriptions.

Cash and Cash Equivalents: Cash equivalents are short-term, highly liquid investments that readily are convertible to known amounts of cash and so near to their maturity that they present insignificant risk of changes in value because of changes in interest rates. This category is comprised of short-term investments via the Dreyfus Institutional Cash Advantage Fund and cash. Cash equivalents can be valued with inputs from quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date and, therefore, are classified as Level 1 assets.

Equity and Fixed Income Securities: Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets issued by pricing vendors for these securities. Debt and equity securities classified in Level 2 of the fair value hierarchy may use inputs such as market quotations, yields, maturities, call features and ratings or may be valued using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices. Debt securities classified in Level 3 are securities whose stated market price is unobservable by the market place and, instead, are priced by the issuers or industry groups for these securities.

Real Estate: Real estate falls into the Level 3 classification of the fair value hierarchy. Much of TRS's real estate consists of owned properties leased to various commercial enterprises. The fair value measurement for real estate is determined by professional appraisals every five years.

Additional Categories: Investments in this category do not fit the regular parameters for the Retirement Annuity Trust in 102 KAR 1:175. They fall into the allowable 15% of assets invested in any additional categories approved by the board. Corporate bonds falling within the Level 1 classification are valued using prices quoted in active markets issued by pricing vendors for these securities. Corporate bonds listed in Level 2 may use inputs such as market quotations, yields, maturities, call features and ratings or may be valued using a matrix pricing technique that values securities based on their relationship to benchmark quoted prices. Corporate loans at Level 3 are valued by third-party pricing vendors such as Markit or Reuters.

Timberland: Timberland investments are managed investments regarding the acquiring, growing and disposing of timber on timberland owned by TRS. The adviser contracts with outside appraisers to generate annual fair value estimates. The outside appraisers utilized the cost, sales comparison and income capitalization approaches to estimate the fair value of the timber and timberland. The adviser challenges the reasonableness of the assumptions used and reviews the methodology to ensure the estimated fair value complies with GAAP. These funds are not available for redemption; instead, distributions are made to TRS as the underlying assets are sold.

Commingled Funds: These funds hold European loans, international equity and domestic equity. Commingled funds are valued at the net asset value held at the end of the period based upon the fair value of the underlying investments.

Private Equity: Private equity funds invest in equity and debt securities issued by private and publicly held companies in connection with leveraged buyouts, recapitalizations and expansion opportunities. Three of these funds are redeemable, but the majority do not allow redemptions. Alternatively, TRS receives distributions as the underlying assets of the funds liquidate, usually over a five- to 10-year liquidation period. Exchange quotations are not available readily for these investments. The fair value for most of these funds is determined using the net asset value one quarter in arrears, plus current quarter cash flows.

Private Real Estate: Three private real estate investments are open-ended. The remaining investments are not redeemable; rather, TRS receives distributions as the underlying assets liquidate, usually over a five- to 10-year liquidation period. Exchange quotations for these investments are not available readily. Most private real estate fair value is determined using the net assets valued one quarter in arrears, plus current quarter cash flows.

Private Opportunistic Credit: One private opportunistic credit fund is redeemable. The remainder are closed funds that issue distributions as the underlying assets of the fund liquidate, usually over a five- to 10-year liquidation period. The fair value for most of these funds is determined using the net assets valued one month in arrears, plus current period cash flows.

# Retirement Annuity Trust Schedule of Investments at Fair Value Level — 2024

Regarding the open-ended private equity and open-ended private opportunistic credit, a few restrictions remain that would prevent redemption at this time. For open-ended private equity, one fund has recently committed an additional \$50 million that has a 3-year lock-up period expiring March 31, 2027. In open-ended private opportunistic credit, one fund has a NAV of \$74.8 million with a three-year lock-up period expiring Nov. 11, 2025, while another has a NAV of \$117.8 million with a three-year lock-up period expiring July 17, 2026.

#### Schedule of Investments at NAV — 2024

Regarding the open-ended private opportunistic credit, a few restrictions remain that would prevent redemption at this time. In open-ended private opportunistic credit, one fund has a NAV of \$19.2 million with a three-year lock-up period expiring Nov. 11, 2025, while another has a NAV of \$18.1 million with a three-year lock-up period expiring July 17, 2026.

# Life Insurance Trust Schedule of Investments at Fair Value Level — 2023

# Securities Lending

KRS 161.430 empowers the board with fiduciary responsibility for TRS funds. The system operates a securities lending program in which it temporarily lends securities to qualified agents in exchange for a net fee and high-quality collateral. The types of securities lent are U.S. government and agency securities; selected domestic bonds; and domestic and international stocks. TRS's custodian, BNYM, acts as lending agent in exchanging securities for collateral. The collateral has a value of not less than 102% of the fair value of the lent securities, plus any accrued, unpaid distributions. The collateral may consist of both cash and non-cash collateral. The non-cash collateral may include, but not be limited to, debt obligations and securities, equity securities, corporate bonds and convertible securities.

Securities lending transactions are accounted for in accordance with GASB Statement No. 28. During the year ended June 30, 2024, only the Retirement Annuity Trust fund and the Life Insurance Trust fund had securities lending transactions. The following schedules detail the net income earned in the Retirement Annuity Trust fund and the Life Insurance Trust fund from securities lending for the fiscal years ended June 30, 2024, and 2023.

| Securities Lending Net Earnings    |              |              |                |           |  |  |  |  |  |  |  |  |

| Bank fees                          | (1,100,027)  | (1,067,559)  | (16,947)       | (21,638)  |  |  |  |  |  |  |  |  |
| Net earnings                       | \$2,567,176  | \$2,491,482  | \$39,558       | \$50,504  |  |  |  |  |  |  |  |  |

\* This schedule includes the Losey Scholarship fund.

Cash collateral is invested in guaranteed, short-term obligations of the U.S. government, select government agencies and repurchase agreements with qualified agents. TRS cannot pledge or sell collateral securities received unless the borrower defaults. BNYM as the lending agent also indemnifies TRS from any financial loss associated with a borrower's default and collateral inadequacy. The Statement of Fiduciary Net Position does not report securities lending transactions collateralized by letters of credit or by securities that the governmental entity does not have the ability to pledge or sell, unless the borrower defaults.

As of June 30, 2024, the average days to maturity for loans in the Retirement Annuity Trust was one day, and the weighted average investment maturity of cash collateral investments was one day. The trust had no credit risk exposure to borrowers because the amounts owed to borrowers exceeded the amounts the borrowers owed the trust, and no losses resulted during the period.

Security lending programs can entail interest rate risk and credit risk. TRS minimizes interest rate risk by limiting the term of cash collateral investments to several days.

The credit risk is controlled by investing cash collateral in securities with qualities similar to the credit worthiness of lent securities.

The following table presents the fair value of the underlying securities and the value of the collateral pledged at June 30, 2024, and 2023.

# Life Insurance Trust

2024

# **Annual Money-Weighted Rate of Return**

A money-weighted rate of return is an expression of investment performance that is net of TRS's investment fees and expenses, adjusted for the changing amounts actually invested. The following table reflects the money-weighted rates of return.

# Annual Rate of Return Net of Investment Fees and Expenses

|                          | 2024    | 2023    |
|--------------------------|---------|---------|
| Retirement Annuity Trust | 11.91 % | 10.24 % |
| Health Insurance Trust   | 12.37 % | 11.52 % |
| Life Insurance Trust     | 11.18 % | 9.63 %  |

# Note 6 Retirement Plans for TRS Employees

Full-time employees of TRS participate in either TRS or Kentucky Employees Retirement System (KERS). Both plans are multiple-employer cost-sharing defined benefit retirement annuity and other postemployment benefits plans. All TRS employees in positions requiring a four-year degree are covered under TRS. The contribution rates and required employer matching are the same as state agency employers in TRS. These rates, the plan description and funding policy are disclosed fully in the notes to the financial statements.

The annual required contributions for TRS employee members in TRS for the fiscal years 2024 and 2023 were \$1.5 million and \$1.4 million, respectively. TRS contributed 100% of the required contribution each year.

All other TRS employees are covered under the KERS non-hazardous employees' plan. The plan provides for retirement, disability and death benefits to plan members. Retirement benefits may be extended to beneficiaries of plan members under certain circumstances. Per KRS 61.565(2), contribution rates shall be determined by the Kentucky Retirement Systems board (KRS board) on the basis of an annual actuarial valuation. Rates may be amended by the KRS board as needed.

Members of KERS who joined prior to July 1, 2008, are required to contribute 5% of their annual creditable compensation, and members who joined on or after July 1, 2008, contribute 6%. As the employer, TRS is required to contribute the annual actuarially determined rate of the creditable compensation (or the rate approved by legislators). TRS is required to contribute 9.97% plus a monthly amount determined by the KERS actuary for TRS's portion of the total unfunded liability over a set period regardless of covered payroll. TRS's total contributions to KERS were \$919,143 and \$887,844 for fiscal 2024 and 2023. TRS contributed 100% of the required contributions for each year.

# Note 7 Description of Other Funds

# 403(b) Tax-Sheltered Annuity Plan

# **Plan Description**

TRS has administered a salary deferral program as permitted by section 403(b) of the Internal Revenue Code. Under this program members voluntarily deferred a portion of their compensation within the limits established by the applicable laws and regulations. The board subsequently discontinued offering the program. Members who were not receiving annuities were able to transfer their accounts into other tax-sheltered plans. As of June 30, 2024, two members remained who are receiving annuities under the plan. Effective Jan. 1, 2022, the board restated the plan to allow TRS 4 members and employers to make voluntary contributions to the plan to comply with the requirements of the legislation that created TRS 4. As of June 30, 2024, 17 TRS 4 members participated in the voluntary plan, and the combined balance of those accounts was \$28,009, compared to nine members with a combined balance of \$9,725 at June 30, 2023.

# **Basis of Accounting**

The Tax-Sheltered Annuity Plan financial statements are prepared using an accrual basis of accounting.

# Method Used to Value Investments

The short-term investments are reported at cost, which approximates fair value.

# **Supplemental Benefit Fund**

The Supplemental Benefit Fund is a qualified governmental excess benefit arrangement as described in Section 415 of the Internal Revenue Code. In accordance with KRS 161.611 and KRS 161.420(8), TRS is authorized to provide a supplemental retirement benefit fund for the sole purpose of enabling the employer to apply the same formula for determining benefits payable to all members of TRS employed by the employer, whose benefits under the system are limited by Section 415 of the Internal Revenue Code of 1986 as amended. Funding of benefits payable under this fund are provided by the employer and are segregated from funds that are maintained by TRS for payment of regular benefits.

# Junita Losey Scholarship Fund

Junita Losey, a retired teacher, designated TRS as a residuary beneficiary of her estate and expressed a desire that TRS establish a scholarship program for Kentucky students studying to be teachers. Ms. Losey died in 1997, and her estate provided a scholarship bequest to TRS. The scholarship bequest has at all times been segregated from funds that are maintained by TRS for payment of regular benefits. The board's Scholarship Committee meets each December to consider scholarship standards and administration of the bequest.

# Note 8 Other Postemployment Benefits (OPEB) — Health Insurance Trust

# **Plan Description**

66

In addition to the retirement annuity plan described in Note 1, KRS 161.675 requires TRS to provide access to postemployment healthcare benefits for eligible members and dependents. The TRS Health Insurance Trust is funded by employer and member

contributions. Changes made to the medical plans provided through the trust may be made by the TRS Board of Trustees, the Kentucky Department of Employee Insurance and the General Assembly.

Medical coverage through TRS is funded by a combination of contributions from employees, the state and other employers. Coverage is provided through an account established pursuant to 26 U.S.C. sec. 401(h) and a 115 trust fund that went into effect on July 1, 2010. The insurance trust fund includes employer and retired member contributions required under KRS 161.550 and KRS 161.675(4)(b).

To be eligible for medical benefits, the member must have retired either for service or disability and a required amount of service credit. The TRS medical plan offers members who are not eligible for Medicare and under age 65 coverage through the Kentucky Employees Health Plan (KEHP) administered by the Kentucky Department of Employee Insurance. Once retired members and eligible spouses attain age 65 and or are eligible for Medicare, coverage is obtained through the Medicare Eligible Health Plan (MEHP) administered by TRS.

Contributions are made on behalf of TRS retired members toward payment of health insurance premiums. The amount of the member's contribution is based on a table approved by the TRS board. Retired members pay premiums in excess of the monthly contribution. The amount of insurance premiums paid by retirees for fiscal years 2024 and 2023 were \$62.9 million and \$63.3 million, respectively. The Commonwealth of Kentucky bears risk for excess claims expenses that exceed the premium equivalents charged for the KEHP.

At June 30, 2024, TRS insurance covered 41,000 retirees and 6,322 dependents, and at June 30, 2023, TRS insurance covered 41,055 retirees and 6,555 dependents. The medical plan has 202 participating employers with 76,014 and 75,644 active members contributing at June 30, 2024, and 2023, respectively.

Retiree health care premiums and other income received reduces the amount of expenditures reported in the deductions section in the Statement of Changes in Fiduciary Net Position for the Health Insurance Trust. These expenditures are summarized in the following table.

|  | 2024           | 2023           |
|--|----------------|----------------|
| MEHP group expenditures                            | \$ 244,030,540 | \$ 222,852,822 |
| KEHP group expenditures                            | 119,207,504    | 110,701,357    |
| Subtotal   | 363,238,044    | 333,554,179    |
| Less: amounts paid by retirees                     | (62,939,581)   | (63,329,256)   |
| Less: formulary rebates                            | (71,191,589)   | (63,433,922)   |
| Less: Medicare subsidies and other recovery income | (85,584,941)   | (81,924,996)   |
| Net insurance expenditures                         | \$ 143,521,932 | \$ 124,866,005 |

# **Net OPEB Liability of Employers**

The net OPEB liability [i.e., the system's liability determined in accordance with GASB Statement No. 74 less the fiduciary net position (FNP)] for the Health Insurance Trust as of June 30, 2024, and 2023 is shown in the following table.

| (Dollars in thousands)           |    |   |     |                                      |    |   |  |    |                         |  |
|----------------------------------|----|---|-----|--------------------------------------|----|---|--|----|-------------------------|--|
| Fiscal Year<br>Ending<br>June 30 |    | Total<br>OPEB<br>Liability<br>(TOL)*<br>A | Pla | an Fiduciary<br>Net<br>Position<br>B |    | Employers<br>Net<br>OPEB<br>Liability<br>(NOL)<br>(A-B) | Plan Fiduciary<br>Net Position<br>(FNP) as a %<br>of<br>Total OPEB<br>Liability<br>(B/A) |    | Covered<br>Payroll<br>C | Net OPEB<br>Liability as a<br>% of Covered<br>Payroll<br>[(A-B)/C] |
| 2024                             | \$ | 5,546,693                                 | \$  | 3,317,711                            | \$ | 2,228,982   | 59.8   | \$ | 4,140,446               | 53.8   |
| 2023                             |    | 5,179,049                                 |     | 2,743,413                            |    | 2,435,636   | 53.0   |    | 3,977,280               | 61.2   |

#### Net OPEB Liability of Employers (Dollars in thousands)

\*The TOL includes the additional consideration for the current treatment of KEHP implicit subsidies that may be needed in the future. This is an additional liability from Health Insurance Trust accrued liabilities.

# Actuarial Assumptions

A summary of the actuarial assumptions as of the latest actuarial valuation follows.

| Valuation date                  | June 30, 2023   |
|---------------------------------|---|
| Investment rate of return       | 7.1%, net of OPEB plan investment expense, including inflation                        |
| Projected salary increases      | 3.0 - 7.5%, including wage inflation  |
| Inflation rate                  | 2.5%  |
| Real wage growth                | 0.25%   |
| Wage inflation                  | 2.75%   |
| Municipal bond index rate       | 3.94%   |
| Discount rate                   | 7.1%  |
| Single equivalent interest rate | 7.1%, net of OPEB plan investment expense, including price inflation                  |
| Health care cost trends         |   |
| Medical trend                   | 6.5% for fiscal year 2024, decreasing to an ultimate rate of 4.5% by fiscal year 2031 |
| Medicare Part B premiums        | 5.92% for fiscal year 2024, with an ultimate rate of 4.5% by 2035                     |

Mortality rates were based on the Pub2010 (Teachers Benefit-Weighted) Mortality Table projected generationally with MP-2020 with various set-forwards, set-backs and adjustments for each of the groups; service, retirees, contingent annuitants, disabled retirees and active members. The demographic actuarial assumptions for retirement, disability incidence, withdrawal, rates of plan participation and rates of plan election used in the June 30, 2023, valuation were based on the results of the most recent actuarial experience study for the system, which covered the five-year period ending June 30, 2020, adopted by the board on September 20, 2021. The remaining actuarial assumptions (e.g., initial per capita costs, health care cost trends) used in the June 30, 2023, valuation of the health trust were based on a review of recent plan experience done concurrently with the June 30, 2023, valuation. The health care cost trend rate assumption was updated for the June 30, 2023, valuation and was shown as an assumption change in the total OPEB liability (TOL) roll-forward while the change in initial per capita claims costs were included with experience in the TOL roll-forward. The Municipal Bond Index Rate used for this purpose is the June average of the Bond Buyer General Obligation 20-year Municipal Bond Index published weekly by the Board of Governors of the Federal Reserve System.

# **Target Allocations**

**68** 

The long-term expected rate of return on OPEB investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and best estimates of arithmetic real rates of return for each major asset class, as provided by TRS's investment consultant, are summarized in the following table.

| Asset<br>Class                 | Target<br>Allocation<br>Percentage | Long-Term Expected Real<br>Rate Percentage of Return |
|--------------------------------|------------------------------------|--|
| U.S. large cap equity          | 35.4                               | 5.0  |
| U.S. small cap equity          | 2.6                                | 5.5  |
| Developed international equity | 15.0                               | 5.5  |
| Emerging markets equity        | 5.0                                | 6.1  |
| Fixed income                   | 9.0                                | 1.9  |
| High yield bonds               | 8.0                                | 3.8  |
| Other additional categories    | 9.0                                | 3.7  |
| Real estate                    | 6.5                                | 3.2  |
| Private equity                 | 8.5                                | 8.0  |
| Cash                           | 1.0                                | 1.6  |
| Total                          | 100.0                              | =  |

# **Discount Rate**

The discount rate used to measure the TOL as of the measurement date was 7.1%. The projection of cash flows used to determine the discount rate was performed in accordance with GASB Statement No. 74. The projection's basis was an actuarial valuation performed as of June 30, 2023. In addition to the actuarial methods and assumptions of the June 30, 2023, actuarial valuation, the following actuarial methods and assumptions were used in the projection of cash flows:

- Total payroll for the initial projection year consists of the payroll of the active membership present on the valuation date. In subsequent projection years, total payroll was assumed to increase annually at a rate of 2.75%.
- The KEHP group retiree health care costs for members retired on or after July 1, 2010, were assumed to be paid by either the state or the retirees themselves.
- As administrative expenses, other than the administrative fee of \$8.00 per member per month (PMPM) paid to KEHP by TRS, were assumed to be paid in all years by the employer as they come due, they were not considered.
- Cash flows occur midyear.
- Future contributions to the Health Insurance Trust were based upon the contribution rates defined in statute and the projected payroll of active employees. Per KRS 161.540(1)(e) and 161.550(4), when the health trust achieves a sufficient funded status, as determined by TRS's actuary, the following health trust statutory contributions are to be decreased, suspended or eliminated:
  - Employee contributions
  - School district and university employer contributions
  - State contributions for KEHP premium subsidies payable to retirees who retire after June 30, 2010

To reflect these adjustments, open group projections were used and assumed an equal, pro rata reduction to the current statutory amounts in the years if the health trust is projected to achieve a funded ratio of 100% or more. Here, the current statutory amounts are adjusted to achieve total contributions equal to the actuarially determined contribution, as determined by the prior year's valuation and in accordance with the health trust's funding policy. As the specific methodology to be used for the adjustments has yet to be determined, there may be differences between the projected results and future experience. This also may include any changes to retiree contributions for KEHP coverage pursuant to KRS 161.675(4)(b).

- In developing the adjustments to the statutory contributions in future years, the following was assumed:
  - Liabilities and cash flows are net of expected retiree contributions and any implicit subsidies attributable to coverage while participating in KEHP.
  - For the purposes of developing estimates for new entrants, active headcounts were assumed to remain flat for all future years.

Based on these assumptions, the Health Insurance Trust's FNP was not projected to be depleted.

70

The FNP projections are based upon the health trust's financial status on the valuation date; the indicated set of methods and assumptions; and the requirements of GASB Statement No. 74. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing basis, reflecting the impact of future members. Therefore, the results of these tests do not necessarily indicate whether or not the health trust will actually run out of money, the financial condition of the trust, or the trust's ability to make benefit payments in future years.

These paragraphs require disclosure of the sensitivity of the NOL to changes in the health care cost trend rates and the discount rate for the Health Insurance Trust. The following exhibits present the NOL of the trust, calculated using the health care cost trend rates, as well as what the trust's NOL would be if it were calculated using a health care cost trend rate that is 1% lower or 1% higher than the current rate. Similarly, the exhibits present the NOL of the trust, calculated using the single equivalent interest rate (SEIR), as well as what the NOL would be if it were calculated using a discount rate that is 1% lower or 1% higher than the current SEIR.

#### Schedule of Net OPEB Liability and Health Care Cost Trend Rates 2024

|                      | 1% Increase (8.1%)    | \$                           | \$ | 1,859,473 | \$          |  |  |
| <b>Discount Rate</b> | <b>Current (7.1%)</b> | 1,753,458                    |    | 2,435,636 | 3,285,081   |  |  |
|                      | 1% Decrease (6.1%)    |                              |    | 3,132,761 |             |  |  |

The TOL of the Health Insurance Trust for 2024 is based upon an actuarial valuation performed as of the valuation date, June 30, 2023. An expected TOL is determined as of June 30, 2024, using standard roll-forward techniques. The roll-forward calculation begins with the TOL, as of June 30, 2023, subtracts the actual benefit payments (net of retiree contributions, if applicable) for the year, applies interest at the discount rate for the year and then adds the annual normal cost (also called the service cost). If applicable, actuarial gains and losses arising from the difference between estimates and actual experience (excluding amounts related to benefit changes and changes in assumptions or other inputs) are reconciled to the TOL as of the measurement date. Last, any changes of assumptions or other inputs are reflected. The procedure used to determine the TOL of the health trust, as of June 30, 2024, is shown in the following table.

# **TOL Roll-Forward 2024**

(In thousands)

|  | Expected        | Actual          |
|--|-----------------|-----------------|
| (a) TOL as of June 30, 2023*   | \$<br>5,179,049 | \$<br>5,023,491 |

| (f) Changes of assumptions**   | 184,394         | 184,394         |
| (g) TOL rolled forward to June 30, 2024<br>= $(a) + (b) + (c) + (d) + (e) + (f)$ | <br>5,713,295   | 5,546,693       |
| (h) Difference between expected and actual experience (gain) loss                |                 | \$<br>(166,602) |

\* The TOL used in the roll-forward as of June 30, 2023, is calculated using the discount rate as of the prior measurement date.

\*\* The health care trend rates and morbidity factors, were updated to reflect future anticipated experience.

The TOL of the Health Insurance Trust for 2023 is based upon an actuarial valuation performed as of the June 30, 2022, valuation date. An expected, TOL was determined as of June 30, 2023, using standard roll-forward techniques. The roll-forward calculation begins with the TOL, as of June 30, 2022, subtracts the actual benefit payments (net of retiree contributions, if applicable) for the year, applies interest at the discount rate for the year and then adds the annual normal cost (also called the service cost). If applicable, actuarial gains and losses arising from the difference between estimates and actual experience (excluding amounts related to benefit changes and changes in assumptions or other inputs) are reconciled to the TOL as of the measurement date. Last, any changes of assumptions or other inputs are reflected. The procedure used to determine the TOL of the health trust, as of June 30, 2023, is shown in the following table.

# **TOL Roll-Forward 2023**

(In thousands)

|  | <br>Expected    | Actual     |     |
|--|-----------------|------------|-----|
| (a) TOL as of June 30, 2022*   | \$<br>4,751,706 | \$ 4,660,0 | 37  |
| (b) Actual benefit payments and refunds for July 1, 2022-June 30, 2023           | (124,866)       | (124,8     | 66) |
| (c) Interest on TOL = $[(a) \times (0.071)] + [(b) \times (0.0355)]$             | 332,938         | 326,4      | 30  |
| (d) Service cost for July 1, 2022-June 30, 2023 at the end of the year           | 120,458         | 120,4      | 58  |
| (e) Changes of benefit terms   |                 |            |     |
| (f) Changes of assumptions**   | <br>196,990     | 196,9      | 90  |
| (g) TOL rolled forward to June 30, 2023<br>= $(a) + (b) + (c) + (d) + (e) + (f)$ | 5,277,226       | 5,179,0    | 49  |
| (h) Difference between expected and actual experience (gain) loss                |                 | \$ (98,1   | 77) |

\* The TOL used in the roll-forward as of June 30, 2022, is calculated using the discount rate as of the prior measurement date.

\*\* The health care trend rates, as well as the TRS 4 retirement decrements, were updated to reflect future anticipated experience.

# Note 9 Other Postemployment Benefits (OPEB) — Life Insurance Trust

# **Plan Description**

TRS administers the Life Insurance Trust as provided by KRS 161.655 to provide life insurance benefits to retired and active members. This benefit is financed by actuarially determined contributions from the 202 participating employers. The benefit is \$5,000 for members who are retired for service or disability and \$2,000 for active contributing members who began participating before Jan. 1, 2022. For TRS 4 members, the life insurance benefit payable upon the death of a member is \$5,000 for active contributing members and \$10,000 for retired or disabled members.

# Net OPEB Liability of Employers

The net OPEB liability (NOL) (i.e., the system's liability determined in accordance with GASB Statement No. 74 less the fiduciary net position) for the life insurance fund as of June 30, 2024, and 2023 follows.

# Schedule of Net OPEB Liability of Employers (Dollars in thousands)

| Year<br>Ended<br>June 30 | Total<br>OPEB<br>Liability<br>(TOL)<br>A | P  | an Fiduciary<br>Net<br>Position<br>B | Employers<br>Net<br>PEB Liability<br>(NOL)<br>(A-B) | Plan Fiduciary<br>Net Position<br>(FNP) as a % of<br>Total OPEB<br>Liability<br>(B/A) | Covered<br>Payroll<br>C | Net OPEB<br>Liability as a<br>% of Covered<br>Payroll<br>[(A-B)/C] |
|--------------------------|--|----|--------------------------------------|---|---|-------------------------|--|
| 2024                     | \$<br>126,072                            | \$ | 101,559                              | \$<br>24,513  | 80.6  | \$<br>4,140,446         | 0.6  |
| 2023                     | 122,254                                  |    | 94,030                               | 28,224  | 76.9  | 3,977,280               | 0.7  |

# **Actuarial Assumptions**

A summary of the actuarial assumptions as of the latest actuarial valuation is shown below.

| Valuation date                  | June 30, 2023  |
|---------------------------------|--|
| Investment rate of return       | 7.1%, net of OPEB plan investment expense, including inflation.      |
| Projected salary increases      | 3 - 7.5%, including wage inflation                                   |
| Inflation rate                  | 2.5%   |
| Real wage growth                | 0.25%  |
| Wage inflation                  | 2.75%  |
| Municipal bond index rate       | 3.94%  |
| Discount rate                   | 7.1%   |
| Single equivalent interest rate | 7.1%, net of OPEB plan investment expense, including price inflation |

Mortality rates were based on the Pub2010 (Teachers Benefit-Weighted) Mortality Table projected generationally with MP-2020 with various set-forwards set-backs and adjustments for each of the groups: service, retirees, contingent annuitants, disabled retirees and active members. The demographic actuarial assumptions for retirement, disability incidence, withdrawal, rates of plan participation and rates of plan election used in the June 30, 2023, valuation were based on the results of the most recent actuarial experience study for the system, which covered the five-year period ending June 30, 2020, adopted by the board on September 20, 2021. The Municipal Bond Index Rate used for this purpose is the June average of the Bond Buyer General Obligation 20-year Municipal Bond Index published weekly by the Board of Governors of the Federal Reserve System.

# **Target Allocations**

72

The long-term expected rate of return on OPEB investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The

| Asset Class             | Target<br>Allocation Percentage | Long-Term Expected Real<br>Rate Percentage of Return |
|-------------------------|---------------------------------|--|
| U.S. equity             | 40.0                            | 5.2  |
| International equity    | 15.0                            | 5.5  |
| Emerging markets equity | 5.0                             | 6.1  |
| Fixed income            | 21.0                            | 1.9  |
| Real estate             | 7.0                             | 3.2  |
| Private equity          | 5.0                             | 8.0  |
| Additional categories   | 5.0                             | 4.0  |
| Cash                    | 2.0                             | 1.6  |
| Total                   | 100.0                           |  |

target allocation and best estimates of arithmetic real rates of return for each major asset class, as provided by TRS's investment consultant, are summarized in the following table.

# **Discount Rate**

The discount rate used to measure the total OPEB liability (TOL) as of the measurement date was 7.1%. The projection of cash flows used to determine the discount rate was performed in accordance with GASB Statement No. 74. The projection's basis was an actuarial valuation performed as of June 30, 2023. In addition to the actuarial methods and assumptions of the June 30, 2023, actuarial valuation, the following actuarial methods and assumptions were used in the projection of the life insurance cash flows:

- Total payroll for the initial projection year consists of the payroll of the active membership present on the valuation date. In subsequent projection years, total payroll was assumed to increase annually at a rate of 2.75%.
- The employer will contribute the ADC in accordance with the Life Insurance Trust's funding policy (Schedule E) determined by a valuation performed on a date two years prior to the beginning of the fiscal year in which the ADC applies.
- As administrative expenses were assumed to be paid in all years by the employer as they come due, they were not considered.
- Active employees do not contribute to the plan.
- Cash flows occur midyear.

Based on these assumptions, the Life Insurance Trust's fiduciary net position (FNP) was not projected to be depleted.

The FNP projections are based upon the Life Insurance Trust's financial status on the valuation date; the indicated set of methods and assumptions; and the requirements of GASB Statement No. 74. As such, the FNP projections are not reflective of the cash flows and asset accumulations that would occur on an ongoing basis, reflecting the impact of future members. Therefore, the results of these tests do not necessarily indicate whether the Life Insurance Trust actually will run out of money, the financial condition of the trust, or the trust's ability to make benefit payments in future years.

These paragraphs require disclosure of the sensitivity of the NOL to changes the discount rate for the Life Insurance Trust. The schedules below presents the NOL of the trust calculated using the SEIR, as well as what the trust's NOL would be if it were calculated using a discount rate that is 1% lower or 1% higher than the current SEIR.

| Schedule                 | of Net OPEB Liab<br>(In thousands) | ility 2024               |
|--------------------------|------------------------------------|--------------------------|
| 1%<br>Decrease<br>(6.1%) | Current<br>Discount Rate<br>(7.1%) | 1%<br>Increase<br>(8.1%) |
| \$42,041                 | \$24,513                           | \$10,327                 |
| Schedule                 | of Net OPEB Liab<br>(In thousands) | ility 2023               |
| 1%<br>Decrease<br>(6.1%) | Current<br>Discount Rate<br>(7.1%) | 1%<br>Increase<br>(8.1%) |
| \$45,402                 | \$28,224                           | \$14.326                 |

The TOL of the Life Insurance Trust for 2024 is based upon an actuarial valuation performed as of the valuation date, June 30, 2023. An expected TOL is determined as of June 30, 2024, using standard roll-forward techniques. The roll-forward calculation begins with the TOL, as of June 30, 2023, subtracts the actual benefit payments (net of retiree contributions, if applicable) for the year, applies interest at the discount rate for the year and then adds the annual normal cost (also called the service cost). If applicable, actuarial gains and losses arising from the difference between estimates and actual experience (excluding amounts related to benefit changes and changes in assumptions or other inputs) are reconciled to the TOL as of the measurement date. Last, any changes of assumptions or other inputs are reflected. The procedure used to determine the TOL of the Life Insurance Trust, as of June 30, 2024, is shown in the following table.

# TOL Roll-Forward 2024

(In thousands)

|     |  | E  | xpected    | Actual  |
|-----|--|----|------------|---------|
| (a) | TOL as of June 30, 2023*   | \$ | 122,254 \$ | 122,611 |
| (b) | Actual benefit payments and refunds for July 1, 2023-June 30, 2024 |    | (6,106)    | (6,106) |
| (c) | Interest on TOL = $[(a) \times (0.071)] + [(b) \times (0.0355]]$   |    | 8,463      | 8,489   |
| (d) | Service cost for July 1, 2023-June 30, 2024                        |    | 1,078      | 1,078   |
| (e) | Changes of benefits terms  |    |            |         |
| (f) | Changes of assumptions   |    | —          | —       |
| (g) | TOL rolled forward to June 30, 2024<br>=(a)+(b)+(c)+(d)+(e)+(f)    | \$ | 125,689 \$ | 126,072 |
| (h) | Difference between expected and actual experience (gain) loss      |    | \$         | 383     |

\* The TOL used in the roll-forward as of June 30, 2023, is calculated using the discount rate as of the prior measurement date.

The TOL of the Life Insurance Trust for 2023 is based upon an actuarial valuation performed as of the June 30, 2022, valuation date. An expected TOL is determined as of June 30, 2023, using standard roll-forward techniques. The roll-forward calculation begins with the TOL, as of June 30, 2022, subtracts the actual benefit payments (net of retiree contributions, if applicable) for the year, applies interest at the discount rate for the year and then adds the annual normal cost (also called the service cost). If applicable, actuarial gains and losses arising from the difference between estimates and actual experience (excluding amounts related to benefit changes and changes in assumptions or other inputs) are reconciled to the TOL as of the measurement date. Last, any changes of assumptions or other inputs are reflected. The procedure used to determine the TOL of the trust, as of June 30, 2023, is shown in the following table.

# **TOL Roll-Forward 2023**

| (In thousand |
|--------------|
|--------------|

|     |  | F  | Expected   | Actual  |
|-----|--|----|------------|---------|

# Net Pension Liability

The total pension liability contained in the following schedule was provided by TRS's actuary, Cavanaugh Macdonald Consulting. The net pension liability is measured as the total pension liability less the amount of the fiduciary net position of the system.

Changes of Benefit Terms. The TRS 4 benefit tier was added for members joining the system on and after Jan. 1, 2022.

**Changes of assumptions.** In the 2020 experience study, rates of withdrawal, retirement, disability, mortality and salary increase were adjusted to more closely reflect actual experience. The expectation of mortality was changed to the Pub2010 Mortality Tables (Teachers Benefit-Weighted) projected generationally with MP-2020 with various set forwards, set-backs and adjustments for each of the groups: service retirees, contingent annuitants, disabled retirees and actives. The assumed long-term investment rate of return was changed from 7.5% to 7.1% and the price inflation assumption was lowered from 3% to 2.5%.

In the 2016 valuation, rates of withdrawal, retirement, disability, mortality and salary increase were adjusted to more closely reflect actual experience. In the 2016 valuation and later, the expectation of retired life mortality was changed to the RP-2000 Mortality Tables projected to 2025 with projection scale BB, set forward two year for males and one year for females rather than the RP-2000 Mortality Tables projected to 2020 with projection scale AA, which was used prior to 2016.

In the 2011 valuation, rates of withdrawal, retirement, disability and mortality were adjusted to more closely reflect actual experience. In the 2011 valuation and later, the expectation of retired life mortality was changed to the RP-2000 Mortality Tables projected to 2020 with projection scale AA, set back one year for females rather than the 1994 Group Annuity Mortality Tables which was used prior to 2016. For the 2011 valuation through the 2013 valuation, an interest smoothing methodology was used to calculate liabilities for purposes of determining the actuarially determined contributions.

# Schedule of Employer Contributions

(Dollars in thousands)

See accompanying independent auditor's report.

# **Actuarial Methods and Assumptions**

The actuarially determined contribution rates in the Schedule of Employer Contributions are calculated as of June 30 on the three years prior to the end of the fiscal year in which contributions are reported. The following actuarial methods and assumptions were used to determine contribution rates reported in the most recent year of the schedule.

| Actuarial cost method         | Entry age   |
|-------------------------------|---|
| Amortization period           | Level percentage of payroll, closed                               |
| Remaining amortization period | 22.9 years  |
| Asset valuation method        | 5-year smoothed fair value  |
| Inflation                     | 2.5%  |
| Salary increase               | 3.0 to 7.5%, including inflation                                  |
| Investment rate of return     | 7.1%, net of pension plan investment expense, including inflation |
|                               |   |

# **Schedule of Investment Returns**

Percentage shown is annual money-weighted rate of return, net of investment expense.

| 2024   | 2023   | 2022     | 2021  | 2020 | 2019  | 2018   | 2017   | 2016    | 2015  |
|--------|--------|----------|-------|------|-------|--------|--------|---------|-------|
| 11.91% | 10.24% | (10.91)% | 29.6% | 5%   | 5.56% | 10.50% | 15.00% | (1.32)% | 4.96% |

# Schedule of Changes in Net OPEB Liability

Schedule is intended to show information for 10 years. Future years will be displayed as they become available. See accompanying independent auditor's report.

# **Net OPEB Liability**

The net OPEB liability contained in the following schedule was provided by TRS's actuary, Cavanaugh Macdonald Consulting. The net OPEB liability is measured as the total OPEB liability less the amount of the fiduciary net position of the system.

# Changes of benefit terms.

June 30, 2024 (Valuation Date: June 30, 2023)

None •

# Changes of assumptions.

June 30, 2024 (Valuation Date: June 30, 2023)

The health care trend rates, as well as morbidity factors, were updated to reflect future anticipated experience. •

# **Actuarial Methods and Assumptions**

The Health Insurance Trust is funded based on statutorily determined amounts as described in Note 8. The Schedule of Employer Contributions details the statutorily determined amounts for the Health Trust.

# **Schedule of Investment Returns**

Percentage shown is annual money-weighted rate of return, net of investment expense.

#### **Net OPEB Liability**

The net OPEB liability contained in the following schedule was provided by TRS's actuary, Cavanaugh Macdonald Consulting. The net OPEB liability is measured as the total OPEB liability less the amount of the fiduciary net position of the system.

#### Changes of benefit terms.

#### **Actuarial Methods and Assumptions**

86

The actuarially determined contribution rates in the schedule of employer contributions are calculated as of June 30, 2021 valuation date. The following actuarial methods and assumptions were used to determine contribution rates reported in the most recent year of the schedule.

| Actuarial cost method  | Entry age normal                      |
|------------------------|---------------------------------------|
| Amortization method    | Level percentage of payroll           |
| Amortization period    | 23 years, closed                      |
| Asset valuation method | 5-year smoothed fair value            |
| Inflation              | 2.5%                                  |
| Real wage growth       | 0.25%                                 |
| Wage inflation         | 2.75%                                 |
| Salary increase        | 3.0 to 7.5%, including wage inflation |
| Discount rate          | 7.1%                                  |
|                        |                                       |

# **Schedule of Investment Returns**

| Percentage shown is annual money-weighted rate of return, net of investment expense. |       |          |        |       |       |  |  |
|--|-------|----------|--------|-------|-------|--|--|
| 2024   | 2023  | 2022     | 2021   | 2020  | 2019  |  |  |
| 11.18%   | 9.63% | (14.96)% | 28.17% | 6.32% | 6.49% |  |  |

TRS began separate reporting of its Life Insurance Trust effective Feb. 1, 2018. Previously, it was reported as part of the pension fund's gross and net performance. This schedule will show more history of the trust as it becomes available. See accompanying independent auditor's report.

# **Additional Supporting Schedules**

# ALLISON BALL AUDITOR OF PUBLIC ACCOUNTS

# Report On Internal Control Over Financial Reporting And On Compliance And Other Matters Based On An Audit Of Financial Statements Performed In Accordance With *Government Auditing Standards*

Independent Auditor's Report

To the Board of Trustees Teachers' Retirement System of the State of Kentucky Frankfort, Kentucky

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Teachers' Retirement System of the State of Kentucky (TRS) as of and for the year ended June 30, 2024, and the related notes to the financial statements, which collectively comprise TRS's basic financial statements, and have issued our report thereon dated November 15, 2024.

# Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered TRS's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of TRS's internal control. Accordingly, we do not express an opinion on the effectiveness of TRS's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Report On Internal Control Over Financial Reporting And On Compliance And Other Matters Based On An Audit Of Financial Statements Performed In Accordance With *Government Auditing Standards* (Continued)

# **Report on Compliance and Other Matters**

As part of obtaining reasonable assurance about whether TRS's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

# **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Respectfully Submitted,

# **Report on Investment Activity**

This report is prepared by the investment staff of the Teachers' Retirement System of the State of Kentucky (TRS).

The basis of presentation for this section is data made available through Broadridge Investment Accounting systems, the Bank of New York Mellon and Segal Marco Advisors. Rates of return are time-weighted and are gross of fees unless otherwise indicated. Returns of periods longer than one year are annualized.

October 1, 2024

#### To the members of the Board of Trustees and participants of the Teachers' Retirement System of Kentucky:

The Teachers' Retirement System of the State of Kentucky (TRS) investment program produced a total return of 12.3% for the fiscal year ended June 30, 2024, ranking in the top 10<sup>th</sup> percentile of a universe of U.S. public pension plans with assets greater than \$1 billion. Despite this strong absolute return and peer ranking, the investment program lagged the return of the Policy Benchmark by 1.5 percentage points for the fiscal year. The public equity portfolio contributed to the strong absolute results due to easing inflation data, signs of economic resilience, and rallies from mega cap technology stocks. The relative performance was mainly driven by the private equity portfolio's performance relative to its benchmark (i.e., public equity market proxy plus a premium) and overweight to the real estate allocation relative to policy. The investment program has produced strong performance relative to peers over the long term, ranking near the top of the public pension fund universe over the trailing 10-year period (8<sup>th</sup> percentile ranking).

Over the past fiscal year, the equity markets performed well as economic data exceeded expectations. Inflation, as measured by the Consumer Price Index, rose by 3.0% annually in June 2024, which was down from the 3.4% recorded in December 2023. U.S. gross domestic product grew at an annual pace of 3.0% in June 2024, which was higher than economists' forecast. Within the global equity market, growth stocks significantly outperformed value stocks led by mega cap technology stocks, which performed strongly over the past 12 months. Given more exposure to the technology sector, the U.S. equity market performed better than the non-U.S. equity market. The TRS U.S. equity portfolio advanced 22.5% for the fiscal year, while the international equity portfolio returned 8.6%.

In the bond market, the 10-year U.S. Treasury yield ended the fiscal year at 4.36%, 55 basis points higher than the beginning of the fiscal year. The TRS fixed income portfolio returned 3.6% for the fiscal year and outperformed the Bloomberg U.S. Government/Credit Index by approximately 90 basis points. The additional categories asset class, which is generally comprised of alternative fixed income, private credit and below investment grade bonds, produced a positive return of 9.7% for the fiscal year as credit spreads tightened.

The real estate market struggled during the fiscal year due to an increase in the cost of debt. TRS's real estate allocation returned -5.2% in the fiscal year but outperformed its benchmark by 2.6 percentage points. Over the past 10 years, TRS has diversified its alternatives portfolio across different private equity and infrastructure strategies, resulting in a fiscal year return of 7.8% on a time-weighted basis.

We would like to thank the Board of Trustees, Investment Committee, and Investment Staff for their confidence. We appreciate the opportunity to assist TRS in meeting its investment goals.

Respectfully,

Vature Q. Thelly

# **Retirement Annuity Trust**

# **Investment Policy Summary**

The TRS Board of Trustees has a statutory obligation under KRS 161.430 to invest the members' assets in a manner consistent with the fiduciary standards set forth in the prudent person rule. Consistent with this statute, 102 Kentucky Administrative Regulation (KAR) 1:175 establishes investment policies for this trust. In conjunction with these standards, the board has recognized certain principles that guide investment-related decisions. First, the board will preserve the long-term corpus of the fund. Second, the board will seek to maximize total investment return within prudent risk parameters. Third, the board will act in the exclusive interest of the members and beneficiaries of the system. This broad summary is a reference point for management of retirement assets and outlines the investment philosophy and practice of TRS.

# **Investment Objectives**

TRS invests the members' funds in several diverse classes of assets, including equities, bonds and real estate. This diversification helps us earn the highest possible long-term rate of return within appropriate risk levels. In turn, this enables TRS to pay guaranteed benefits to members and their beneficiaries at the lowest possible cost to participating employers and taxpayers. Generally, the retirement system's liabilities will not be paid for as many as 30 to 40 years. Therefore, as a long-term investor, TRS holdings can withstand some short-term volatility. The Retirement Annuity Trust's long-term investment objective is to achieve an annualized rate of return of 7.1%.

# **Risk Controls**

The TRS investment program faces various risks; however, the primary risk to TRS is that the assets will not support liabilities over long periods of time. In order to control this risk and any other risks, the board has taken the following steps on an ongoing basis:

- Actuarial valuations are performed each year to evaluate the funding objectives of TRS. In addition, every 10 years an
  external audit of the actuary is conducted to ensure that the assumptions made and calculation methods used are resulting
  in properly computed liabilities of the system. Also, every two years, the actuary conducts a review of economic
  assumptions and incorporates any changes into valuations.
- Asset-liability modeling studies are conducted approximately every five years. These studies ensure that the portfolio design is structured to meet the liabilities of TRS.
- In accordance with 102 KAR 1:175, the Investment Committee adopts and regularly reviews detailed investment strategies for implementation of the investment policy.

#### Asset Allocation

Operating within relevant regulatory limitations, TRS's investment consultant annually presents for approval to the Investment Committee target percentages and ranges for the system's various asset classes. These regulatory limitations include both the Retirement Annuity Trust and the Life Insurance Trust. Annually approved asset allocation parameters serve to balance TRS's liquidity requirements, volatility tolerance and return requirements to meet both short-term and long-term obligations. TRS's assets are diversified across a variety of asset classes, investment management styles and individual securities in order to reduce volatility and enhance the potential of the investment portfolio to achieve the system's long-term goals.

Asset allocation decisions for pension plans are dependent on the unique characteristics of a particular plan. Factors such as liability requirements, the level of funding and statutory investment restrictions are considerations within the context of the asset allocation decision-making process. Consequently, asset allocations may differ between various pension plans due to their unique circumstances.

The information that follows shows the system's asset allocation by fair value for the Retirement Annuity Trust and the Life Insurance Trust as of June 30, 2024, and June 30, 2023, as well as the target and strategic range for each asset class for fiscal 2024.

# **Portfolio Results**

The Retirement Annuity Trust returns were generated by the Segal Marco Advisors performance reporting system using a timeweighted rate of return calculation based upon fair value. For the fiscal year, the Retirement Annuity Trust portfolio generated a total return of 12.27%, trailing the policy benchmark return of 13.81%. Domestic equity rose 22.47% versus 23.52% for the Standard & Poor's 1500 Index, while international equity rose 8.62% versus 12.17% for the MSCI All Country World ex-U.S. Index. Fixed income investments rose 3.53% versus a 2.74% rise for the Bloomberg Barclay's U.S. Government/Credit Index. Less traditional asset classes such as real estate, private equity, timberland and alternative credit are beginning to contribute meaningfully to total return as those programs are expanded.

General partner profit sharing, known as carried interest, for the Retirement Annuity Trust for fiscal year 2024 was a \$7.5 million, consisting by asset class of \$11.1 million in private equity, a decline of \$5 million in private real estate and \$1.4 million in private credit.

General partner profit sharing, known as carried interest, for the Life Insurance Trust for fiscal year 2024 was \$8,962, consisting by asset class of \$61,790 in private equity and a decline of \$52,828 in real estate.

The tables below detail historical performance for the Retirement Annuity Trust and the Life Insurance Trust and their component asset classes for the period ended June 30, 2024.

#### **Fixed Income Investments**

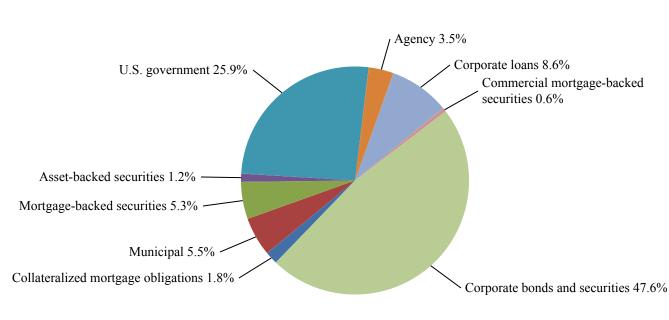

As of June 30, 2024, the Retirement Annuity Trust had about \$3.4 billion in fixed income, which is 13.3% of total assets. The fund's fixed income investments as of June 30, 2024, maintained the average investment grade rating required by administrative regulation.

In addition, the trust had \$2.75 billion, which is 10.7% of total assets, in other debt-related investments under a regulatory provision that allows for up to 15% of assets in additional categories approved by the board. Investments under this authorization included four high-yield bond portfolios and two syndicated bank loan portfolios. Several alternative credit portfolios also are under this additional categories provision, including distressed-debt and specialty-lending funds and a multiple strategy opportunistic credit portfolio. Timberland is also included in this category of investments.

The credit quality distribution for the annuity trust is illustrated below. This chart includes fixed income as well as the high-yield bonds, alternative credit portfolios and the syndicated bank loan portfolios that are included in additional categories. Also illustrated below is the distribution of fixed income assets by sector.

#### **Fixed Income Quality Distribution By Rating**

# **Fixed Income Sector Distribution**

# **Fixed Income Market Overview**

The Retirement Annuity Trust's investment-grade fixed income portfolios gained 3.53% for the year ended June 30, 2024, outpacing the trust's fixed income benchmark, the Bloomberg U.S. Government/Credit Index, which returned 2.75%. The outperformance was driven by TRS's overweighting in corporate bonds, which provided a higher coupon than government bonds of similar duration. Credit sensitive investments performed very well in the fiscal year as risk premiums fell, driving up corporate bond prices.

The first quarter saw mixed signals on the health of the economy. Those included an uptick in inflation, a downgrade to the U.S. debt rating and uncertainty about U.S. government funding. The prospect of a "higher-for-longer" interest rates led to increased market volatility and fixed income declines later in the quarter.

The Fed increased rates by 0.25% in July and made no change in September. The FOMC reaffirmed its dedication to returning inflation to the 2% target and suggested a more restrictive stance than previously anticipated was possible. Treasury yields rose steadily, with the 10-year increase of 0.78% ending at 4.59%. The yield curve became less inverted as investors sought higher income for longer maturities. The Bloomberg U.S. Government/Credit Index fell 3%, while the Bloomberg U.S. Corporate High Yield Index returned 0.5%, as lower-rated bonds outperformed during the quarter.

Fixed income surged in the second quarter, fueled by moderating economic data, cooling inflation and investor expectations of a soft landing for the U.S. economy. The Bloomberg U.S. Aggregate Bond Index gained 6.8% in the quarter. Longer duration assets responded to the rate environment and the potential for rate cuts in 2024 with sharply positive results in the quarter. The U.S. 10-year Treasury yield fell 0.71% during the period to end at 3.9%. Across risk sectors, spreads tightened and assets rallied amid falling rates. The Bloomberg U.S. Government/Credit Index returned 6.63% in the quarter, while the Bloomberg U.S. Corporate High Yield Index returned 7.2% buoyed by continued strength in corporate fundamentals across these segments.

The public fixed income market posted mixed results in the third quarter with yields increasing amid strong economic data and moderating expectations of future rate cuts. The broad fixed income market declined with shorter duration bonds outperforming longer maturity bonds, representing a trend change from late calendar 2023.

During the quarter, investors reacted to persistent inflation, a strong labor market and stable economic conditions. U.S. Treasury yields experienced a steady increase across the curve, with the 10-year yield rising by 0.32% to end at 4.2%. The Bloomberg U.S.

# **INVESTMENT SECTION**

Government/Credit Index fell 0.72%. Risk assets weathered rising rates, with lower-rated bonds outperforming. The Bloomberg U.S. Corporate Investment Grade Index declined 0.4%, while the Bloomberg U.S. Corporate High Yield Index returned 1.5%.

In the fourth quarter, the lack of monetary policy changes and persistently tight spreads among corporate debt led to marginally positive returns for broad fixed income indexes. Longer duration asset prices declined modestly as long-term Treasury yields rose throughout the quarter. Yields of shorter-dated Treasurys remained higher than longer-dated issues as the inverted yield curve marked a record 24 months. Inflationary conditions improved as highlighted by the personal consumption expenditures deflator reading of 2.6% in May.

While policy rates were unchanged, the fixed income market experienced volatility due to uncertainty around rate cuts and inflation data. U.S. Treasury yields experienced a steady increase across the curve, with the 10-year yield rising by 0.16% to end the quarter at 4.4%. The Bloomberg U.S. Government/Credit Index posted modestly positive returns of 0.05% in the quarter. Risk assets weathered rising rates, with lower-rated bonds outperforming the broad market. The Bloomberg U.S. Corporate Investment Grade Index declined 0.1%, while the Bloomberg U.S. Corporate High Yield Index returned 1.1%.

# **Equity Investments**

As of June 30, 2024, the Retirement Annuity Trust's public equity investments had a fair value of \$15.5 billion, representing 60.2% of total assets.

The domestic side of the public equity portfolio had a fair value of \$10.4 billion as of June 30, 2024, representing 40.4% of assets. The trust's U.S. equity portfolio returned 22.47% for the year and underperformed its policy benchmark, the Standard & Poor's (S&P) 1500, by 1.05 percentage points. The S&P 1500 consists of three well-known component indices based upon market capitalization: the S&P 500 Large Cap, the S&P 400 Mid Cap and the S&P 600 Small Cap. Twelve portfolios comprise the trust's domestic equity holdings. Three are internal passively managed index portfolios benchmarked to the S&P 400, S&P 500 and S&P 600. The other nine are managed externally by six different asset managers, with each portfolio representing a specific strategy and measured against an appropriate benchmark. The collective array of portfolios provides diversification by market capitalization, manager, style and strategy.

The Retirement Annuity Trust's international equity holdings as of June 30, 2024, had a fair value of \$5.1 billion, representing 19.9% of assets. The international equity portfolio returned 8.62%, an underperformance of 3.55 percentage points from its policy benchmark, the MSCI All Country World ex-U.S. Index that represents the markets of 22 developed countries and 24 emerging market countries. Five external asset managers manage the Retirement Annuity Trust's six international equity portfolios, one of which is a passively managed international index fund.

# **Equity Investments Overview**

The fiscal year opened with several economic factors at play. Investors in the first quarter grappled with an uptick in inflation, a downgrade to the U.S. debt rating, labor disputes and government funding uncertainty. These components led to a "higher-for-longer" outlook for interest rates, resulting in increased volatility and global equity market declines of 3.4%. Among investors, focus increased on the financial health of the U.S. consumer. Although wage growth exceeded expectations, concerns about a potential decline in consumer spending rose because of rising energy costs, rising mortgage rates and a resumption of student loan payments – after a multi-year pause. The Federal Open Market Committee (FOMC) paused rate hikes during its September meeting, marking only the second pause since March 2022. The Consumer Price Index (CPI) increased to 3.7% from 3% in the previous quarter, driven by rising energy prices. U.S. equity markets declined during the quarter as the performance of mega-cap companies was mixed and only the communications services and energy sectors gained. Large-cap stocks fared better than mid-and small-cap, while small-cap value stocks significantly outperformed growth stocks. On the international front, emerging markets also fell but outperformed its U.S. counterpart, while developed international markets lagged American counterparts. The U.S. Dollar Total Weighted Index appreciated.

In the second quarter, U.S. equity returns were positive as growth outpaced value within large-cap stocks, while small-cap stocks performed better than large-cap stocks. The manufacturing Purchasing Managers' Index (PMI) remained in contractionary territory at 47.4%, indicating cautious economic activities. In addition, wholesale prices, as measured by the Producer Prices Index, declined 0.2% year over year. Meanwhile, the services PMI being in expansionary territory and corporate earnings growth showed signs of economic resilience. In December, the Bureau of Labor Statistics revised downward both the previously announced October and November job gains, with job growth concentrated across a few industries. Investors continued to focus on inflation. After peaking in calendar 2022, inflation declined to levels closer to target ranges during 2023. The annual CPI level of 3.4% represented a significant drop compared to the CPI measure of 6.5% in December 2022. Internationally, developed international markets outpaced the first fiscal quarter with small-cap stocks outperforming large-cap stocks, while emerging

market equities lagged developed markets in the second quarter. Within developed international markets, Japan showed a strong equity market as investor confidence improved in response to shifts in monetary policy. France and Germany also were among countries with significant stock market gains. China's performance remained subdued because of lackluster consumer demand combined with elevated risks within its real estate sector. In contrast, other emerging market countries – including Brazil, India and Taiwan – saw equity market gains. The U.S. Dollar Total Weighted Index depreciated.

During the third quarter, U.S. equity markets gained significantly largely due to the further interest in and development of artificial intelligence. Large-cap stocks outperformed small-cap stocks, with growth stocks as the most significant contributors. Investors to monitored comments from members of the FOMC as inflation persisted above target ranges. CPI increased 3.5% compared to 5% for prior year's quarter. The view that the future interest rate cuts could be smaller was reinforced by inflation readings above consensus estimates in February and March and higher-than-expected job gains. Internationally, developed international markets gained with the MSCI EAFE returning 5.8%, while emerging market equity lagged developed markets with the MSCI Emerging Market Index returning 2.4%. The Swiss National Bank reduced policy rates in the quarter, while other central banks maintained policy rate levels. While China continued to target economic growth around 5%, the debt incurred by local government entities created uncertainty for the country's economic growth outlook. Concerns for the health of the Chinese property sector continued to weigh on investor's sentiment, although Chinese PMI data released in the quarter indicated that manufacturing and services entered into expansionary territory. The U.S. Dollar Total Weighted Index appreciated.

In the fourth quarter, positive equity performance was driven primarily by large-cap stocks linked to the continued relevancy of artificial intelligence. In contrast, small-cap stocks declined. The FOMC shifted toward a more accommodative policy stance. Although inflation remained above the Federal Reserve's 2% target, the 5-year break-even inflation rate, which reflects the difference between nominal and real Treasury yields, decreased to 2.28% by the end of the quarter, from 2.44% in the third. The unemployment rate saw a 0.3 percentage point increase, bringing it to 4.1% and signaling a potential warning sign for the economy that could lead to a rate cut. However, the Fed kept the Fed Funds Rate in the 5.25% to 5.5% range, citing insufficient evidence for a rate cut. Internationally, non-U.S. stocks underperformed U.S. equity, with the MSCI EAFE Index declining slightly. The European Central Bank cut rates for the first time since 2019, as inflation in the Eurozone began to ease. In emerging markets, Taiwan Semiconductor Manufacturing Co. accounted for a quarter of the gains during the timeframe. On the downside, concerns over potential reforms following Mexico's presidential election results challenged the U.S.'s southern neighbor. The U.S. Dollar Total Weighted Index appreciated.

In summary, U.S. equity gained notably, driven particularly by large-cap stocks tied to the adoption of and interest in artificial intelligence. Large-cap stocks saw substantial gains with the Magnificent Seven (Nvidia, Meta Platforms, Tesla, Amazon, Alphabet, Microsoft and Apple) being key contributors to overall market gains, while small-cap stocks generally lagged. Growth stocks significantly outperformed value stocks. The U.S. economy's strength, resilient labor markets and solid corporate earnings provided support for domestic equity, though persistent inflation and high interest rates continued to be central concerns for investors. Internationally, non-U.S. equity underperformed its American counterparts. Developed markets, particularly in Europe, saw modest returns, hindered by concerns over regional inflation and slowing growth. Developed markets, particularly in Europe and Japan, faced challenges but also showed pockets of resilience. Central bank policy shifts and inflationary pressures impacted European equity, but Japan stood out with stronger performance following its first rate hike in over a decade. Emerging markets also experienced mixed outcomes, as, for example, India saw strong results while China was weighed down by concerns over local debt and weaker-than-expected government stimulus. Additionally, the impact of global inflation, geopolitical tensions and fluctuating commodity prices influenced investor sentiment in both developed and emerging markets, leading to a year of uneven performance for international equity.

# **Real Estate**

The Retirement Annuity Trust's real estate investments had a fair value of \$1.71 billion as of June 30, 2024, representing 6.6% of total assets. The trust's real estate investments seek attractive long-term returns, generate reliable cash flow, provide diversification and serve to reduce overall portfolio volatility. TRS's combined real estate investments declined 5.11% for the fiscal year, compared to a 0.13% decline the previous year. The In-House Real Estate Equity Fund, gained 5.8%, beating the 5.04% return of its benchmark, the Consumer Price Index plus 2%. But core funds declined 9.41%, slightly trailing the NCREIF ODCE's decline of 9.26%. TRS's non-core funds dropped 6%, falling short of the NCREIF Property Index's (NPI) 5.53% decline.

The trust's real estate exposure is provided through 25 portfolios. The fund maintains an internally managed portfolio of directly owned properties under long-term leases with high-credit quality tenants. TRS Kentucky also is invested in three commingled, evergreen core real estate funds. Two are managed by Prudential Real Estate Investors (PRISA) and TA Realty (TA Core

# **INVESTMENT SECTION**

Property Fund). These funds are core real estate equity funds, which invest primarily in existing, income-producing properties with strong cash flows and the potential for capital appreciation. The third is invested in Carlyle Property Investors, a core-plus commingled fund. The funds are diversified across several property types, including office, retail, industrial, apartment, self-storage and hotel.

Additionally, the annuity trust is invested in 21 real estate limited partnerships: Carlyle Realty Partners VI, Carlyle Realty Partners VII, Carlyle Realty Partners VII, Carlyle Realty Partners IX, Blackstone Real Estate Partners VII, Blackstone Real Estate Partners X, Rockwood Capital Real Estate IX, Rockwood Capital Real Estate X, Rockwood Capital Real Estate X, Rockwood Capital Real Estate X, Rockwood Capital Realty Associates XII, TA Realty Associates XII, Angelo Gordon Net Lease Realty III, Angelo Gordon Net Lease Realty IV, Angelo Gordon Realty Value XI, Landmark Real Estate Partners VII, Landmark Real Estate Partners IX.

# **Real Estate Overview**

U.S. real estate fundamentals remained relatively healthy in fiscal 2024 despite a deceleration in some areas amid inflation, rising interest rates and shifts in consumer behavior. Industrial and multifamily real estate exhibited resilience even with increased vacancies. Retail fundamentals remained tight, and the office sector continued to face significant structural challenges.

Despite some deceleration in demand, U.S. industrial fundamentals remained resilient over the past 12 months. Vacancies increased around 1.35%, ending the fiscal year at mid-6% range. Annual rent growth decelerated to a still healthy 4%. This slowdown can be attributed to increased competition from new supply in some markets combined with weak, but improved, demand.

The U.S. multifamily market saw historic demand in the fiscal year's second half. Buoyed by a strong labor market and income growth, net absorption reached 170,000 units in the fiscal fourth quarter. Despite this demand, supply was slightly greater, including a record 186,000 units delivered in the second quarter.

The U.S. office market continued to face significant, post-pandemic challenges with signs of potential stabilization at fiscal year end. Tenant demand for the high-quality buildings pushed net absorption up 2 million square feet (msf) in the second quarter, breaking a two-year streak of occupancy declines. The vacancy rate reached a record 14% as the office market's occupancy losses reached nearly four times those recorded during the Great Recession.

The U.S. retail market remained tight as limited new deliveries and steady demand kept space available for lease at near record lows of 4%. Over the fiscal year, approximately 60 msf of retail space was delivered, 40% below the 10-year average.

While transaction volume and pricing have remained depressed, the fourth quarter began to show signs of improvement. Investment activity and pricing both broke a streak of declines as debt market conditions improved, showing better pricing and liquidity with evidence of spread compression. U.S. sales volume totaled \$93 billion for the quarter, down just 2% year-over-year and the slowest decline since the second half of 2022. The fourth fiscal quarter volume increased 14% in volume over the third quarter.

#### **Alternative Investments**

As of June 30, 2024, the Retirement Annuity Trust's alternatives portfolio of private equity investments had a market value of \$2.08 billion, representing 8.1% of the trust's assets.

#### **Private Equity**

The annuity trust has exposure to venture, buyout, infrastructure, energy, mezzanine and several other private equity sectors via participation in limited partnerships as well as investments in funds of funds. The trust has a robust private equity investment program, which is intended to continue growing with a disciplined plan of commitments each year. The trust looks to diversify its private equity portfolio by manager, country, strategy and vintage year. Vintage year diversification is achieved with disciplined levels of commitments over time. A commitment to any given partnership shall not exceed 20% of the partnership's total commitments.

The board, Investment Committee and staff understand that private equity investments (along with many other forms of alternative assets) are illiquid and have a long-term holding period. When added to a portfolio with other publicly traded assets, this asset class can help to diversify and reduce risk for the Retirement Annuity Trust's overall portfolio while enhancing returns. Private equity returns for the first several years of a partnership's life routinely are negative due to the J-curve effect (initial losses

followed by significant gains). Positive returns typically are realized only several years into a partnership's existence, during the harvesting period.

# Private Equity Market Overview

Elevated interest rates have had a negative impact on the private equity environment, particularly because of a lack of liquidity for underlying portfolio companies. In calendar 2023, exits dropped from their 2021 highs to the averages seen in the previous 10 years. The last half of fiscal 2024 followed with some of the lowest exit values over the past decade. The secondary space continues to be a bright spot in private equity as many investors were able to achieve partial or full liquidity through selling holdings in the secondary market.

# Timberland

As of June 30, 2024, the Retirement Annuity Trust owned about 225,000 acres of timberland outright and about 26,000 acres in a timberland joint venture located across four southern states. Timberland is, by nature, a long-term investment as the anticipated time horizon in this asset category generally is a minimum of 10 to 15 years. Timberland provides valuable diversification, current income and a balance against inflation. Due to the low correlation of returns with other asset classes, timberland investments generally lessen the overall volatility of the annuity trust's portfolio. Timberland should earn real returns comparable to traditional equity investments with volatility between equity and fixed income over the long term.

The trust diversifies its timberland investments by geography, species of trees and maturity of timber stands. Investment returns from timberland primarily are driven from net cash flow generated from the sale of trees (referred to as stumpage sales) and capital appreciation from the biological growth of the trees. These return factors depend to some degree upon the direction of forest commodity prices (paper goods and lumber products). Gains also can be seen from the timely sale of timberland from the conversion of timberland into higher and better uses, such as vacation property sales.

# **Timberland Market Overview**

The fiscal year saw timber return gains with the NCREIF Timberland Index returning 9.84%. Appreciation accounted for 7.37% of the return, while income was 2.34%. The appreciation component was strong across the Southern, Northwest and Lake States regions as many appraisers noted higher bare land values and used lower discount rates in their appraisal methodology.

U.S. housing starts remained well below the levels needed to meet underlying demand as higher interest rates contributed to the lack of affordable housing.

Additionally, the market continued to see increased interest and demand for value-add opportunities across timber portfolios. The primary drivers of the demand have been carbon, solar and carbon capture and storage. Alternative sources of revenue continue to be a recognized driver.

# Retirement Annuity Trust Fair Value as of June 30, 2024

\* The acquisition of initial public offerings (IPOs) represented a portion of small-capitalization stock purchases. IPOs usually have a high commission rate; however, the security issuers and not the investors pay the commissions. In fiscal year 2024, the Retirement Annuity Trust bought small capitalization IPOs that generated \$221,630 in commissions. Although these commissions were not paid by TRS, they resulted from the annuity trust's investment activities and are included in the total commissions. Typical stock transactions occur at lower commission rates than IPO transactions, frequently at \$0.03 per share or less. Investment companies usually provide investment research for brokerage clients. Total commissions per share are calculated using total shares traded and total commissions.

#### **Proxy Voting and Corporate Behavior**

TRS votes proxy statements in accordance with KRS 161.430 and the board's Proxy Voting Guidelines. TRS shares are voted solely in the best interest of the membership using only pecuniary factors and not to further any nonpecuniary interest. Stock ownership is an implicit endorsement of company management, and, consequently, TRS shares in most cases are voted in support of company management. TRS expects the companies in which it acquires stock to abide by federal, state and local laws.

TRS's fiduciary duty is to obtain the highest investment return within acceptable levels of risk. In fulfilling this duty and regarding corporate behavior, TRS may correspond with the company, meet with company officials, sponsor shareholder resolutions or liquidate TRS's holdings in the company.

#### Securities Lending

TRS operates its securities lending program through its custodian, Bank of New York Mellon (BNYM), under contract. Securities lending occurs when TRS transfers a security to the borrower, such as a broker-dealer or bank, for cash collateral pursuant to an agreement to return the identical security in the future. Securities are borrowed for a variety of reasons including: settlement of short sales and to cover hedges, options, arbitrage positions and settlement fails. Consequently, the borrower receives custody of the transferred security. The borrower, however, is obligated to return the exact same security at the end of the loan period and to make the retirement system whole for dividends, interest and other distributions as if the security remained in the retirement system's portfolio.

The restrictions applying to loanable securities are as follows:

- There is no limit on the amount of government securities that can be loaned.
- There will be a limit of 30% of the equity portfolio. Securities may be loaned from any equity portfolio.
- A maximum of 50 corporate bonds may be on loan at any time.

TRS maintains with BNYM an approved borrowers list to which TRS will lend securities. The approved borrowers list is comprised of large, high-quality brokers and TRS has discretion to add or remove names from the list.

BNYM acts as lending agent in exchanging securities for collateral. The collateral provided in exchange for securities may include cash or non-cash collateral. For a loan of U.S. securities, collateralization of 102% or greater of the fair value of the securities lent is required. For a loan of foreign securities, collateralization of 105% or greater of the fair value of the securities lent is required. BNYM bears the risk of loss of any cash or non-cash collateral.

Cash collateral may be invested in any of the following:

- Government securities
- Repurchase and reverse repurchase transactions with approved counterparties

Staff closely monitors the lending program to make sure that BNYM is in compliance with lending restrictions. BNYM provides a detailed listing of all securities that are on loan on a daily basis. They also provide a summary report that lists the fair value of securities on loan with a particular borrower and the collateral value that the borrower has provided to cover the loan. The collateralization percentage for each broker also is listed.

#### **Kentucky Investments**

The retirement system always is cognizant of its significant role in the commonwealth's economy. Over \$2 billion in benefits are distributed annually to members and annuitants living in Kentucky. The Retirement Annuity Trust has invested about \$328 million directly in Kentucky. These investments include: commercial real estate; bonds issued by public agencies of the commonwealth and those of local municipalities; pools of single-family mortgages in Kentucky; financing for multi-family housing; and investments in global companies that contribute to the commonwealth's economy. Fiduciary duty requires that investments, including any in the commonwealth, be made solely for the benefit of TRS's members and annuitants.

# **Health Insurance Trust**

#### **Investment Policy Summary**

KRS 161.677 created the Health Insurance Trust on July 1, 2010, and obliges the board to "manage the assets of the fund in the same general manner in which it administers the retirement funds, except that the asset allocation may differ and separate accounting and financial reporting shall be maintained for the trust fund." KRS 161.430, which governs the investment of funds for the retirement trust, requires that members' assets be managed in a manner consistent with fiduciary standards set forth in the prudent person rule. Further, 102 KAR 1:178 establishes investment policies for the Health Insurance Trust. This regulation requires the board and Investment Committee to diversify assets prudently and to consider the fund's "liquidity and its capability of meeting both short and long-term obligations" in setting asset allocation policy.

Due to an imbalance of required distributions over contributions early in the fund's existence, liquidity needs historically dominated investment policy. This has evolved as contribution rate increases provided in statute have improved cash flow, and the focus now is on establishing an investment policy that achieves the required rate of return and matches the health insurance liability.

#### **Investment Objectives**

The definitive objective of the health insurance fund is to provide for beneficiaries' health insurance benefit obligations, both short and long term. In support of this, investment policy is designed, on an ongoing basis, to meet all liquidity needs, achieve the actuarially assumed 7.1% rate of return over the long term and do so within appropriate risk levels.

#### **Risk Controls**

Any investment program faces various risks; as with the retirement funds, the primary risk is that the assets will not support liabilities long term. Risk control measures for the Health Insurance Trust mirror those of the Retirement Annuity Trust, but are customized to reflect the fund's unique liability. Primary risk control measures include:

- Actuarial valuations are performed each year to evaluate the funding objectives of the Health Insurance Trust. Every 10 years an external audit of the actuary is conducted to ensure that the assumptions made, and calculation methods used, are resulting in properly computed liabilities of the fund.
- Asset-liability studies are conducted about every five years. These studies ensure that the portfolio is designed to meet the fund's liabilities.
- In accordance 102 KAR 1:178, which governs investment policies for the fund, the Investment Committee adopts and regularly reviews an asset allocation policy designed to meet the fund's needs.

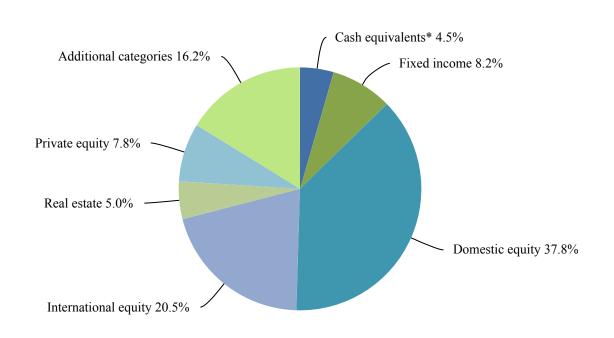

#### **Asset Allocation**

As of June 30, 2024, the Health Insurance Trust had \$3.15 billion in assets. This included \$258.7 million in investment-grade bonds. This trust also had \$221.2 million in high-yield bonds, \$1.84 billion in public equity investments, \$246.1 million in private equity, \$123.1 million in bank loans, \$166.8 million in alternative credit funds and \$156.5 million in real estate.

Asset allocation is adjusted annually by the Investment Committee to reflect changing liquidity needs and actuarial funding status. Due to the trust being cash flow positive, liquidity needs are declining as funding status has improved. The information below shows the health insurance fund's asset allocation by fair value as of June 30, 2024 and 2023.

#### Schedule of Investment Results — Gross

\* Rates of return are time-weighted based upon fair value. Returns are annualized for periods longer than one year.
\*\* Overall fund performance is compared to a board-approved benchmark, first established in July 2015, that represents the returns of appropriate benchmarks for the various asset classes weighted by the midpoint of the strategic range for the current fiscal year.

# Annual Valuation of the Retirement Annuity Trust

November 15, 2024

Board of Trustees Teachers' Retirement System of the State of Kentucky 479 Versailles Road Frankfort, KY 40601-3800

#### Members of the Board:

Kentucky Revised Statutes (KRS) 161.400 of the law governing the operation of the Teachers' Retirement System of the State of Kentucky (TRS) provides that the actuary shall make an actuarial valuation of the Retirement Annuity Trust. We are pleased to submit the results of the annual actuarial valuation prepared as of June 30, 2024. While not verifying the data at source, the actuary performed tests for consistency and reasonability.

During the 2021 valuation, a new set of economic and demographic assumptions was adopted by the TRS Board of Trustees (Board) that resulted in an increase in liabilities and contribution requirements. To help alleviate the pressure on increased contributions, a direct-rate smoothing technique was implemented to phase-in the required contribution increase, estimated at 8.59% of payroll, over a five-year period beginning with the 2021 valuation. For this 2024 valuation, and the next valuation, we will recognize an increase in contributions of at least 1.72% of payroll as a result of the cost of the change in assumptions.

The total combined member and employer contribution rates broken down for members hired before July 1, 2002 (TRS 1), members hired between July 1, 2002 and June 30, 2008 (TRS 2) and members hired between July 1, 2008 and December 31, 2021 (TRS 3), as a percentage of payroll for the fiscal years ending June 30, 2027 and June 30, 2026, required to support the total benefits are shown on pages 136 and 138 of this report. The rates represent an increase since the previous valuation in the total pension actuarially determined employer contribution rates (ADEC) of 2.98% of payroll for the fiscal year ending June 30, 2027.

A breakdown of the changes in the components of the ADEC are as follows:

- an expected increase of 1.72% of payroll for the direct rate smoothing technique of phasing-in contribution requirements due to the 2021 assumption changes,
- no change in the percent of payroll due to the amount required for life insurance benefits, and
- an increase of 1.26% of payroll due to the overall experience of the System for the fiscal year ending June 30, 2024.

The total combined member and employer statutorily required contributions for TRS 4 members are shown on pages 137 and 139 of this report.

The financing objective of the system is that contribution rates will remain relatively level over time as a percentage of payroll, except as otherwise noted. The promised benefits of the system are included in the actuarially calculated contribution rates which are developed using the entry age normal cost method.

Five-year market related value of plan assets is used for actuarial valuation purposes. Gains and losses are reflected in the total unfunded actuarial accrued liability that is being amortized by regular annual contributions as a level percentage of payroll in accordance with the funding policy adopted by the board, on the assumption that payroll will increase by 2.75% annually. The assumptions recommended by the actuary and adopted by the board are reasonably related to the experience under the system and to reasonable expectations of anticipated experience under the system.

## **ACTUARIAL SECTION**

Board of Trustees November 15, 2024 Page 2

We have prepared the trend information shown in the Schedule of Funding Progress in the Financial Section of the Annual Comprehensive Financial Report (ACFR) and Schedule A, Schedule B, Schedule C, Solvency Test and Analysis of Financial Experience shown in the Actuarial Section of the ACFR. We have also included a sensitivity analysis that is required under Actuarial Standards of Practice Statement No. 51 (ASOP 51) and the Low Default Risk Obligation Measure that is required under ASOP 4.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the assumptions and methods used for funding purposes meet the parameters set by Actuarial Standards of Practice, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retirement system and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the system.

In order to prepare the results in the report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This actuarial valuation was performed to determine the recommended funding amount for the system. The asset values used to determine unfunded actuarial accrued liabilities and funded ratios are not fair values but less volatile market related values. A smoothing technique is applied to fair values to determine the market-related values. The unfunded actuarial accrued liability amounts and funded ratios using the fair value of assets would be different. The interest rate used for determining liabilities is based on the expected return of assets. Therefore, liability amounts in this report cannot be used to assess a settlement of the obligation.

For fiscal years ending 2007 through 2018, the system was not funded on an actuarially sound basis as the full actuarially determined employer contributions were not made by the State. However, since that time, the State has appropriated enough to satisfy the actuarially determined employer contributions. Also, it is our understanding that the state budget includes an additional appropriation to the pension plan equal to the ADEC for the 2025 fiscal year.

If contributions by the employer to the system in subsequent fiscal years are less than those required, the assets are expected to become insufficient to pay promised benefits. However, assuming that contributions to the system are made by the employer and state from year to year in the future at rates recommended on the basis of the successive actuarial valuations, the continued sufficiency of the assets to provide the benefits called for under the system may be safely anticipated.

Respectfully submitted,

Edward J. Hochel

#### **Contribution Rates for Non-University TRS 4 Members**

\* Includes a load for administrative expenses.

4. The valuation includes only the assets and liabilities associated with the Retirement Annuity Trust. The valuation of the Health Insurance Trust and the active and retired life insurance benefits has been prepared separately.

5. Comments on the valuation results as of June 30, 2024, are given in Section IV and further discussion of the contribution levels is set out in Sections V and VI.

6. Schedule B shows the development of the actuarial value of assets. The assumed investment rate of return is 7.1%

7. Schedule D of this report outlines the full set of actuarial assumptions and methods employed in the current valuation. There have been no changes since the previous valuation. Direct rate smoothing is being used to phase in the impact of the June 30, 2021 assumption changes to the required contributions over a five-year period. The cost of the assumption changes was estimated at 8.59% of payroll beginning with the June 30, 2021 valuation, which represents an expected increase of at least 1.72% of payroll each year over a five-year period to cover the cost of the change in assumptions.

8. Provisions of the system, as summarized in Schedule F, were taken into account in the current valuation. There have been no changes since the previous valuation.

9. The aggregate funded ratio for TRS 1 through TRS 4, shown in the Summary of Principal Results, is the ratio of actuarial value of assets to the actuarial accrued liability. The funded status would be different based on the fair value of assets. The funded ratio is an indication of progress in funding the promised benefits. Since the ratio is less than 100% for TRS 1 through TRS 3, there is a need for additional contributions toward the payment of the unfunded actuarial accrued liability. For TRS 4, the ratio is above 100%, so there is no need for additional contributions. In addition, this funded ratio does not have any relationship to measuring the sufficiency if the plan had to settle its liabilities.

# **ACTUARIAL SECTION**

#### Section II — Membership Data

1. Data regarding the membership of the system for use as a basis of the valuation were furnished by the retirement system office. The following table shows the number of active members and their annual salaries as of June 30, 2024, on the basis of which the valuation was prepared.

| Group                               | Number | Annual<br>Salaries<br>(In thousands) |
|-------------------------------------|--------|--------------------------------------|
| University active members           |        |                                      |
| TRS 1 and TRS 2                     | 1,239  | \$ 94,584                            |
| TRS 3                               | 1,303  | 82,773                               |
| TRS 4                               | 395    | 17,893                               |
| Total university active members     | 2,937  | 195,250                              |
| Non-university active members       |        |                                      |
| Full-time TRS 1 and TRS 2           | 25,775 | 2,014,121                            |
| Full-time TRS 3                     | 28,966 | 1,735,679                            |
| Full-time TRS 4                     | 5,799  | 260,122                              |
| Part-time TRS 1 & 2                 | 990    | 9,681                                |
| Part-time TRS 3                     | 5,444  | 56,963                               |
| Part-time TRS 4                     | 6,103  | 36,652                               |
| Total non-university active members | 73,077 | 4,113,218                            |
| Grand total                         | 76,014 | \$ 4,308,468                         |

2. The following table shows the number and annual retirement allowances payable to annuitants and beneficiaries on the roll of the retirement system as of the valuation date.

#### Number and Annual Retirement Allowances of Annuitants and Beneficiaries on the Roll as of June 30, 2024

| Group                             | Number | Annual<br>Retirement<br>Allowances*<br>(In thousands) |           |  |
|-----------------------------------|--------|---|-----------|--|
| Service retirements               | 52,741 | \$  | 2,274,920 |  |
| Disability retirements            | 2,742  |   | 90,043    |  |
| Beneficiaries of deceased members | 4,875  |   | 132,865   |  |
| Total                             | 60,358 | \$  | 2,497,828 |  |

\* Includes cost-of-living adjustments effective through July 1, 2024.

- 3. In addition, there are 11,957 terminated vested employees entitled to benefits in the future and 53,459 inactive non-vested members.
- 4. Table 1 of Schedule G shows a distribution by age and years of service of the number and annual salaries of active members included in the valuation, while Table 3 shows the number and annual retirement allowances of annuitants and beneficiaries included in the valuation, distributed by age.

#### Section III — Assets

- As of June 30, 2024, the fair value of Retirement Annuity Trust assets for valuation purposes held by the system amounted to \$26.1 billion. This value excludes assets in the Health Insurance Trust, the 403(b) Tax Sheltered Trust and the Life Insurance Trust, which are not included in the assets used for Retirement Annuity Trust valuation purposes. The investment return for the plan year ending June 30, 2024, on a fair value basis was 11.9%. Schedule C shows the receipts and disbursements for the year preceding the valuation date and a reconciliation of the asset balances for the Retirement Annuity Trust.
- 2. The five-year fair value of Retirement Annuity Trust assets used for valuation purposes as of June 30, 2024, was \$25.73 billion. The estimated investment return for the plan year ending June 30, 2024, on an actuarial value of assets basis was 8.1%, compared to the assumed investment rate of return for the period of 7.1%. Schedule B shows the development of the actuarial value of assets as of June 30, 2024.
- 3. Below is a history of actual investment rates of return for the Retirement Annuity Trust over the past five years:

| Fiscal Year | Fair Value Rate of Return | Actuarial Value Rate of Return |
|-------------|---------------------------|--------------------------------|
| 2024        | 11.9%                     | 8.1%                           |
| 2023        | 10.2%                     | 6.6%                           |
| 2022        | (10.9)%                   | 7.9%                           |
| 2021        | 29.6%                     | 12.9%                          |
| 2020        | 5.5%                      | 7.0%                           |
|             |                           |                                |

#### Section IV — Comments on Valuation

F

- 1. Schedule A of this report contains the valuation balance sheet which shows the present and prospective assets and liabilities of the system for TRS 1 through TRS 4 as of June 30, 2024. The valuation was prepared in accordance with the actuarial assumptions and the actuarial cost method, which are described in Schedule D and Schedule E.
- 2. The valuation balance sheet shows that the system has total prospective liabilities of \$21.8 billion for benefits expected to be paid on account of the present active members. The liability on account of benefits payable to annuitants and beneficiaries amounts to \$26.79 billion of which there are no remaining special appropriations to be made toward funding ad hoc increases and sick leave allowances granted after 1981. The liability for benefits expected to be paid to inactive members and to members entitled to deferred vested benefits is \$637.7 million. The total prospective liabilities of the system amounts to \$49.2 billion. Against these liabilities, the system has present assets for valuation purposes of \$25.73 billion. When this amount is deducted from the total liabilities of \$49.18 billion, there remains \$23.45 billion as the present value contributions to be made in the future.
- 3. The contributions to the system consist of normal contributions and actuarial accrued liability contributions. The valuation indicates that total employer normal contributions are required at the rate of 11.98% of payroll for university other than TRS 4 and 9.36% of payroll for university TRS 4 members for both foundational and supplemental plans. The valuation indicates that employer normal contributions at the rate of 16.08% of payroll for non-university members other than TRS 4 and 13.88% of payroll for non-university TRS members for both foundational and supplemental plans are required. This includes a load for administrative expenses of 0.32% of payroll.
- 4. Prospective normal employer and employee contributions have a present value of \$5.63 billion. When this amount is subtracted from \$23.45 billion, which is the present value of the total future contributions to be made by the employer, there remains \$17.82 billion as the amount of future unfunded actuarial accrued liability contributions.
- 5. Although the unfunded actuarial accrued liability increased by approximately \$362.7 million for the plan year ending June 30, 2024, and the funded ratio increased from 58.6% to 59.1%. The increase in the UAAL was primarily due to salary increases that were more than expected and the contribution deficiency as a result of the phase-in of contributions offset somewhat by the investment return experience which was better than expected. See Section VII for a complete breakdown of the experience of the system.

#### Section V — Contributions Payable Under the System

#### **Employee Contributions**

1. KRS 161.540 provides that each university member hired before Jan. 1, 2022, will contribute 10.4% of annual salary to the system and each non-university member contribute 12.855% of annual salary. Of this amount, for each university member, 2.775% is paid to the Health Insurance Trust for medical benefits and for each non-university member, 3.75% is paid to the Health Insurance Trust for medical benefits. The remainder, 7.625% for university members and 9.105% for non-university members, is applicable for the retirement benefits taken into account in the valuation.

# **ACTUARIAL SECTION**

2. KRS 161.540 also provides for each university member hired on and after Jan. 1, 2022, will contribute 9.775% of annual compensation to the system for both foundation and supplemental plans and each non-university member will contribute 14.75% of annual compensation for both foundational and supplemental. Of this amount, for each university member, 2.775% is paid to the Health Insurance Trust for medical benefits and for each non-university member, 3.75% is paid to the Health Insurance Trust for the remainder, 5% for university members and 9% for non-university members, is applicable to the foundational benefit component of the retirement benefits. Finally, an additional 2% is applicable to the supplemental benefit component of the retirement benefits for all TRS 4 members.

#### **Employer Contributions**

- 3. KRS 161.550 provides that for members hired before Jan. 1, 2022, each employer will contribute an amount to fund pension and life insurance benefits equal to 10.875% of the total annual compensation of university members, 12.355% of the total compensation of non-university members hired prior to July 1, 2008 and 13.355% of the total annual compensation of non-university members hired on and after July 1, 2008. Additional contributions are made to the Health Insurance Trust as required under 161.550(3).
- 4. KRS 161.550 also provides that for members hired on and after Jan. 1, 2022 each employer will contribute an amount to fund pension and life insurance benefits equal to 5.775% for university members and 8% for non-university members.
- 5. Based on the results of the current valuation, of the amounts shown above, 0.08% of payroll will be allocated to the Life Insurance Trust.
- 6. Based on the results of the current valuation, an additional 27.26% of payroll for both university and non-university members other than TRS 4, will be required in order to maintain the amortization of the unfunded actuarial accrued liability of the Retirement Annuity Trust based on the funding policy adopted by the board. However, due to the results of the experience study adopted by the board, direct-rate smoothing of contribution rates will be used to phase in the impact over a five-year period. The resulting required increase based on direct-rate smoothing is 25.54% of payroll for the year ending June 30, 2027.
- 7. The total actuarially determined employer contribution (ADEC) rate to the Retirement Annuity Trust is 36.335% for university members other than TRS 4. The total ADEC rate to the pension plan is 37.815% for non-university TRS 1 and TRS 2 members and 38.815% for non-university TRS 3 members. The total member and employer contribution rates to the Retirement Annuity Trust for members other than TRS 4, are shown in the following tables.

#### Contribution Rates by Source University — Other Than TRS 4

| Member   | TRS 1, TRS 2 and TRS 3 Members |
|--|--------------------------------|
| Fixed total  | 10.400 %                       |

| Direct-Rate Smoothing of the Impact of the<br>Assumption Changes over five years | 25.540 %                       |
| Special appropriation  | <u> </u>                       |
| Contribution to Retirement Annuity Trust   | 36.335 %                       |
| Total contribution to Retirement Annuity Trust                                   | 43.960 %                       |

|  | TRS 1 and TRS 2<br>Members | TRS 3 Members |
|--|----------------------------|---------------|
| Member   |                            |               |
| Fixed total  | 12.855 %                   | 12.855 %      |
| Fixed Health Insurance Trust   | (3.750 %)                  | (3.750 %)     |
| Contribution to Retirement Annuity Trust   | 9.105 %                    | 9.105 %       |
| Employer   |                            |               |
| Fixed total  | 16.105 %                   | 17.105 %      |
| Fixed Health Insurance Trust   | (3.750 %)                  | (3.750 %)     |
| Subtotal   | 12.355 %                   | 13.355 %      |
| Life Insurance Trust   | (0.080 %)                  | (0.080 %)     |
| Additional to comply with board funding policy using<br>Direct-Rate Smoothing of the Impact of the<br>Assumption Changes over five years | 25.540 %                   | 25.540 %      |
| Special appropriation  |                            |               |
| ADEC contribution to Retirement Annuity Trust  | 37.815 %                   | 38.815 %      |
| Total contribution to Retirement Annuity Trust   | 46.920 %                   | 47.920 %      |

#### Contribution Rates by Source Non-University — Other Than TRS 4

8. The valuation indicates that normal contributions at the rate of 11.98% of active university members' salaries and 16.08% of active non-university members' salaries are required for members other than TRS 4. In addition, the valuation indicates that normal contributions at the rate of 9.36% of active university members' salaries and 13.88% of active non-university members' salaries are required for TRS 4 members. The difference between the total contribution rate and the normal rate remains to be applied toward the liquidation of the unfunded actuarial accrued liability. This actuarial accrued liability rate, based on the assumptions set forth in the board's funding policy and including the impact of direct-rate smoothing of contributions, is 31.98% for university members. The actuarial accrued liability rate for TRS 4 members, and 31.84% for non-university TRS 3 members. The actuarial accrued liability rate for TRS 4 members is 5.335% for university members. These rates are shown in the following table.

#### Combined Member and Employer Contribution Rates — Members Other Than TRS 4

|                             | Percentage of Active Members' Salaries |                            |                |  |  |

Blended amortization period (years)

\* Includes assumption changes

\*\* The UAAL payment provided above is the total payment before any consideration of the direct rate smoothing technique per the board's funding policy.

#### Section VI — Comments on Level of Funding

- Our calculations indicate that the contribution rates shown in the previous section will be sufficient to cover the benefits 1. of the system and the annual 1.5% increases in the allowances of retired members and beneficiaries.
- The valuation indicates that the present fixed contribution rates if continued at the current level percentage, along with an 2. additional required contribution for members other than TRS 4 members, are sufficient to meet the cost of benefits currently accruing and provide for the amortization of the unfunded actuarial accrued liability in accordance with the board funding policy and the direct rate smoothing methodology of phasing in the additional required contribution.
- The ADEC is determined based on the board's funding policy, and the amortization and direct rate smoothing 3. methodologies. Each year, we determine the required increase percentage needed, in addition to the present fixed contribution rates to fund the ADEC over the closed amortization period. The table below provides a historical view of the special appropriations and required increase as a percentage of payroll.

| Valuation<br>Date | Year          | Special<br>Appropriations<br>Rate | Cumulative<br>Required Increase<br>Rate | Cumulative<br>Total State<br>Additional<br>Contribution Rate | Cumulative Total<br>State Required<br>Contribution<br>Amounts |

| June 30, 2022     | June 30, 2025 | —                                 | 18.92                                   | 18.92  | 805,690,000   |
| June 30, 2023     | June 30, 2026 |                                   | 22.56                                   | 22.56  | 948,616,000   |
| June 30, 2024     | June 30, 2027 | _                                 | 25.54                                   | 25.54  | 1,076,889,000   |

4. The amounts above are calculated by the actuary as the minimum additional dollar amount to be contributed by the state in order to comply with the board's funding policy and include the impact of direct-smoothing of the cost of assumption changes over five years beginning with the 2021 valuation. For the years shaded in light and dark gray, the state required contribution amounts were made or are expected to be made in full.

5. As can be seen from the table, the total state additional contribution rate increase is 2.98% of payroll from FY26 to FY27. This increase is based on:

- an expected increase of 1.72% of payroll for the direct rate smoothing technique of phasing in contribution requirements due to the 2021 assumption changes,
- an increase of 1.26% of payroll due to the overall experience of the system for the year ending June 30, 2024.
- 6. Effective Sept. 21, 2020, the amount to be provided by the state shall not be less than the prior year's dollar amount until the plan (TRS 1 through TRS 3) reaches a funded ratio of 100%. Any further benefit improvements or return to work changes must be accompanied by the entire additional contributions necessary to support the benefits.

### Section VII — Analysis of Financial Experience

The following table shows the estimated gain or loss from various factors that resulted in an increase of \$362.7 million in the unfunded actuarial accrued liability from \$17.45 billion to \$17.82 billion during the year ending June 30, 2024. The increase in the unfunded actuarial accrued liability was primarily due to salary increases that were more than expected and the contribution deficiency as a result of the phase-in of contributions for the fiscal year ending June 20, 2024. These losses were partially offset by a gain due to investment return on an actuarial value basis that was greater than expected (8.1% vs. 7.1%), gains due to mortality (more deaths than expected) and gains due to turnover and retirements.

| Item   | <br>nt of Increase/<br>Decrease) |
|--|----------------------------------|
| Interest (7.1%) added to previous unfunded accrued liability | \$<br>1,239,296                  |
| Expected actuarially accrued liability contribution          | (954,748)                        |
| Experience:  |                                  |
| Valuation asset growth                                       | (231,536)                        |
| Pensioners' mortality  | (25,496)                         |
| Turnover and retirements                                     | (41,582)                         |
| New entrants   | 50,624                           |
| Salary increases   | 326,135                          |
| Total  | \$<br>362,693                    |

## Analysis of Financial Experience

(In thousands)

#### Section VIII — Accounting Information

The information required under Governmental Accounting Standards Board (GASB) Statements No. 67 and 68 is issued in separate reports. The following information is provided for informational purposes only.

1. The following is a distribution of the number of employees by type of membership.

#### Number of Active and Retired Members as of June 30, 2024

| Group  | Number  |
|--|---------|
| Retirees and beneficiaries currently receiving benefits                            | 60,358  |
| Terminated vested employees entitled to benefits<br>but not yet receiving benefits | 11,957  |
| Inactive non-vested members  | 53,459  |
| Active plan members  | 76,014  |
| Total  | 201,788 |

2. The schedule of funding progress is shown below.

#### **Schedule of Funding Progress**

| 2020                            | 1,134,281,095  | 1,134,281,095                    | 100                       |
| 2021                            | 1,146,977,669  | 1,146,977,669                    | 100                       |
| 2022                            | 1,200,342,369  | 1,679,584,669                    | 140                       |
| 2023                            | 1,144,448,806  | 1,144,448,806                    | 100                       |
| 2024                            | 1,178,681,973  | 1,178,681,973                    | 100                       |

\*The contribution for the fiscal year ending June 30, 2024, is the first year of the phase-in of contributions. If the Plan were not phasing in the contributions, the ADEC for the fiscal year ending June 30, 2024, would have been \$1,453,167,000.

#### Section IX — Risk Assessment

Actuarial Standards of Practice (ASOP) No. 51, issued by the Actuarial Standards Board, provides guidance on assessing and disclosing risks related to pension plan funding. This guidance is binding on all credentialed actuaries practicing in the United States. This standard was issued as final in September 2017 with application to measurement dates on or after Nov. 1, 2018.

The term "risk" frequently has a negative connotation, but from an actuarial perspective, it may be thought of as simply the fact that what actually happens in the real world will not always match what was expected, based on actuarial assumptions. Of course, when actual experience is better than expected, the favorable risk is easily absorbed. The risk of unfavorable experience will likely be unpleasant, and so there is an understandable focus on aspects of risk that are negative.

Risk usually can be reduced or eliminated at some cost. Consumers, for example, buy auto and home insurance to reduce the risk associated with accidents or catastrophes. Another way to express this concept, however, is that there is generally some reward for assuming risk. Thus, retirement plans invest not just in U.S. Treasury bonds which have almost no risk, but also in equity, which is considerably riskier — because those investments have an expected reward of a higher return that justifies the risk.

## **ACTUARIAL SECTION**

Under ASOP 51, the actuary is called on to identify the significant risks to the pension plan and provide information to help those sponsoring and administering the plan understand the implications of these risks. In this section, we identify some of the key risks for the Plan and provide information to help interested parties better understand these risks.

#### Sensitivity Analysis

The valuation results are a projection of expected benefit payments based on the actuarial assumptions. Actual experience will differ from these assumptions, either increasing or decreasing liabilities and valuation results. The charts on the following pages provide a simple analysis on how the costs are sensitive to changes in the assumed discount rate, the assumed price inflation rate and the rate of wage inflation. The charts show the actuarial accrued liability, the unfunded actuarial accrued liability, the funded ratio and the employer contribution rate under each of the following scenarios:

- **Table 1** The discount rate assumption sensitivity analysis shows the valuation results with the baseline discount rate assumption, 7.1%, together with an increase and a decrease of 1% in the discount rate. Under this scenario, the underlying price inflation rate assumption is held constant at 2.5% and the wage inflation assumption is held constant at 2.75%.
- **Table 2** The price inflation assumption sensitivity analysis shows the valuation results with the baseline underlying price inflation rate assumption, 2.5%, together with decreases in the price inflation rate to 2.25% and 2%. Under this scenario, the decrease in the underlying price inflation rate assumption leads to corresponding decreases in the discount rate (6.85% and 6.6%, respectively), the wage inflation assumption (2.5% and 2.25%, respectively), and the assumed rates of salary increase for active members.
- **Table 3** The wage inflation assumption sensitivity analysis shows the valuation results with the baseline underlying wage inflation assumption, 2.75%, together with decreases in the wage inflation assumption to 1.25% and 0%. Under this scenario, all other assumptions, including the individual member salary scale, are held constant so that the only impact is in the amortization of the unfunded actuarial accrued liability, leading to higher employer contribution rates.

#### Low-Default-Risk Obligation Measure

Under the revised Actuarial Standards of Practice (ASOP) No.4 effective for valuations after Feb. 15, 2023, we are required to include a low-default-risk obligation measure of the system's liability in our funding valuation report. This is an informational disclosure as described below and would not be appropriate for assessing the funding progress or health of the plan. This measure uses the unit credit cost method and reflects all the assumptions and provisions of the funding valuation (including the assumed COLA paid), except that the discount rate is derived from considering low-default risk fixed income securities. We considered the FTSE Pension Discount Curve based on market bond rates published by the Society of Actuaries as of June 30, 2024 and with the 30-year spot rate used for all the durations beyond 30 because this provides an appropriate set of discount rates for this intended purpose.

Using these assumptions, we calculate a liability of approximately \$47.7 billion. This amount approximates the termination liability if the plan (or all covered employment) ended on the valuation date and all of the accrued benefits had to be paid with cash-flow matched bonds. If the plan were funded with the intent of being able to be terminated at any valuation date, contribution

## **ACTUARIAL SECTION**

requirements may need to increase and would also be more volatile. This assurance of funded status and benefit security is typically more relevant for corporate plans than for governmental plans since governments rarely have the need or option to completely terminate the plan. However, this informational disclosure is required for all plans whether corporate or governmental and care should be taken to ensure the one size fits all metric is not misconstrued.

\* Excludes assets of the Health Insurance Trust, the 403(b) Tax-Sheltered Trust and the Life Insurance Trust.

#### **Schedule D**

#### **Outline of Actuarial Assumptions and Methods**

The assumptions and methods used in the valuation were selected based on the actuarial experience study prepared as of June 30, 2020, submitted to and adopted by the board on September 20, 2021.

Investment Rate of Return: 7.1% per annum, compounded annually, including price inflation at 2.5% per annum.

**Salary increases:** Representative values of the assumed annual rates of future salary increases are as follows and include wage inflation at 2.75% per annum:

| Service       | 1   | 2   | 3 | 4 | 5 | 6    | 7   | 8    | 9 | 10 | 11 | 12   | 13  | 14  | 15   | 16   | ≥17 |
|---------------|-----|-----|---|---|---|------|-----|------|---|----|----|------|-----|-----|------|------|-----|
| Annual Rate % | 7.5 | 5.5 | 5 | 5 | 5 | 4.75 | 4.5 | 4.25 | 4 | 4  | 4  | 3.75 | 3.5 | 3.5 | 3.25 | 3.25 | 3   |

Separations From Service: Representative values of the assumed annual rates of death, disability, withdrawal, service retirement and early retirement are as follows:

|     |         |            | v              | Withdrawal | Retirement |                     |                       |
|-----|---------|------------|----------------|------------|------------|---------------------|-----------------------|
|     |         |            |                | Service    | Before 27  | After 27            |                       |
| Age | Death*  | Disability | sability 0 - 4 |            | 10+        | Years<br>of Service | Years<br>of Service** |

\* Plus 20% in the first year attaining 30 years of service; plus 25% at age 65 in the first year attaining 30 years of service

**Deaths after retirement:** Mortality rates were based on the Pub-2010 (Teachers Benefit-Weighted) Mortality table, projected generationally based on Projection Scale MP-2020, with various set forwards, set backs, and adjustments for each of the groups. Below is a summary of the specific mortality tables and adjustments for each of the groups.

|                       | Set Forward (+) / | Adjustment to          | Projection            |  |
|-----------------------|-------------------|------------------------|-----------------------|--|
| Group                 | Set Back (-)      | Rates                  | Scale                 |  |
| Service retirees      | Male: +2          | Male: 102%             | 75% of MP-2020        |  |
| Service retirees      | Female: +2        | Female: 98%            | / 5 / 6 01 WIF - 2020 |  |
| Contingent ennuitente | Male: +2          | Male: 101%             | 75% of MP-2020        |  |
| Contingent annuitants | Female: None      | Female: 100%           | / 5 /0 01 WIF-2020    |  |
| Disability ratiraas   | Male: +1          | Male: 96%              | 75% of MP-2020        |  |
| Disability retirees   | Female: -2        | Female: -2 Female: 94% |                       |  |
| Actives               | Male: +1          | Male: 100%             | 75% of MP-2020        |  |
| Actives               | Female: -2        | Female: 98%            | 7570 01 WIP-2020      |  |

Representative values of the assumed annual rates of death after service retirement and after disability retirement are shown in this table.

#### **Annual Base Rates of Death For**

|     | Service Reti | rees        | Disabilit | y Retirees | Contingent | Annuitants |  |
|-----|--------------|-------------|-----------|------------|------------|------------|--|

| 95  | 26.9423      | 21.5110     | 24.2170   | 15.7356    | 26.8670    | 18.5900    |  |

Assets — Five-year market related actuarial value, as developed in Schedule B. The actuarial value of assets recognizes a portion of the difference between the fair value of assets and the expected actuarial value of assets, based on the ultimate assumed valuation rate of return of 7.1%. The amount recognized each year is 20% of the difference between fair value and expected actuarial value.

Administrative Expense Load — 0.32% of payroll added to the normal cost rate.

Percent Married — 100%, with females three years younger than males.

Part-Timers — Assume 0.25 years of accrual service per year.

Loads — Unused sick leave: 3% of active liability at the time of retirement for members other than TRS 4.

#### Level Percentage of Payroll Growth Assumption — 2.75%

#### Schedule E

#### Actuarial Cost Method

- 1. The valuation is prepared on the projected benefit basis, under which the present value, at the interest rate assumed to be earned in the future, of each active member's expected benefit at retirement or death is determined, based on his/her age, service, sex and compensation. The calculations take into account the probability of a member's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his/her terminating with a service, disability or survivor's benefit. Future salary increases and post-retirement cost-of-living adjustments are also anticipated. The present value of the expected benefits payable on account of the active members is added to the present value of the expected benefits payable on account of the present to obtain the present value of all expected benefits payable from the system on account of the present group of members and beneficiaries.
- 2. The employer contributions required to support the benefits of the system are determined following a level funding approach, and consist of a normal contribution and an actuarial accrued liability contribution.
- 3. Under the entry age normal cost method, the actuarial present value of each member's projected benefits is allocated on a level basis over the member's compensation between the entry age of the member the assumed exit ages. The portion of the actuarial present value allocated to the valuation year is called the normal cost. The actuarial present value of benefits allocated to prior years of service is called the actuarial liability. The unfunded actuarial liability represents the difference between the actuarial liability and the actuarial value of assets as of the valuation date. The unfunded actuarial liability is calculated each year and reflects experience gains/losses. The accured liability contribution amortizes the balance of the unfunded actuarial accrued liability over a period of years from the valuation date.

#### Schedule F

#### **Summary of Main System Provisions**

The Teachers' Retirement System of the State of Kentucky began operations on July 1, 1940. The valuation took into account amendments to the system effective through June 30, 2024. The following summary describes the main benefit and contribution provisions of the system as interpreted for the valuation.

#### Definitions

Final average salary means the average of the five highest annual salaries which the member has received for service in a covered position and on which the member has made contributions or on which the public board, institution or agency has picked up the member contributions. For a member who retires after attaining age 55 with 27 years of service, final average salary means the average of the three highest annual salaries.

#### Benefits

### Service Retirement Allowance for TRS 1 and TRS 2 Members

Condition for Allowance - Completion of 27 years of service or attainment of age 55 and five years of service.

Amount of Allowance — The annual retirement allowance for non-university members is equal to:

- 2% of final average salary multiplied by service before July 1, 1983, plus
- 2.5% of final average salary multiplied by service after July 1, 1983.
- For individuals who become members of the retirement system on or after July 1, 2002 and have less than 10 years of service at retirement, the retirement allowance is 2% of final average salary multiplied by service. If, however, they have 10 or more years, they receive a benefit percentage of 2.5% for all years of service up to 30 years.
- For members retiring on or after July 1, 2004, the retirement allowance formula is 3% of final average salary for each year of service credit earned in excess of 30 years.

The annual retirement allowance for university members is equal to 2% of final average salary multiplied by all years of service.

For all members, the annual allowance is reduced by 5% per year from the earlier of age 60 or the date the member would have completed 27 years of service.

The minimum annual service allowance for all members is \$440 multiplied by credited service.

#### Service Retirement Allowance for TRS 3 Members

Condition for Allowance — Completion of 27 years of service; attainment of age 60 and five years of service; or attainment of age 55 and 10 years of service.

Amount of Allowance — The annual retirement allowance for non-university members is equal to:

- 1.7% of final average salary if service is 10 years or less.
- 2% of final average salary if service is greater than 10 years and no more than 20 years.
- 2.3% of final average salary if service is greater than 20 years but no more than 26 years.
- 2.5% of final average salary if service is greater than 26 years but no more than 30 years.
- 3% of final average salary for years of service greater than 30 years.

The annual retirement allowance for university members is equal to:

- 1.5% of final average salary if service is 10 years or less.
- 1.7% of final average salary if service is greater than 10 years and no more than 20 years.
- 1.85% of final average salary if service is greater than 20 years but less than 27 years.
- 2% of final average salary if service is greater than or equal to 27 years.

For all members, the annual allowance is reduced by 6% per year from the earlier of age 60 or the date the member would have completed 27 years of service.

#### Service Retirement Allowance for TRS 4 Members

Condition for Allowance — Attainment of age 57 and 10 years of service; or attainment of age 65 and 5 years of service.

Amount of Allowance — Foundational Benefit

The annual foundational benefit for members is equal to service times a multiplier times final average salary. The multiplier for non-university members is shown in the following table:

|           | Years of Service |          |          |            |  |  |  |  |  |  |
|-----------|------------------|----------|----------|------------|--|--|--|--|--|--|
| Age       | 5-9.99           | 10-19.99 | 20-29.99 | 30 or more |  |  |  |  |  |  |
| 57-60     |                  | 1.70 %   | 1.95 %   | 2.20 %     |  |  |  |  |  |  |
| 61        |                  | 1.74 %   | 1.99 %   | 2.24 %     |  |  |  |  |  |  |
| 62        |                  | 1.78 %   | 2.03 %   | 2.28 %     |  |  |  |  |  |  |
| 63        |                  | 1.82 %   | 2.07 %   | 2.32 %     |  |  |  |  |  |  |
| 64        |                  | 1.86 %   | 2.11 %   | 2.36 %     |  |  |  |  |  |  |
| 65 & over | 1.90 %           | 1.90 %   | 2.15 %   | 2.40 %     |  |  |  |  |  |  |

The multiplier for university members is shown in the following table:

|           | Years of Service |          |          |            |  |  |  |  |  |  |
|-----------|------------------|----------|----------|------------|--|--|--|--|--|--|
| Age       | 5-9.99           | 10-19.99 | 20-29.99 | 30 or more |  |  |  |  |  |  |
| 57-60     |                  | 0.70 %   | 0.95 %   | 1.20 %     |  |  |  |  |  |  |
| 61        |                  | 0.74 %   | 0.99 %   | 1.24 %     |  |  |  |  |  |  |
| 62        |                  | 0.78 %   | 1.03 %   | 1.28 %     |  |  |  |  |  |  |
| 63        |                  | 0.82 %   | 1.07 %   | 1.32 %     |  |  |  |  |  |  |
| 64        |                  | 0.86 %   | 1.11 %   | 1.36 %     |  |  |  |  |  |  |
| 65 & over | 0.90 %           | 0.90 %   | 1.15 %   | 1.40 %     |  |  |  |  |  |  |

The annual foundational benefit is reduced by 6% per year from the earlier of age 60 or the date the member would have completed 30 years of service.

#### Amount of Allowance — Supplemental Benefit

The annual supplemental benefit is equal to the account balance which includes member and employer contributions and interest credited annually on June 30. Options include annuitizing the balance or receiving the balance as a lump sum either at the time of retirement or at a later date.

#### **Disability Retirement Allowance**

Condition for Allowance — For members hired before Jan. 1, 2022, totally and permanently incapable of being employed as a teacher and under 27 years of service but after completing five years of service.

Amount of Allowance — The disability allowance is equal to 60% of the member's final average salary. The disability allowance is payable over an entitlement period equal to 25% of the service credited to the member at the date of disability or five years, whichever is longer. After the disability entitlement period has expired and if the member remains disabled, the member will be retired under service retirement. The service retirement allowance will be computed with service credit given for the period of disability retirement. The allowance will not be less than \$6,000 per year. The service retirement allowance will not be reduced for commencement of the allowance before age 60 or the completion of 27 years of service.

Benefits Payable on Separation from Service — Any member who ceases to be in service is entitled to receive contributions with allowable interest. A member who has completed five years of creditable service and leaves the contributions with the system may be continued in the membership of the system after separation from service, and file application for service retirement after the attainment of age 60.

#### Life Insurance

A separate life insurance fund has been created as of June 30, 2000, to pay benefits on behalf of deceased TRS active and retired members.

#### **Death Benefits**

A surviving spouse of an active member with less than 10 years of service may elect to receive an annual allowance of \$2,880 except that if income from other sources exceeds \$6,600 per year the annual allowance will be \$2,160.

A surviving spouse of an active member with 10 or more years of service may elect to receive an allowance which is the actuarial equivalent of the allowance the deceased member would have received upon retirement. The allowance will commence on the date the deceased member would have been eligible for service retirement and will be payable during the life of the spouse. If the deceased member is survived by unmarried children under age 18 the following schedule of annual allowances applies.

| Number of Children | <b>Annual Allowance</b> |
|--------------------|-------------------------|
| 1                  | \$2,400                 |
| 2                  | 4,080                   |
| 3                  | 4,800                   |
| 4 or more          | 5,280                   |

The allowances are payable until a child attains age 18 or age 23 if a full-time student. If the member has no eligible survivor, a refund of his accumulated contributions is payable to his estate.

#### Options

In lieu of the regular Option 1, a retirement allowance payable in the form of a life annuity with refundable balance, any member before retirement may elect to receive a reduced allowance which is actuarially equivalent to the full allowance, in one of the following forms:

Option 2. A single life annuity payable during the member's lifetime with payments for 10 years certain.

Option 3. At the death of the member the allowance is continued throughout the life of the beneficiary.

Option 3(a). At the death of the beneficiary designated by the member under Option 3, the member's benefit will revert to what would have been paid had an option not been selected.

Option 4. At the death of the member one half of the allowance is continued throughout the life of the beneficiary.

Option 4(a). At the death of the beneficiary designated by the member under Option 4, the member's benefit will revert to what would have been paid had an option not been selected.

#### **Postretirement Adjustments**

The retirement allowance of each retired member and of each beneficiary shall be increased by 1.5% each July 1.

#### Contributions

**Member Contributions** — University members other than TRS 4 contribute 7.625% of salary to the retirement trust. Nonuniversity members other than TRS 4 contribute 9.105% of salary to the retirement trust. University TRS 4 members contribute 7% of salary to the retirement trust. Non-university TRS 4 members contribute 11% of salary to the retirement trust. 2% of each is for the supplemental plan.

#### Schedule G

#### **30-Year Baseline Projections**

The results of actuarial valuations are a snapshot of the financial position on the valuation date, based on the assumed number of active employees and current beneficiaries. Projections simulate future actuarial valuation results over a forecast period (30 years in this case) by creating future new hires and performing valuations using the projected membership. The following items are assumed for the projected results.

Active Employee Growth Rate — 0%
Valuation Discount Rate — 7.1%
Investment Rate of Return — 7.1% each year
Actuarial Value of Assets — five year smoothing, no corridor
Amortization Method — Level percent of payroll, closed
Amortization Bases —

Legacy amortization from 2014 valuation amortized over closed 30-year period
Subsequent bases amortized over closed 20-year period from date of valuation

Amortization Period — Weighted 19.9-year period as of valuation date
Future Contributions — Based on expected actuarially determined contributions including the impact of direct-rate smoothing of the impact of the assumption changes over a five-year period beginning with the 2021 valuation

All other demographic and economic changes are assumed to occur in accordance with the actuarial assumptions used for the actuarial valuation.

## Annual Valuation of the Health and Life Insurance Trusts

November 14, 2024

Board of Trustees Teachers' Retirement System of the State of Kentucky 479 Versailles Road Frankfort, KY 40601-3800

Members of the Board:

This report covers the retiree medical plan funded by the Health Insurance Trust and OPEB liabilities related to the life insurance plan funded by the Life Insurance Trust. CavMac (CMC) has submitted the results of the annual actuarial valuation prepared as of June 30, 2024. While not verifying the data at source, the actuary performed tests for consistency and reasonability.

In order to prepare the results in this report, we have utilized actuarial models. that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results.

The valuation covers benefits for members hired before July 1, 2002 (TRS 1), members hired between July 1, 2002 and June 30, 2008 (TRS 2), members hired between July 1, 2008 and Dec. 31, 2021 (TRS 3), and members hired on or after Jan. 1, 2022 (TRS 4).

The valuation indicates a total actuarially determined contribution of 3.54% as of percentage of active member payroll for the health trust payable for the fiscal year ending June 30, 2025 is required to support the benefits of the Kentucky Employees' Health Plan (KEHP) and the Medicare Eligible Health Plan (MEHP). This actuarially determined contribution reflects the actuarial value of assets of the Health Insurance Trust and a 7.1% discount rate for valuing liabilities.

The initial per capita costs of health care and the rates of health care inflation used to project the per capita health care costs have been revised since the previous valuation. The health care trend assumption has been increased for the next few years starting at 7% while continuing to step down to an ultimate health care trend assumption of 4.5%, which is 2% higher than our price inflation assumption. The increase in trend is due to continuing high expectations for prescription drug costs and utilization, particularly for specialty drugs. In addition, we note that expected 2025 per member per month (PMPM) costs for the stand alone Medicare Part D prescription drug plan are less than expected in spite of the plan changes due to the Inflation Reduction Act, including the \$2,000 out of pocket maximum, because of increased Federal reimbursements and the additional \$15 PMPM premium stabilization contribution. We have made no additional specific changes to the valuation results due to the Inflation Reduction Act, but we have included scenarios in our sensitivity analysis section in Schedule G to illustrate the potential impact of changes to the Medicare Part D plan design, such as the elimination of the \$15 PMPM premium stabilization contribution or decreased Federal reimbursements.

The impact of the COVID-19 pandemic was considered in this valuation; however, no changes were incorporated at this time due to the level of uncertainty regarding the impact on both plan costs and contribution levels going forward. Given the uncertainty regarding COVID-19, (e.g., the impact of routine care being deferred, direct COVID-19 treatment and prevention costs, changes in contribution and budget projections), continued monitoring of the impact on the Plans' liability will be required.

We recommend that the life insurance plan maintain a total actuarially determined contribution of 0.08% of active member payroll payable for the fiscal year ending June 30, 2027 to support the benefits of the Life Insurance Trust. This actuarially determined contribution reflects the actuarial value of assets of the Life Insurance Trust and a 7.1% discount rate for valuing liabilities.

Board of Trustees November 14, 2024 Page 2

The promised benefits of the retiree medical and life insurance plans are included in the actuarially calculated contribution rates that are developed using the entry age normal actuarial cost method. Five-year market related value of plan assets is used for actuarial valuation purposes. Gains and losses are reflected in the unfunded actuarial accrued liability that is being amortized by regular annual contributions as a level percentage of payroll within a 16-year period for the retiree medical plan and a 20-year period for the life insurance plan, on the assumption that payroll will increase by 2.75% annually. The assumptions recommended by the actuary and adopted by the board are in aggregate reasonably related to the experience under the retiree medical and life insurance plans and to reasonable expectations of anticipated experience under the retiree medical and life insurance plans.

CMC has prepared the trend information shown in the Schedule of Funding Progress in the Financial Section of the Annual Comprehensive Financial Report (ACFR) and Section VII shown in the Actuarial Section of the ACFR.

This is to certify that the independent consulting actuaries are members of the American Academy of Actuaries and have experience in performing valuations for public retirement systems, that the assumptions and methods used for funding purposes meet the parameters set by Actuarial Standards of Practice, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the retiree health and life insurance trusts and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the plans.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

This actuarial valuation was performed to determine the recommended funding amount for the system. The asset values used to determine unfunded liabilities and funded ratios are not fair values, but less volatile market-related values. A smoothing technique is applied to fair values to determine the market-related values. The unfunded liability amounts and funded ratios using the fair value of assets would be different. The interest rate used for determining liabilities is based on the expected return of assets. Therefore, liability amounts in this report cannot be used to assess a settlement of the obligation.

In our opinion, if the contributions to the Health Insurance Trust continue at the current statutorily required levels, the funded ratio of the retiree medical plan will continue to increase, and the ability of the Health Insurance Trust to fund the benefits called for under the retiree medical plan will improve.

Respectfully submitted,

Alia Brand

Alisa Bennett, FSA, EA, FCA, MAAA President

Jessica Fain, EA, MAAA Associate Actuary

Edward J. Hockel

Edward J. Koebel, EA, FCA, MAAA CEO

#### Section I — Summary of Principal Results

1. For convenience of reference, the principal results of the valuation and a comparison with the results of the previous valuation are summarized below.

Health Insurance Trust (Dollars in thousands)

#### Health Insurance Trust Contribution Rates for Other Employees

\* This represents funding by the state to pay the cost of health insurance for retirees who are not eligible for Medicare and who retired on or after July 1, 2010, less the amounts that are otherwise required to be paid by the retirees under KRS 161.675. See KRS 161.550(2).

\*\* This represents funding by active members, local school districts, universities and other employers toward the unfunded liability of the health trust. See KRS 161.540(1)(c)(3) & 161.550(5).

169

We recommend maintaining the Total Employer Contribution rate at 0.08% by rounding the normal contribution up to 0.03% for fiscal year 2027 (from actual amount of 0.024%) and holding the accrued liability contribution at 0.05%. The resulting contribution is equivalent to using an effective amortization period of 14 years.

## Life Insurance Trust

#### Life Insurance Contribution Rates

| Contribution for year ending | June 30, 2027 | June 30, 2026 |
|------------------------------|---------------|---------------|
| Normal                       | 0.03%         | 0.03%         |
| Accrued liability            | 0.05          | 0.05          |
| Total                        | 0.08%         | 0.08%         |

\* Includes liability for death in active service. This amount could be segregated from the OPEB liability and assets could be split for active and post-employment purposes. However, since this could be administratively burdensome and since death in active service liabilities can be considered de minimis, we will consider the entire liability an OPEB liability under GASB 74 and 75.

- 2. The valuation indicates combined member, employer and state contributions of 3.54% of active member payroll would be sufficient to support the current benefits of the retiree medical plan and state contributions of 0.08% of active member payroll would be sufficient to support the current benefits of the life insurance plan. Comments on the valuation results as of June 30, 2024, are given in Section IV and further discussion of the contribution levels is set out in Sections VI and VII.
- 3. Schedule B shows the development of the actuarial value of assets. The assumed investment rate of return is 7.1% for Health Insurance Trust and 7.1% for Life Insurance Trust.
- 4. Schedule D of this report outlines the full set of actuarial assumptions and methods employed in the current valuation. Since the previous valuation, the initial per capita costs of health care and the rates of health care inflation used to project the per capita health care costs have been increased for the next few years starting at 7.%, while continuing to step down to an ultimate health care trend assumption of 4.5%, which is 2.% higher than our price inflation assumption. The increase in trend is due to continuing high expectations for prescription drug costs and utilization, particularly for specialty drugs.
- 5. The impacts of the COVID-19 pandemic, the ACA and the Inflation Reduction Act were considered in this valuation. We note expected 2025 per member per month (PMPM) costs for the stand alone Medicare Part D prescription drug plan is less than expected in spite of the plan changes due to the Inflation Reduction Act, including \$2,000 out of pocket maximum, because of increased Federal reimbursements and the additional \$15 PMPM premium stabilization contribution. We have made no additional specific changes to the valuation results due to the Inflation Reduction Act, COVID-19 or the ACA, but we have included scenarios in our sensitivity analysis section in Schedule G to illustrate the potential impact of changes to the Medicare Part D plan design, such as the elimination of the \$15 PMPM premium stabilization contribution or decreased Federal reimbursements. We also considered scenarios regarding economic factors and healthcare trend in our sensitivity

analysis in Schedule G. Continued monitoring of the impact of these and any future such events on the plan's liability will be required.

- 6. Provisions of the system, as summarized in Schedule E, were taken into account in the current valuation.
- 7. The funded ratio shown in the Summary of Principal Results, is the ratio of actuarial value of assets to the actuarial accrued liability. The funded status would be different based on the fair value of assets. The funded ratio is an indication of progress in funding the promised benefits. Since the ratio is less than 100%, there is a need for additional contributions toward the payment of the unfunded actuarial accrued liability. In addition, this funded ratio does not have any relationship to measuring the sufficiency if the plan had to settle its liabilities.

#### Section II — Membership Data

1. Data regarding the membership of the retiree medical and life insurance plans for use as a basis of the valuation were furnished by the system's office. The following tables summarize the membership of the system as of June 30, 2024, upon which the valuation was based. Detailed tabulations of the data are given in Schedule F.

#### Active Members as of June 30, 2024 (Dollars in thousands)

| Group                                    | Number | Annual<br>Salaries |
|--|--------|--------------------|
| University TRS 1 and TRS 2               | 1,239  | \$ 94,584          |
| University TRS 3                         | 1,303  | 82,773             |
| University TRS 4                         | 395    | 17,893             |
| Total University Active Members          | 2,937  | 195,250            |
| Non-University Full Time TRS 1 and TRS 2 | 25,775 | 2,014,122          |
| Non-University Full Time TRS 3           | 28,966 | 1,735,679          |
| Non-University Full Time TRS 4           | 5,799  | 260,122            |
| Non-University Part Time TRS 1 and TRS 2 | 990    | 9,681              |
| Non-University Part Time TRS 3           | 5,444  | 56,963             |
| Non-University Part Time TRS 4           | 6,103  | 36,651             |
| Total Non-University Active Members      | 73,077 | 4,113,218          |
| Total                                    | 76,014 | \$ 4,308,468       |

2. The following tables show the number of retired members and their beneficiaries receiving health care as of the valuation date as well as average ages.

#### Retirees Receiving Health Benefits as of June 30, 2024

|             | Under Age 65 | Age 65 and Over | Total  |
|-------------|--------------|-----------------|--------|
| Number      | 8,418        | 32,582          | 41,000 |
| Average Age | 59.66        | 75.82           | 72.51  |

#### Spouses Receiving Health Benefits as of June 30, 2024

| Number      | 1,154 | 5,168 | 6,322 |
|-------------|-------|-------|-------|
| Average Age | 60.09 | 75.40 | 72.60 |

3. The retiree health plan valuation includes 71,213 active members eligible for health care and the life insurance plan valuation includes 70,712 active members eligible for life insurance. There were initially 76,014 active members eligible for health care and life insurance. However, 4,801 were ultimately excluded from the retiree health plan active

headcounts and 5,302 from the life insurance plan active headcounts as they are either retirees returning to work or members working an additional active position. They are already reflected in the active or retiree headcounts.

- 4. The retiree health plan valuation includes 8,409 deferred vested members eligible for health care at age 60 and the life insurance plan valuation includes 11,845 deferred vested members eligible for retiree life insurance at age 60. There were initially 8,467 deferred vested members eligible for health care at age 60, and 11,957 deferred vested members eligible for retiree life insurance at age 60. However, 58 were ultimately excluded from the retiree health plan deferred vested headcounts and 112 from the life insurance plan deferred vested headcounts as they are either retirees returning to work or members working an additional active position. They are already reflected in the active or retiree headcounts
- 5. The life insurance plan valuation includes 54,048 retired members eligible for life insurance. There were initially 55,483 retired members eligible for life insurance. However, 1,435 were ultimately excluded from the life insurance plan retiree headcounts as they were listed multiple times, reflecting different pension benefits earned under multiple roles as an employee. They are already reflected in the retiree headcounts.

#### Section III — Assets

- As of June 30, 2024, the fair value of Health Insurance Trust assets held by the retiree medical plan amounted to \$3.32 billion and the fair value of Life Insurance Trust assets held by the life insurance plan amounted to \$101.6 million. The estimated market investment return for the plan year was 12.37% for the Health Insurance Trust and 11.18% for the Life Insurance Trust.
- The five-year market related value of health trust assets used for valuation purposes as of June 30, 2024, was \$3.25 billion and the five-year market related value of Life Insurance Trust assets used for valuation purposes as of June 30, 2024 was \$102.8 million. Schedule B shows the development of the actuarial value of assets as of June 30, 2024.
- 3. Schedule C shows the receipts and disbursements for the year preceding the valuation date and a reconciliation of the asset balances for the Health Insurance Trust and the Life Insurance Trust.

#### Section IV — Comments on Valuation

- 1. Schedule A of this report outlines the results of the actuarial valuation. The valuation was prepared in accordance with the actuarial assumptions and the actuarial cost method, which are described in Schedule D.
- 2. The valuation shows the retiree medical plan has an actuarial accrued liability of \$2.17 billion for benefits expected to be paid on account of the present active membership, based on service to the valuation date. The liability on account of deferred vested members amounts to \$85 million. The liability on account of benefits payable to retirees and covered spouses amounts to \$1.78 billion. The total actuarial accrued liability of the retiree medical plan amounts to \$4.04 billion. Against these liabilities, the retiree medical plan has present assets for valuation purposes of \$3.2 billion. When this amount is deducted from the actuarial accrued liability of \$4.04 billion, there remains \$789.6 million as the unfunded actuarial accrued liability for the retiree medical plan.
- 3. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The normal contribution for the retiree medical plan is determined to be \$86.6 million, or 2.01% of payroll.
- 4. The valuation shows that the life insurance plan has an actuarial accrued liability of \$16.8 million for benefits expected to be paid on account of the present active membership, based on service to the valuation date. The liability on account of deferred vested members amounts to \$4.9 million. The liability on account of benefits payable to retirees amounts to \$103.8 million. The total actuarial accrued liability of the life insurance plan amounts to \$125.5 million. This amount includes liability for death in active service. The liability for death in active service could be segregated from the OPEB liability and assets could be split for active and post-employment purposes. As this could be administratively burdensome and, as death in active service liabilities can be considered de minimis, we will consider the entire liability an OPEB liability under GASB 74 and 75. Against these liabilities, the life insurance plan has present assets for valuation purposes of \$102.8 million. When this amount is deducted from the actuarial accrued liability of \$125.5 million, there remains \$22.8 million as the unfunded actuarial accrued liability for the life insurance plan.
- 5. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The normal contribution for the life insurance plan is determined to be \$1.05 million, which is rounded up to 0.03% of payroll.

#### Section V — Derivation of Experience Gains and Losses

1. Actual experience will never (except by coincidence) coincide exactly with assumed experience. It is assumed that gains and losses will be in balance over a period of years, but sizable year-to-year fluctuations are common. Detail on the derivation of the experience gain (loss) for the year ended June 30, 2024, is shown below (dollars in thousands).

|      | Experience Gain/(Loss) of the:  | Hea | lth Insurance<br>Trust | Lif | e Insurance<br>Trust |
|------|---|-----|------------------------|-----|----------------------|
| (1)  | UAAL as of June 30, 2023  | \$  | 1,120,642              | \$  | 23,584               |
| (2)  | Normal cost from last valuation   |     | 84,496                 |     | 1,007                |
| (3)  | Expected employer contributions   |     | 174,478                |     | 2,279                |
| (4)  | Interest accrual:<br>[(1) + (2)] x .071 - (3) x (.071)/2 for MIF<br>[(1) + (2)] x .071 - (3) x (.071)/2 for LIF |     | 79,371                 |     | 1,665                |
| (5)  | Expected UAAL before changes: $(1) + (2) - (3) + (4)$   | \$  | 1,110,031              | \$  | 23,977               |
| (6)  | Change due to updated health care trend rates   |     | 243,591                |     |                      |
| (7)  | Change due to claims experience   |     | (286,194)              |     |                      |
| (8)  | Expected UAAL after changes: $(5) + (6) + (7)$  | \$  | 1,067,428              | \$  | 23,977               |
| (9)  | Actual UAAL as of June 30, 2024   |     | 789,555                |     | 22,766               |
| (10) | Total gain/(loss): (9) - (8)  |     | (277,873)              |     | (1,211)              |
|      | (a) Contribution and investment gain/(loss)   |     | (227,144)              |     | (665)                |
|      | (b) Experience gain/(loss) (10) - (10a)   |     | (50,729)               |     | (546)                |
| (11) | Accrued liabilities as of June 30, 2023   | \$  | 3,909,612              | \$  | 122,611              |
| (12) | Experience gain/(loss) as percent of<br>actuarial accrued liabilities at start of year<br>(10b) / (11)          |     | (1.3 %)                | )   | (0.45 %)             |

#### Section VI — Contributions Payable Under the Plans

1. KRS 161.420 and 161.550 provide the amounts employers and the state are required to contribute to the Health Insurance Trust. These contribution amounts vary by date of membership and employee type.

| Uni              | University Employees |         | School District Emp<br>(Non-Federal) |         |         | 0                | ther Employe | es      |
|------------------|----------------------|---------|--------------------------------------|---------|---------|------------------|--------------|---------|
| TRS 1 &<br>TRS 2 | TRS 3                | TRS 4   | TRS 1 &<br>TRS 2                     | TRS 3   | TRS 4   | TRS 1 &<br>TRS 2 | TRS 3        | TRS 4   |
| 2.775 %          | 2.775 %              | 2.000 % | 3.000 %                              | 3.000 % | 3.000 % | 3.750 %          | 3.750 %      | 3.750 % |

#### **Employer Percentage of Payroll Contributions Made to Medical Insurance Trust**

\* In addition to the amounts contributed by school districts on behalf of non-federal employees, the state contributes 0.75%

- For the year ending June 30, 2024, member contributions will be 2.775% for university employees and 3.75% for all other members. Based upon the amortization of the unfunded actuarial accrued liability over a 16-year period as a level percentage of payroll, the valuation indicates employer and state contributions of 0.765% of payroll for university employees and (0.21)% of payroll for all other members.
- 3. The state is scheduled to contribute 0.08% of salary to the Life Insurance Trust for the year ending June 30, 2026. CMC recommends maintaining this rate for the year ending June 30, 2027, to support sufficiently the benefits of the life insurance plan.

|                   | Required Contribution Rates<br>For Year Ending June 30, 2025<br>Health Insurance Trust |
|-------------------|--|
| Normal            | 2.01 %   |
| Accrued liability | 1.53 %   |
| Total             | 3.54 %   |

|   | University Employees |         |         |                  | School District Employees<br>(Non-Federal) |         |                  | Other Employees |         |  |
|---|----------------------|---------|---------|------------------|--|---------|------------------|-----------------|---------|--|
|   | TRS 1 &<br>TRS 2     | TRS 3   | TRS 4   | TRS 1 &<br>TRS 2 | TRS 3                                      | TRS 4   | TRS 1 &<br>TRS 2 | TRS 3           | TRS 4   |  |

\* This represents funding by the state to pay the cost of health insurance for retirees who are not eligible for Medicare and who retired on or after July 1, 2010, less the amounts that are otherwise required to be paid by the retirees under KRS 161.675. See KRS 161.550(2). Includes the state contribution of 0.75% on behalf of non-federal school district employees.

\*\* This represents funding by active members, local school districts, universities and other employers toward the unfunded liability of the health trust. See KRS 161.540(1)(c)(3) and 161.550(5).

#### Required Contribution Rates Life Insurance Trust For Year Ending June 30, 2027

- 4. The valuation indicates that a total normal contribution of 2.01% of payroll is required to meet the cost of benefits currently accruing under the retiree medical plan and 0.03% of payroll is required to meet the cost of benefits currently accruing under the life insurance plan. The difference between the total contribution and the normal contribution remains to be applied toward the liquidation of the unfunded actuarial accrued liability. This accrued liability payment is 1.53% of payroll for the retiree medical plan and 0.05% of payroll for the life insurance plan.
- 5. The unfunded actuarial accrued liability amounts to \$789.6 million for the retiree medical plan and \$22.8 million for the life insurance plan as of the valuation date. An accrued liability contribution rate of 1.53% of payroll for the retiree medical plan and 0.05% of payroll for the life insurance plan is sufficient to amortize the unfunded actuarial accrued liabilities over an 16-year period for the retiree medical plan and a 20-year period for the life insurance plan, based on the assumption that the payroll will increase by 2.75% annually.

#### Section VII — Comments on the Level of Funding

- 1. Beneficiary contributions and the system's monthly contribution for retirees who opt into the retiree medical plan is based upon date of hire, date of attaining age 65, years of service at retirement, plan election, Medicare eligibility and tobacco use. Beneficiary contributions for dependents are targeted to be 100% of the cost of expected claims and/or insured premiums for spouses age 65 and older. Historically, this target has been achieved. The full cost for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the state on a current disbursement basis. Current employer and state contributions have been determined to be sufficient to fund the cost of the benefits to be provided. Benefits for university, school district (non-federal), and other members are identical, although active employee contributions collected from university, school district (non-federal) and other members differ. A listing of active member retiree medical plan contributions by fiscal year, date of membership and employer type is provided in Schedule E.
- 2. This valuation provides the contributions required to fund sufficiently the retiree medical plan and to ensure the future solvency of the Health Insurance Trust. For all membership, a combined member contribution together with the employer and state contributions totaling 3.54% of payroll is required to meet the cost of benefits currently accruing and provide for the amortization of the unfunded actuarial accrued liability over a period of 16 years.

#### Section VIII — Accounting Information

1. The information required under Governmental Accounting Standards Board (GASB) Statements No. 74 and 75 will be issued in separate reports. The following information is provided for informational purposes only.

| Number of Active and Retired Members in<br>Retiree Medical Plan as of June 30, 2024 |         |  |  |  |
|---|---------|--|--|--|
| Group   | Number  |  |  |  |
| Retirees currently receiving health benefits  | 41,000  |  |  |  |
| Spouses of retirees currently receiving health benefits                             | 6,322   |  |  |  |
| Terminated employees entitled to benefits but not yet receiving benefits            | 8,409   |  |  |  |

# **Schedule D**

#### **Statement of Actuarial Assumptions and Methods**

The rates of retirement, disability, mortality, termination, salary increases, and rates of future benefit participation used in the valuation were selected based on the actuarial experience study prepared as of June 30, 2020, submitted to and adopted by the board on Sept. 20, 2021. The health care cost trend rates, and expected plan costs were determined by the actuary based on recent experience.

Valuation Date — June 30, 2024

**Discount Rate** — 7.1% per annum, compounded annually for Health Insurance Trust. 7.1% per annum, compounded annually for Life Insurance Trust.

| Annual Trend Rate |                 |         |  |  |  |  |  |

| 2036 and beyond   | 4.50            | 4.50    |  |  |  |  |  |

Health Care Cost Trend Rates — Following is a chart detailing trend assumptions.

**Expected Annual Claims** — For retirees ages 65 and older, per capita health care costs are adjusted to reflect expected health care cost changes related to age. The relative value factors used were developed from the Society of Actuaries' June 2013 research report Health Care Costs-From Birth to Death by Dale Yamamoto and from the ASOP 6 practice note developed by the American Academy of Actuaries. Representative values of the expected annual claims based on a blended 2025 MEHP rate of \$210 per month, or \$2,520 per year, are as follows:

| Participant Age | Male    | Female  |
|-----------------|---------|---------|
| 65              | \$1,713 | \$1,632 |
| 70              | 2,082   | 2,007   |
| 75              | 2,472   | 2,343   |
| 80              | 2,870   | 2,699   |
| 85              | 3,233   | 3,046   |
| 90              | 3,550   | 3,308   |

For the retiree health care liabilities of those under age 65, the current premium charged by the Kentucky Employees' Health Plan (KEHP) is used as the base cost and is projected forward using the health care trend assumption. No implicit rate subsidy is calculated or recognized as the implicit rate subsidy is deemed the responsibility of the KEHP. Under Actuarial Standard of Practice No. 6 (ASOP No. 6), aging subsidies (or implicit rate subsidies) should be recognized, as the differences in health care utilization and cost due to age have been demonstrated and well quantified.

The impact of aging on a valuation's results can be as significant as the use of mortality, trend, and discounting. It has been the long-standing position that the responsibility for costs that relate to KEHP implicit subsidies, rests with KEHP, not the system, as the system has no operational authority over KEHP. As such, KEHP implicit subsidies are excluded from the OPEB valuation process of the retiree medical plan. As GASB 74 and 75 prohibit such a deviation from ASOP No. 6 and therefore the KEHP implicit subsidies will be valued and will increase the actuarial accrued liability for GASB 74 and 75 purposes. The information required under GASB Statements No. 74 and 75 will be issued in separate reports.

**Retiree Medical Plan Costs** — Assumed per capita health care costs were based on past experience and trended based on the assumptions. Following are charts detailing retiree per capita assumptions. These amounts include medical, drug, and administrative costs and represent the amount that the system pays as the full contribution amount. An additional \$8 per month is paid to the Department of Employee Insurance (DEI) and is not included in the under-age-65 costs listed below. For retirees ages 65 and older, the average costs shown are normalized to age 65, and then age adjusted in calculating liabilities.

# Monthly Under Age 65 (KEHP) Full Costs as of Jan. 1, 2025

\* Family Cross-Reference is not an available payment option if hired on Jan. 1, 2025, or after.

**Retiree Medical Plan Contribution** — The portion of the medical plan premiums paid by participants is composed of a Plan Option Cost, a Time-Specific Adjustment Cost and a Shared Responsibility Cost. Retirees under the age of 65 who do not complete their LivingWell Promise will be charged an additional \$40 per month above the Plan Option Cost detailed below. An additional contribution is required to be paid by retirees under the age of 65 who use tobacco (\$40 for Single or Family Cross-Reference, and \$80 for Parent Plus, Couple or Family).

# Time-Specific Adjustments for Retirees Employed On/After July 1, 2002, as of Jan. 1, 2025

\*Family Cross-Reference is not an available payment option if hired on Jan. 1, 2025, or after.

**Current Retiree Medical Plan Participation** — Actual census data and current plan elections (including waivers) provided by the system were used for those retirees currently participating in the retiree medical plan. Current participants are assumed to maintain their current retiree medical plan coverage until they are no longer eligible.

Anticipated Retiree Medical Plan Participation — The assumed annual rates of health care plan participation for future retirees are as follows.

#### **Member Participation**

| Years of<br>Service | TRS 1 | TRS 2 | TRS 3 & TRS 4 |
|---------------------|-------|-------|---------------|
| 5-9.99              | 20 %  | 20%   | Not Eligible  |
| 10-14.99            | 40    | 20    | Not Eligible  |
| 15-19.99            | 70    | 40    | 40%           |
| 20-24.99            | 90    | 50    | 50            |
| 25-25.99            | 90    | 80    | 80            |
| 26-26.99            | 90    | 85    | 85            |
| 27 or more          | 90    | 90    | 90            |

Anticipated Retiree Medical Plan Elections — The assumed rates of plan election for future retirees participating in the KEHP plans are provided in the following table. As the assumed plan election rates are estimates and actual results may be materially different, this assumption will need to be revised as experience evolves.

| LivingWell | LivingWell | LivingWell | LivingWell |
|------------|------------|------------|------------|
| CDHP       | PPO        | Basic CDHP | HD         |
| 58%        | 39%        | 3%         | 0%         |

**Spouse Coverage in Medical Plan** — Actual census data and current plan elections were used for MEHP- and KEHP-covered spouses (including beneficiaries) of current retirees. For spouses of future retirees, 30% of future male retirees are assumed to cover their spouse and 25% of future female retirees are assumed to cover their spouse. Male retirees are assumed to be three years older than their spouse and female retirees are assumed to be one year younger than their spouse.

**Disabled Dependent Children in Retiree Medical Plan** — The liability associated with disabled dependent children was determined to be de minimis and was therefore excluded from this valuation.

**Withdrawal Assumption** — Future vested members who terminate employment prior to retirement are assumed to elect to withdraw their contributions based upon their age and service at termination of employment as follows.

| Age at<br>Termination<br>of Employment | 5 - 10 | Years of Service<br>10 - 15 | 15+ |
|--|--------|-----------------------------|-----|
| Under Age 55                           | 20%    | 15%                         | 10% |
| Ages 55+                               | 10%    | 10%                         | 10% |

#### **Rates of Withdrawal Upon Termination of Employment**

All vested members who terminate employment prior to retirement are assumed to elect to withdraw their contributions prior to receiving a pension benefit based upon their service as follows.

| Rates of Withdrawal Prior to Receiving a Pension |     |     |     |  |  |  |  |  |
|--|-----|-----|-----|--|--|--|--|--|
| Benefit  |     |     |     |  |  |  |  |  |
| Years of Service                                 |     |     |     |  |  |  |  |  |
| 5 - 9 10 - 14 15 - 26 27+                        |     |     |     |  |  |  |  |  |
| 25%  | 15% | 10% | 25% |  |  |  |  |  |

All vested members who terminate employment prior to retirement and who are assumed to elect to receive a pension benefit are assumed to begin receiving their benefit at age 60.

**Salary Increases** — Representative values of the assumed annual rates of future salary increases are as follows and include wage inflation at 2.75% per annum.

| Service       | 1   | 2   | 3 | 4 | 5 | 6    | 7   | 8    | 9 | 10 | 11 | 12   | 13  | 14  | 15   | 16   | ≥17 |
|---------------|-----|-----|---|---|---|------|-----|------|---|----|----|------|-----|-----|------|------|-----|
| Annual Rate % | 7.5 | 5.5 | 5 | 5 | 5 | 4.75 | 4.5 | 4.25 | 4 | 4  | 4  | 3.75 | 3.5 | 3.5 | 3.25 | 3.25 | 3   |

**Payroll Growth** — 2.75% per annum, compounded annually.

**Price Inflation** — 2.5% per annum, compounded annually.

**Federal Legislation** — The impacts of the Affordable Care Act (ACA) and the Inflation Reduction Act (IRA) were addressed in this valuation. Review of the information currently available did not identify any specific provisions of the legislation that are anticipated to directly impact results other than plan design features and fees currently mandated by the ACA and incorporated in the plan designs, which are included in the current baseline claims costs, and the anticipation of potential changes to Medicare due to the IRA, which are included in our trend assumption and considered in our sensitivity analysis section in Schedule G. Continued monitoring of the impact on the plan's liability due to this and other legislation, if applicable, will be required.

**COVID-19** — The impact of COVID-19 pandemic was considered in this valuation, however, no changes were incorporated at this time due to the level of uncertainty regarding the impact on both plan costs and contribution levels going forward. Given the uncertainty regarding COVID-19 (e.g., the impact of routine care being deferred, direct COVID-19 treatment and prevention costs, changes in contribution and budget projections), continued monitoring of the impact on the plan's liability will be required.

Asset Valuation Method — Five-year market related actuarial value, as developed in Schedule B. The actuarial value of assets recognizes a portion of the difference between the fair value of assets and the expected actuarial value of assets, based on the ultimate assumed valuation rate of return. The amount recognized each year is 20% of the difference between fair value and expected actuarial value. The ultimate assumed valuation rate of return is assumed to be 7.1% for the Health Insurance Trust and 7.1% for the Life Insurance Trust.

Actuarial Cost Method — The valuation is prepared on the projected benefit basis, under which the present value, at the interest rate assumed to be earned in the future, of each active member's expected benefit at retirement or death is determined, based on his/her age, service, and gender. The calculations take into account the probability of a member's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his/her terminating with a service, disability or survivor's benefit. The present value of the expected benefits payable on account of the active members is added to the present value of the expected future payments to retired members and beneficiaries and deferred vested members to obtain the present value of all expected benefits payable from the system on account of the present group of members and beneficiaries.

The employer contributions required to support the benefits of the system are determined following a level funding approach and consist of a normal contribution and an accrued liability contribution.

The normal contribution is determined using the entry age normal method. Under this method, a calculation is made to determine the uniform and constant percentage rate of employer contribution, which, if applied to the compensation of the average new member during the entire period of his/her anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on his or her behalf.

The unfunded actuarial accrued liability is determined by subtracting the present value of prospective employer normal contributions and member contributions, together with the current actuarial value of assets held, from the present value of expected benefits to be paid from the system.

**Separations From Service** — Representative values of the assumed annual rates of salary increases, death, disability, withdrawal, service retirement and early retirement are as follows.

|                               |         | Ν          | Iales: Annua | l Rate of |        |                                  |                                    |  |  |

\* Plus 20% in the first year attaining 30 years of service; plus 25% at age 65 in the first year attaining 30 years of service

**Deaths after retirement:** Mortality rates were based on the Pub-2010 (Teachers Benefit-Weighted) Mortality table, projected generationally based on Projection Scale MP-2020, with various set forwards, set backs, and adjustments for each of the groups. Below is a summary of the specific mortality tables and adjustments for each of the groups. Mortality Assumption — All mortality rates use Pub-2010 benefit-weighted tables.

|                       | Set Forward (+) / | Adjustment to | Projection           |
|-----------------------|-------------------|---------------|----------------------|
| Group                 | Set Back (-)      | Rates         | Scale                |
| Service retirees      | Male: +2          | Male: 102%    | 75% of MP-2020       |
|                       | Female: +2        | Female: 98%   | / 5 / 0 01 WH - 2020 |
| Contingont appuitants | Male: +2          | Male: 101%    | 75% of MP-2020       |
| Contingent annuitants | Female: None      | Female: 100%  | 7570 01 MIF-2020     |

# Schedule E Summary of Main Plan Provisions

The Teachers' Retirement System of the State of Kentucky was established July 1, 1940. The valuation took into account amendments to the system effective through June 30, 2024. The following Summary describes the main benefit and contribution provisions of the system, as interpreted for the valuation.

#### Eligibility for Access to Retiree Medical Coverage Service Retirement —

| TRS 1 and TRS 2 Members | Completion of 27 years of service, or        |  |  |  |
|-------------------------|--|--|--|--|
|                         | Attainment of Age 55 and 5 years of service  |  |  |  |
|                         |  |  |  |  |
| TRS 3 Members           | Completion of 27 years of service, or        |  |  |  |
|                         | Attainment of Age 55 and 10 years of service |  |  |  |
|                         | Attainment of Age 60 and 5 years of service  |  |  |  |
|                         |  |  |  |  |
| TRS 4 Members           | Attainment of Age 57 and 10 years of service |  |  |  |
|                         | Attainment of Age 65 and 5 years of service  |  |  |  |

For employees hired prior to July 1, 2008, retiree medical plan coverage eligibility is attained when an employee retires, as described above. All other employees must be eligible to retire and additionally have completed 15 years of service to be eligible for retiree medical plan coverage.

**Disability Retirement** — Disabled employees hired prior to July 1, 2008, with at least five years of service, who are totally and permanently incapable of being employed as a teacher, are eligible for retiree medical plan coverage upon approval for TRS disability retirement benefits. Disabled employees hired after July 1, 2008, must have 15 years of service to be eligible for retiree medical plan coverage upon approval for TRS disability retirement benefits.

Members and dependents under age 65 and eligible for Medicare due to a disability after Jan. 1, 2013, are only eligible to enroll in the MEHP. Under-age-65 members who retired prior to Jan. 1, 2013, are grandfathered from this requirement and allowed a choice of KEHP or MEHP coverage. Actual census data and current plan elections were used for current disabled retirees. All future disabled members under the age of 65 with Medicare are placed on the MEHP and not the KEHP. This has been consistently applied since 2013.

**Survivors** — Spouses of employees who die in service while eligible to retire, as well as survivors of service and disabled retirees, are eligible for retiree medical plan coverage if elected within 30 days of the employee's/retiree's death with no future remarriage. Otherwise, survivor is not eligible for retiree medical plan coverage.

**Spousal Shared Risk Waiver for MEHP** — Beginning in 2013, eligible spouses who waive the MEHP coverage, will no longer have the opportunity to enroll during any annual MEHP open enrollment so most spousal waivers on the MEHP are now permanent waivers unless a TRS-specific qualifying event is met. This does not apply to the KEHP. This MEHP eligibility rule became necessary to mitigate spousal adverse selection with zero premium Medicare Advantage plans on the individual and open market.

**Termination** — For employees hired prior to July 1, 2008, and who terminated with at least five years of service, retiree medical plan coverage eligibility is attained at age 60 with unreduced pension benefits. For employees hired on or after July 1, 2008, and who terminated with at least 15 years of service, retiree medical plan coverage is assumed to begin at age 60.

**Reemployed Retirees** — Effective Jan. 1, 2019, and because of the Affordable Care Act (ACA) and Medicare secondary payer (MSP) federal rules, if a TRS retiree returns to work and is offered the same health insurance coverage as any full time employee (whether the KEHP, MEHP or another plan), then the member must waive coverage through TRS. For valuation purposes, active

employees identified as currently receiving retiree health care through the system are valued as retirees. Retirees making active contributions into a second account do not qualify for insurance on that second account.

#### **Covered Member Retiree Medical Plan Contributions**

**Under Age 65 Retiree Shared Responsibility Contribution** — Effective July 1, 2010, retirees under the age of 65 began a three-year phase-in of the Shared Responsibility contribution. This contribution reduces the applicable amount of the full contribution provided by the system to retirees, by adjusting the Shared Responsibility Contribution amount by 100% less the appropriate percentage from the Retiree Percentage Contribution table below. Effective July 1, 2012, the full Shared Responsibility Contribution equals the Standard Medicare Part B premium paid by retirees ages 65 and older.

| Monthly Under Age 65 Shared Responsibility Contribution Timeline |                                 |                  |  |  |  |  |  |  |
|--|---------------------------------|------------------|--|--|--|--|--|--|
| Effective Date   | Medicare Part B<br>Monthly Cost | Formula          | Shared<br>Responsibility<br>Contribution |  |  |  |  |  |
| July 1, 2010   | \$ 110.50                       | (1/3 x \$110.50) | \$ 37.00                                 |  |  |  |  |  |

| 27 or more          | 0  | 0  | 0     | 0             |

\* 0% for disabled retirees that retired prior to Jan 1, 2002.

# **ACTUARIAL SECTION**

**Covered Member Retiree Retiree Medical Plan** — For 2025, the TRS Board of Trustees approved a single contributions amount of up to \$877.30, as well as an additional \$8.00 per month paid to the Department of Employee Insurance (DEI) for participants on the Kentucky Employees' Health Plan (KEHP). TRS will contribute this amount towards insurance costs, less the Shared Responsibility cost of \$185.00. Under-65 retirees who are not Medicare eligible and continue on the KEHP are responsible for the remaining costs left from the total premium costs. The total premium costs are shown below.

| Under Age 65 (KEHP)<br>Tier LivingWell LivingWell LivingWell |    |          |    |          |            |    |          |    |                 |
|--|----|----------|----|----------|------------|----|----------|----|-----------------|
| Elected  |    | CDHP     |    | PPO      | Basic CDHP |    | HD       |    | Older<br>(MEHP) |
| Single   | \$ | 930.76   | \$ | 949.04   | \$ 901.04  | \$ | 835.42   | \$ | 210.00          |
| Parent Plus  |    | 1,269.28 |    | 1,320.40 | 1,234.80   |    | 1,144.86 |    |                 |
| Couple   |    | 1,866.24 |    | 1,981.62 | 1,863.04   |    | 1,727.36 |    |                 |
| Family   |    | 2,078.08 |    | 2,185.78 | 2,069.88   |    | 1,919.14 |    |                 |

# Monthly Under Age 65 Plan Full Costs\* Effective Jan. 1, 2025

\* Does not include the additional contribution required to be paid by retirees under the age of 65 who use tobacco (\$40 for Single or Family Cross-Reference, and \$80 for Parent Plus, Couple or Family). Also, this does not include the additional contribution required to be paid by retirees under the age of 65 who do not complete their LivingWell Promise, which is an additional \$40 per month for all levels of coverage-single, parent +, couple, and family. For valuation purposes, it is conservatively assumed that, over time, 100% of KEHP retirees will complete their LivingWell Promise. This assumption will be monitored in future experience studies.

\*\* Family Cross-Reference is not an available payment option if hired on January 1, 2025 or after.

**Spouse Contributions** — 100% of the full cost for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the state. Neither the state nor TRS will pay any subsidy for family style coverage.

Survivors — Spouses of employees who die in service while eligible to retire, as well as survivors of service and disabled retirees, are eligible for retiree medical plan coverage if elected within 30 days of the employee's/retiree's death with no future remarriage. Otherwise, survivor is not eligible for retiree medical plan coverage.

**Spousal Shared Risk Waiver for MEHP** — Beginning in 2013, eligible spouses who waive the MEHP coverage, will no longer have the opportunity to enroll during any annual MEHP open enrollment so most spousal waivers on the MEHP are now permanent waivers unless a TRS-specific qualifying event is met. This does not apply to the KEHP. This MEHP eligibility rule became necessary to mitigate spousal adverse selection with zero premium Medicare Advantage plans on the individual and open market.

# Monthly Surviving Spouse Contribution Effective Jan. 1, 2025

| Under Age 65 (KEHP) |  |    |                   |    |                  |    |                            |    |                 |    |                               |

|                     | Parent Plus                            |    | 1,277.28          |    | 1,328.40         |    | 1,242.80                   |    | 1,152.86        |    | n/a                           |

**System Retiree Medical Plan Contributions** — The system Contribution Rate Basis is determined annually by the system; and the full cost is projected based on historical claims data. For retirees, the following percentages are based on years of service at retirement and are then applied to the system Contribution Rate Basis.

|                        | TR  | S 1   |       |               |

| 2.775 %              | 2.775 % | 2.775 % | 3.750 %          | 3.750%         | 3.750%       | 3.750 %          | 3.750 % | 3.750 % |  |

Life Insurance Plan Benefits — Effective July 1, 2000, the Teachers' Retirement System shall:

- (a) Provide a life insurance benefit in a minimum amount of \$5,000 for its members who are retired for service or disability if hired prior to Jan. 1, 2022. Provide a life insurance benefit in a minimum amount of \$10,000 for its members who are retired for service or disability if hired on or after Jan. 1, 2022. This life insurance benefit shall be payable upon the death of a member retired for service or disability to the member's estate or to a party designated by the member on a form prescribed by the retirement system; and
- (b) Provide a life insurance benefit in a minimum amount of \$2,000 for its active contributing members if hired prior to Jan. 1, 2022. Provide a life insurance benefit in a minimum amount of \$5,000 for its active contributing members if hired on or after Jan. 1, 2022. This life insurance benefit shall be payable upon the death of an active contributing member to the member's estate or to a party designated by the member on a form prescribed by the retirement system.

**Note** — Members employed on a substitute or part-time basis and working at least 69% of a full contract year in a single fiscal year will be eligible for a life insurance benefit for the balance of the fiscal year or the immediately succeeding fiscal year under certain conditions. For non-vested members employed on a substitute or part-time basis, the life insurance benefit is provided if death occurs as the result of a physical injury on the job. For vested members employed on a substitute or part-time basis, death does not have to be the result of a physical injury on the job for life insurance benefits to be provided.

(Dollars in thousands except Average Life Insurance Benefit)

\* Beginning with the June 30, 2021 valuation date, the counts in the exhibit above reflect all adjustments, which resulted in a larger number removed from rolls. Prior to June 30, 2021, the exhibit reflected the initial member counts.

#### Sensitivity Analysis — Health Insurance Trust

The June 30, 2024, valuation results of the Health Insurance Trust are projections based on the actuarial assumptions. Actual experience will differ from these assumptions, either increasing or decreasing cost. The charts on the following pages provide a simple analysis on how the costs are sensitive to changes to the assumed discount rate, the assumed inflation rate, the assumed rate of payroll growth, and the assumed rates of health care inflation (trend). The charts show the actuarial accrued liability, the unfunded liability, the funded ratio and the employer contribution rate under the following scenarios:

- The discount rate assumption sensitivity analysis shows the valuation results with the baseline discount rate assumption, 7.1%, together with a decrease in the discount rate to 6.1% and an increase in the discount rate to 8.1%. Under this scenario, the underlying inflation rate assumption is held constant at 2.5% and the payroll growth assumption is held constant at 2.75%.
- The inflation assumption sensitivity analysis shows the valuation results with the baseline underlying inflation rate assumption, 2.5%, together with decreases in the inflation rate to 2.25% and 2%. Under this scenario, the decrease in the underlying inflation rate assumption leads to corresponding decreases in the discount rate, the payroll growth assumption, and the assumed rates of salary increase for active members, and the ultimate health care trend.
- The wage inflation assumption sensitivity analysis shows the valuation results with the baseline underlying payroll growth assumption, 2.75%, together with decreases in the wage inflation assumption to 1.25% and 0%. Under this scenario, all other assumptions, including the individual member salary scale, are held constant so that the only impact is in the amortization of the unfunded liability, leading to higher employer contribution rates.
- The health care inflation (trend) assumption sensitivity analysis shows the valuation results with the baseline trend assumption along with a 1% increase in all assumed trend rates and a 1% decrease in all assumed trend rates.
- The MEHP cost sensitivity analysis shows the valuation results with the baseline costs along with the cost scenarios reflecting the risk of trust income disruption if income sources beyond the control of the state and TRS- such as prescription medication rebates and subsidies- are eliminated. We illustrate the impact of potential changes due to the Inflation Reduction Act on Medicare Part D costs and/or changes to Medicare Advantage plans under Medicare Part C.

#### Health Care Trend Assumption Sensitivity Analysis (Dollars in thousands)

\* This represents funding by active members, local school districts, universities and other employers toward the unfunded liability of the health trust. See KRS 161.540(1)(c)(3) & 161.550(5).

The 2025 monthly TRS MEHP rate of \$210 includes \$200 in EGWP prescription drug costs. The EGWP prescription drug costs are based on projected total drug costs minus projected reimbursements from CMS and drug manufacturers for Medicare Part D rebates, subsidies, and reinsurance. If these reimbursements were not to continue at the current rate, and if Medicare eligible medical costs were to increase significantly, it is estimated that TRS MEHP costs could increase to as much as \$809. In this case, the statutory contribution rates will be less than the actuarially determined contribution rates, the unfunded actuarial accrued liability will not be paid off in the scheduled 16 year timeframe and the health insurance fund will not reach 100% funded. To illustrate the potential impact of this risk, the chart below shows the valuation results under the baseline scenario of the monthly TRS MEHP rate of \$210, and incremental impacts of rate increases up to the projected worse case scenario of \$809 per month.

#### Health Insurance Trust MEHP Cost Sensitivity Analysis — Incremental Step Scenario (Dollars in thousands)

\* This represents funding by active members, local school districts, universities and other employers toward the unfunded liability of the health trust. See KRS 161.540(1)(c)(3) & 161.550(5).

# Sensitivity Analysis — Life Insurance Trust

The June 30, 2024, valuation results of the Life Insurance Trust are projections based on the actuarial assumptions. Actual experience will differ from these assumptions, either increasing or decreasing cost. The charts on the following pages provide a simple analysis on how the costs are sensitive to changes to the assumed discount rate, the assumed inflation rate, and the assumed rate of payroll growth. The charts show the actuarial accrued liability, the unfunded liability, the funded ratio and the employer contribution rate under the following scenarios. Please note we maintain a minimum total employer contribution rate of 0.08% for all scenarios except the 1% increase in the discount rate scenario:

- The discount rate assumption sensitivity analysis shows the valuation results with the baseline discount rate assumption, and 7.1% together with a decrease in the discount rate to 6.1% and an increase in the discount rate to 8.1%. Under this scenario, the underlying inflation rate assumption is held constant at 2.5% and the payroll growth assumption is held constant at 2.75%.
- The inflation assumption sensitivity analysis shows the valuation results with the baseline underlying inflation rate assumption, 2.5%, together with decreases in the inflation rate to 2.25% and 2%. Under this scenario, the decrease in the underlying inflation rate assumption leads to corresponding decreases in the discount rate, the payroll growth assumption, and the assumed rates of salary increase for active members.
- The wage inflation assumption sensitivity analysis shows the valuation results with the baseline underlying wage inflation assumption, 2.75%, together with decreases in the wage inflation assumption to 1.25% and 0%. Under this scenario, all other assumptions, including the individual member salary scale, are held constant so that the only impact is in the amortization of the unfunded liability, leading to higher employer contribution rates.

# Wage Inflation Assumption Sensitivity Analysis (Dollars in thousands)

\* Recommended contributions actuarially determined, but not less than 0.08%.

# **30-Year Baseline Projection Health Insurance Trust**

The results of actuarial valuations are a snapshot of the financial position on the valuation date, based on the assumed number of active employees and current beneficiaries. Projections simulate future actuarial valuation results over a forecast period (30 years in this case) by "creating" future new hires and performing valuations using the projected membership. The following items are assumed for the projected results.

- Active Employee Growth Rate 0%
- Valuation Discount Rate 7.1%
- Investment Rate of Return 7.1% each year
- Actuarial Value of Assets Five year smoothing, no corridor
- Amortization Method Level percent of payroll, closed
- Amortization Period 16-year period as of valuation date
- Future Contributions Based on the contribution rates defined in statue

All other demographic and economic changes are assumed to occur in accordance with the actuarial assumptions used for the actuarial valuation. Projections assume all actuarial assumptions are met and do not include any adjustment for adverse experience due to COVID-19 (either impacting claims or demographics), changes in the ACA, larger than expected increases to Medicare Advantage premiums, or lower than expected investment return or payroll growth.

# **30-Year Sensitivity Projection** Health Insurance Trust

The results of actuarial valuations are a snapshot of the financial position on the valuation date, based on the assumed number of active employees and current beneficiaries. Projections simulate future actuarial valuation results over a forecast period (30 years in this case) by "creating" future new hires and performing valuations using the projected membership. The following items are assumed for the projected results.

- Active Employee Growth Rate 0%
- Valuation Discount Rate 7.1%
- Investment Rate of Return 7.1% each year
- Actuarial Value of Assets Five year smoothing, no corridor
- Amortization Method Level percent of payroll, closed
- Amortization Period 16-year period as of valuation date
- Future Contributions Based on the contribution rates defined in statue
- MEHP Rate shown in table

All other demographic and economic changes are assumed to occur in accordance with the actuarial assumptions used for the actuarial valuation.

Projections assume all actuarial assumptions are met and do not include any adjustment for adverse experience due to COVID-19 (either impacting claims or demographics), changes in the ACA, larger than expected increases to Medicare Advantage premiums, or lower than expected investment return or payroll growth. The 2025 monthly TRS MEHP rate of \$210 includes \$200 EGWP prescription drug costs. The EGWP prescription drug costs are based on projected total drug costs minus projected reimbursements from CMS and drug manufacturers for Medicare Part D rebates, subsidies and reinsurance. If 25% of these reimbursements were to discontinue, TRS MEHP costs could increase to as much as \$359.75. In this case, the statutory contribution rates will be more than the actuarially determined contribution rates, the unfunded actuarial accrued liability would be paid off in the scheduled 16 year timeframe, and the health insurance fund would reach 100% funded, but it would take an additional 7 years to achieve.

# Schedule J

#### **Health Insurance Trust**

#### 25% risk scenario - MEHP rate = \$359.75 PMPM

If 50% of these reimbursements were to discontinue, TRS MEHP costs could increase to as much as \$509.50. In this case, the statutory contribution rates will be less than the actuarially determined contribution rates, the unfunded actuarial accrued liability will not be paid off in the scheduled 16 year timeframe, and the health insurance fund will not reach 100% funded until almost 2050.

# **Health Insurance Trust**

50% risk scenario - MEHP rate = \$509.50 PMPM

If 75% of these reimbursements were to discontinue, TRS MEHP costs could increase to as much as \$659.25. In this case, the statutory contribution rates will be less than the actuarially determined contribution rates, the unfunded actuarial accrued liability will not be paid off in the scheduled 16 year timeframe, and the health insurance fund will not reach 100% funded in the 30 year period.

# **Health Insurance Trust**

#### 75% risk scenario - MEHP rate = \$659.25 PMPM

If 100% of these reimbursements were to discontinue, TRS MEHP costs could increase to as much as \$809.00. In this case, the statutory contribution rates will be less than the actuarially determined contribution rates, the unfunded actuarial accrued liability will not be paid off in the scheduled 16 year timeframe, and the health insurance fund will not reach 100% funded in the 30 year period.

# **Health Insurance Trust**

100% risk scenario - MEHP rate = \$809 PMPM

# **30-Year Baseline Projection** Life Insurance Trust

The results of actuarial valuations are a snapshot of the financial position on the valuation date, based on the assumed number of active employees and current beneficiaries. Projections simulate future actuarial valuation results over a forecast period (30 years in this case) by creating future new hires and performing valuations using the projected membership. The following items are assumed for the projected results.

- Active Employee Growth Rate 0%
- Valuation Discount Rate 7.1%
- Investment Rate of Return 7.1% each year
- Actuarial Value of Assets Five-year smoothing, no corridor
- Amortization Method Level percent of payroll, closed
- Amortization Period 20-year period as of valuation date
- Future Contributions Based on expected actuarially determined contributions (not less than 0.08%)

All other demographic and economic changes are assumed to occur in accordance with the actuarial assumptions used for the actuarial valuation.

# Statistical Section

# **STATISTICAL SECTION**

This section of the Teachers' Retirement System of the State of Kentucky's Annual Comprehensive Financial Report presents detailed information as a context for understanding the information in the financial statements, note disclosures and required supplementary information regarding TRS's overall financial health. Schedules and information are derived from TRS's internal sources.

| Contents  |     |
|---|-----|
| Financial Trends  | 217 |
| These schedules contain trend information to help the reader understand how TRS's financial performance and well-<br>being have changed over time.                          |     |
| Demographic & Economic Information  | 220 |
| These schedules offer demographic and economic indicators to help the reader understand the environment within which TRS's financial activities take place.                 |     |
| Operating Information   | 225 |
| These schedules contain benefits, service and employer contribution data to help the reader understand how TRS's financial report relates to TRS's services and activities. |     |

## Life Insurance Trust

## Past 10 Fiscal Years

While TRS began separate reporting of its Life Insurance Trust effective Feb. 1, 2018, for investment purposes, life insurance funds always have been accounted for separately, which is the basis of the following schedules.

#### **Additions by Source**

| Year | Employer<br>Contributions | Net Investment<br>Income (Loss) | Total Additions to<br>Plan Net Position |
|------|---------------------------|---------------------------------|---|
| 2024 | \$ 3,356,772              | \$ 10,315,085                   | \$ 13,671,857                           |
| 2023 | 3,223,560                 | 8,682,485                       | 11,906,045                              |
| 2022 | 2,754,863                 | (15,582,277)                    | (12,827,414)                            |
